BOND ELECTION

SAN BERNARDINO, Calif.—Voters of the San Bernardino Junior College District will hold an election April 12 (tentative date) to vote on the proposition of issuing and selling bonds in the amount of $1,157,000, which, if approved, would be used to finance construction of new buildings in the District.

The program includes the following work:

Construction of an engineering building, $200,000; a new science building to house modern laboratories for chemistry; physics, geology, biology, etc., $175,000; convert present science building to a classroom building, $35,000; expansion of existing library and additional equipment, $110,000; remodel present administration building for administration purposes on the first floor and classrooms on the second, $35,000; a new classroom building for commercial purposes, $175,000; student union building, including cafeteria, kitchen, student offices and additional classrooms, $217,000.

New parking grounds will be necessary following use of present facilities for new construction. This will cost $50,000. Miscellaneous expenses were estimated at $150,000.

Walter L. Culver, Jr., and Jess J. Jones, 2908 "D" St., San Bernardino are the architects for the district.

3/11/46 •• 40
BIDS WANTED
ENCINITAS, San Diego Co., Calif.—Until March 25, 2 P. M., bids will be received by the San Dieguito Irrigation District, Encinitas, for the construction of an earth dam, earth-lined reservoir and pipeline on South Encinitas Creek at Encinitas, San Diego County. The work involves the construction of an earth embankment 45 feet in height and containing approximately 50,000 cu. yds. of fill material, together with the costruction of a reinforced concrete outlet tower, outlet pipeline, overflow spillway and other appurtenant works; the lining or a reservoir with a compacted earth fill of 22,000 cu. yds.; and the construction of 2360 lin. ft. of 20-in. steel pipeline. Note: only bidders having experience in constructing earth dams will be considered.

Plans and specifications were prepared by A. L. Sonderegger, engineer, 925 Central Bldg., Los Angeles, and are available from his office and from the office of the district upon deposit of $20; certified check for $5000 to accompany bids.

The bids will be taken as follows:
(1) 12 acres clearing and grubbing;
(2) 5000 cu. yds. excavation of materials;
(2a) 100 cu. yds. rock;
(3) 20,000 cu. yds. excavation earth in embankment and reservoir area deposited in stockpiles;
(3a) 10,000 cu. yds. excavation earth from borrow pit areas and deposited in stockpiles;
(4) 70,000 cu. yds. earthfill in embankment and reservoir lining;
(4a) 6000 cu. yds. trimming compacted earthfill of reservoir;
(5) 1220 cu. yds. excavation for spillway, hand-trimmed;
(6) 320 cu. yds. excavation for outlet tower and outlet pipe, hand-trimmed;
(7) 12,000 lbs. reinforcing steel;
(8) 190 cu. yds. concrete, outlet tower, outlet pipeline, spillway, cut-off walls and footbridge trestle foundation;
(9) 280 lin. ft. 24-in. outlet pipe;
(10) one 12-in. gate valve;
(11) two 20-in. gate valves;
(12) one special fitting mark "a";
(13) lump sum, tower control works;
(14) 600 b.m. redwood lumber;
(15) 1000 b.m. Oregon pine;
(16) lump sum, tower floors and ladders;
(17) 3200 tons rockfill blankets;
(18) 200 cu. yds. gunite;
(19) 22,000 sq. ft. reinforcing mesh;
(20) 100 tons granite blocks; 20-in. connecting pipeline;
(21) 3400 cu. yds. trenching and backfilling;
(22) 2360 lin. ft. 20-in. No. 10 gauge pipe;
(23) one special fitting, mark "b";
(24) two 26-in. Dresser couplings;
(25) lump sum, highway crossing.

BIDS OPENED

SAN FRANCISCO.—The following submitted bids to the Purchaser of Supplies, City Hall, under Bid No. 3497 for furnishing and delivering 3500 trolley ears and 350 splicing ears for the Municipal Railway:

Westinghouse Electric Corp., (1) $72.10 per 100; (2) $65.70; (3) $105; net 30 days; 45 day delivery.

Don Politeo, (1) $72.10; (2) $67.90; (3) no bid; net 30 days; 50 day del.

Ohio Brass Co., (1) $71.90; (2) $65.70; (3) $172; net 30 days; 60 day del.

BIDS OPENED

TURLOCK, Stanislaus Co., Calif.—Green & Berry, Turlock, at $825.09 submitted low bid to the City of Turlock, Walter M. Brown, city clerk, 108 N. Broadway, Turlock, for furnishing bowl unit, shafting and other materials for a city-owned pump.

Modesto Electric Supply Co., Modesto, at $1310.36 submitted only other bid.

Bids taken under advisement until March 19.

43— MACHINERY AND EQUIPMENT

3/11/46 •• 43

BIDS OPENED

PORTLAND, Ore.—Hydraulic Supply Manufacturing Co., 7500 8th St., Seattle, Wash., at $6870, submitted low bid to the Bonneville Administration, 1300 NE. Union St., Portland, under Inv. 3601 for furnishing oil-storage tanks, 10,000-gal. capacity, above ground, f.o.b. origin.

Other bids were:

Puget Sound Sheet Metal Works, Seattle, $6900.

Willamette Iron & Steel Corp., Portland, $7179.

Berkeley Steel Construction Co., Berkeley, Calif., $7770.

Pacific Coast Engineering Co., Alameda, Calif., $8100.

Independent Iron Co., Oakland, Calif., $8256.

McColloch & Sons, Portland, $8820.

California Steel Products Co., Richmond, Calif., $9082.

Columbia Steel Tank Co., Kansas City, Mo., $9240.

Official Proposal

LS-351—C I Pipe

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the East Bay Municipal Utility District, 512—16th St., Oakland, California, until 5:30 P. M., Wednesday, March 20, 1946, and will at that hour be opened, for furnishing 61,000 linear feet of cast iron pipe in diameters 10- to 20-inch.

Specifications (No. LS 351 may be obtained at Room 406 of the office of the District.

DANIEL READ,
Secretary.

Oakland, Calif.
March 7, 1946.

LS-352—Construction of Schapiro Pumping Plant

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the East Bay Municipal Utility District, 512—16th St., Room 205, Oakland, California, until 5:30 P. M., Wednesday, March 20, 1946, and will at that hour be opened, for performing the work of construction of the Schapiro Pumping Plant Building, including the furnishing of all labor and materials.

The general prevailing rate of per diem wages in the locality in which the work is to be performed, for laborers and each craft or type of workman and mechanic employed to execute the contract, and the general prevailing rate of legal holiday and overtime work specifically set forth in the plans and specifications on file with the Secretary of the District, are referred to and incorporated herein.

Specifications (No. LS 352) may be obtained at Room 406 of the office of the District.

DANIEL READ,
Secretary.

Oakland, Calif.

Purchase of One Stage Control Board of the Modified Preset Type and Appurtences.

NOTICE TO BIDDERS

NOTICE IS HEREBY GIVEN that sealed bids will be received by the High School Board of the John Swett Union High School District of the County of Contra Costa, State of California, at the schoolhouse of said District until eight o'clock P.M. of Tuesday, the 19th day of March, 1946, and opened at said time and place for the purchase of one stage control board of the modified preset type, consisting of a composite pilot board and dimmer bank, a circuit breaker panel, a cross connecting panel and a magnetically operated contactor board. Entire board shall be designed for operation on 230/115 volt, 60 cycle alternating current.

Plans and specifications for this control are on file in the office of the Clerk of the High School Board of said District in the High School Building in Crockett, California.

All bids must be accompanied by a certified check on some solvent bank, or cash deposit equal to ten percent (10%) of the amount of the bid, conditioned that if the contract is awarded to the party submitting the accepted bid, he will enter into a contract and furnish such bonds as may be required by the Board within five (5) days after notice of such award, or failing to do so, the amount of such deposit or certified check to be forfeited as liquidated damages for such failure. All checks shall be payable to the order of the John Swett Union High School District.

The High School Board reserves the right to reject any and all bids, and to waive any formality in any bids received.

By order of the High School Board of the John Swett Union High School District of Contra Costa County, California.

Dated: Crockett, California, February ...., 1946.

J. F. MERCHANT,
Clerk of the High School Board
of the John Swett Union High
School, Contra Costa County,
California.

Fifty-sixth Year—Vol. 56—No. 49
SAN FRANCISCO, TUESDAY, MARCH 12, 1946
PRICE 15 CENTS PER COPY

PLANS and Speculations

San Francisco: The old Ford Motor Company factory at 21st and Harrison streets, is under consideration by the school department as a site for a vocational educational school. The five-story structure can be purchased for $500,000, it is estimated.

oOo

Napa: A revenue bond issue was proposed here last week to insure financing of a pipeline from Conn Dam to bring needed water to this city.

oOo

San Mateo: City officials have approved erection of a new radio transmitting tower north of the sewage disposal plant and between Seal creek and the Emma Rose estate and Third avenue extension. The plot includes about 11 acres.

oOo

Weaverville: Trinity county supervisors have asked the federal government to prepare plans for a proposed sewage disposal plant for this community, a joint meeting of chamber of commerce officials and supervisors disclosed. Weaverville chamber of commerce also voted to proceed with plans for incorporation of this community into a city. Horton Whipple, employed by the county as a consulting engineer on the sewage project, told officials it will cost about $60,000. Planning commission is headed by Kelso Young.

oOo

Porterville: The Taxpayers League of this city has urged the Board of Supervisors to build a new county home for the aged. Chairman T. A. Alexander presided at the stormy session, at which a new location for a county courthouse was also considered.

oOo

San Rafael: This city will soon have the distinction of having the only airport within the city limits of any western city when the new airport, planned by E. F. Lassalle and E. F. Ferrua is completed, just a few minutes walking distance from the downtown shopping area. Plans are being rushed for a landing strip and hangars to provide services for commercial planes and private pilots, and to facilitate establishment of a pilot training school.

oOo

Longview, Tex.: Ex-servicemen students at Le Tourneau Technical Institute here are building giant "house laying" machines which are capable of building a house in about 24 hours. The machine backs up over a prepared framework and pour concrete into the forms. When it is removed, a two-bedroom home is left standing.

oOo

No Burned-Out Fuses To Change In New Postwar House

LOS ANGELES.—The lifeline of electricity—wiring—has been among the foremost considerations in the new Postwar House just opened for inspection here by Research Division of Fritz B. Burns Housing Projects. As a result, plenty of electricity to meet all present and anticipated future needs is available at all points in the house.

Located in the garage is a Westinghouse main circuit-breaker panelboard, including "Deion" type circuit breakers, into which come 200 amperes of electricity for distribution and use where and as needed. This main panelboard feeds electric power to two Westinghouse "Quicklag" circuit breaker panels in the house, located conveniently in a hall and in the kitchen.

The two panelboards in the house control electrical circuits for lighting, convenience outlets and special purpose outlets such as those for the numerous electrical appliances.

None of the panelboards contains any fuses. All include circuit breakers which, in the event of a short circuit or momentary electrical overload, simply stop the flow of current by automatically flicking a small switch-like contrivance—one to each circuit. To resume the flow of current in any given circuit, the homemaker need only to flick the switch back to the normal position, rather than to seek out and replace a burned-out fuse.

The house includes 70 lighting outlets, 119 convenience outlets, and numerous other special purpose outlets serving myriad electrical appliances. Individual room lights are controlled through pushbuttons and electrical relays. Thru a master pushbutton control in the master bedroom, all lights inside and outside the house may be turned on simultaneously when and if needed. Wardrobes and closets are illuminated by fluorescent lamps controlled by door switches.

Improvement In Production Of Major Construction Materials Is Expected

Improvement in production of major construction materials is expected, following the general downward trend at the close of 1945, according to the February "Report on Construction and Construction Materials", prepared by the Construction Division, Department of Commerce.

Construction costs and prices of construction materials continued to rise in December, with prices of materials reaching their highest level in 25 years, the Report states.

Pointing out that December production declines were in general in line with normal seasonal trends, due in part to the Christmas holidays, the Report summarized the supply situation for construction materials and components at the beginning of 1946. Data for key materials follows:

STEEL: January production was curtailed by the strike and is expected to show only about 60 per cent of capacity as compared with 75 per cent in December and 79 per cent in November.

Sheet and strip are the tightest of all steel shapes and are expected to continue in short supply through the first half of 1946.

LUMBER: December production declined to the lowest monthly level in ten years. Excess of demand over supply continues to keep both mill and distributors stocks at an all-time low.

Millwork: Unfilled orders far exceed production which is hampered by shortages of manpower and materials.

Softwood plywood: Continues in short supply chiefly because of log shortages.

Hardwood flooring: Production retarded by shortages of dry lumber and lack of experienced labor. Unfilled orders in producers' hands equal to 6 to 10 months output at the present rate.

CLAY PRODUCTS: All clay products except hollow facing tile showed production losses in December, in contrast with sharp gains in the two previous months. For most clay products, demand continues heavy.

Brick (common and face: Demand represents about 3½ months production at the present rate. Total 1945 shipments of 2.4 billion brick represented an 18 per cent increase over 1944 shipments. Stocks at the close of 1945 were at an all-time low and were only 15 per cent of normal.

Structural clay tile: 1945 production was 3 per cent greater than that of 1944 but was well below the levels reached in 1941-43. Stocks have declined progressively since 1941 to a low of 12 per cent of normal.

Clay sewer pipe: Production and shipments declined in December, following the pattern for most other clay products. Stocks at the end of 1945 were 60 per cent lower than at the end of 1944 and 97 per centt lower than at the end of 1943 and 1942.

PORTLAND CEMENT: December 1945 production was about 32 per cent greater than that for December 1944, and output in 1946 is expected to amount to from 140 to 145 million barrels. December 1945 production exceeded shipments, resulting in a substantial increase in stocks.

ASPHALT ROOFING, Siding, Felts: Backlog of unfilled orders continues large, amounting to from 9 to12 weeks' production. Heaviest demand is for saturated felts. December shipments of prepared roofing were the lowest in the past four years.

GYPSUM BOARD AND LATH: Gypsum board shipments in December were 18 million squares less than those of November, due to the holidays and production loss in two strike-bound Pacific Coast plants. Shipments for the year 1945 were practically the same as for 1944 (2.1 billion square feet). Supply of gypsum lath improved considerably in the fourth quarter of the year.

CAST IRON SOIL PIPE: January production is expected to rise sharply to approximately 26,500 tons from an estimated December output of 21,971 tons. Demand represents 12 months' production at the current rate. Output is affected by shortages of pig iron which is becoming more acute.

CONCRETE BUILDING Blocks: Unfilled orders amount to more than double the current production rate. Inventories at the end of 1945 were only 50 per cent of normal. If sufficient manpower is available, 1946 requirements can be met.

METAL BUILDING Products: Volume of production is contingent upon available steel inventories.

Metal insect screen cloth: Expected to continue in short supply through 1946.

Steel windows: No windows in stock. Production is limited to inventories of basic shapes.

Nails: In very short supply, with no improvements expected until the second quarter of 1946.

PLUMBING AND HEATING:

Bath tubs: Production of over 125,000 cast iron tubs in the first quarter 1946 is considered feasible. Production of steel tubs in the first quarter is dependent on the availability of sheet steel; facilities are adequate to produce more than 10,000 steel tubs.

Cast iron sinks and lavatories: Production is low but progressive improvement is expected in the first quarter of 1946.

Water heaters: Shortages of sheet steel and castings are retarding production.

Cast iron radiation: Production is improving but is not expected to show sharp pains in the first half of 1946. January production is estimated to be two million square feet.

GROOVER AND I

EARTHQUAKES

The Hollywood movie colony experienced an earthquake when the 1945 Oscar was unexpectedly awarded to Joan Crawford, a San Antonio gal, who has been turning in a solid job of good acting over a period of years.

* * *

Another earthquake was experienced at Santa Anita when War Knight crossed up the smart money boys, winning the handicap and paying $15.30 for a deuce ticket, while the owner netted $101,220.

* * *

Another earthquake occurred in Washington, D. C., when by invitation, ex-President Herbert Hoover called on President Truman. This was the second time Mr. Hoover has visited the White House since he lived there for free. Once previously, President Truman invited Mr. Hoover to call.

* * *

The earth tremor was not caused by the visit, but by the fact that Mr. Hoover, for the first time in memory, on a state occasion, wore a soft turned-down collar!

* * *

It is reassuring to know that President Truman has not hesitated to cut across party-line predjudices in obtaining the best possible counsel and aid in the important job of feeding the starving people of wrecked nations.

* * *

If experience counts, Mr. Hoover knows more about feeding destitute people by the nationsfull than any any other living man.

Cyclops Iron Works Awarded Contract For 230-Ton Keswick Power Plant Crane

An equipment contract for $100,280 to manufacture a 230-ton traveling overhead crane for the Keswick power plant of the Central Valley Reclamation Project has been authorized for award to the Cyclops Iron Works of San Francisco, Commissioner of Reclamation Michael W. Straus informed Regional Director Richard L. Boke at Sacramento today.

Commissioner Straus said the double-trolley, motor-operated crane will be used for installation, and later for maintenance work, on turbines and generators in the Keswick Dam power plant, located nine miles below Shasta Dam power plant on the Sacramento River.

Three 25,000-kilowatt generators, turbines, and governors are now being manufactured for the Keswick plant by General Electric Co., Schenectady, N. Y., S. Morgan Smith Co., York, Pa., and Woodward Governor Co. of Rockford, Ill., respectively. The Bureau of Reclamation has scheduled these power units at Keswick and the remaining three 75,000 kilowatt generators at Shasta Dam for operation in 1947. The first two of the Shasta generators began operation in 1944 to supply power for war needs.

A transmission grid for the Central Valley Project has been designed by Reclamation engineers to distribute the total hydroelectric energy capacity of both Shasta and Keswick plants so that large blocks of depenadble power can be furnished for pumping irrigation water and for supplying public and private agencies.

Commissioner Straus said that award of a contract for construction of the 56-mile Oroville-Sacramento section of a 230-kilovolt transmission line from Oroville to Tracy will be announced soon. The 230-kilovolt Shasta-to-Oroville line, first unit of the power grid, was constructed before wartime regulations halted the program.

With a capacity of 450,000 kilowatts, Central Valley transmission lines will eventuraaly furnish a three-way distribution of Shasta and Keswick power to the multimillion acre Central Valley development, Straus said. Approximately the first third of the power capacity will be used to operate the large project pumps near Tracy, lifting Sacramento river water some 200 feet into the 120-mile Delta-Mendota Canal, which will supply much-needed irrigation water to the San Joaquin Valley.

Refrigerant Gases Topic of A.S.R.E. March Meeting

The March meeting of the American Society of Refrigerating Engineers will be held Friday at 6 p.m. in the Engineers' Club, 206 Sansome street. Featured speaker of the evening will be Guy R. King, society member, who will talk on "The Freons".

Mr. King is associated with the Ralph E. Manns company of San Francisco and Wilmington, Calif., and will differentiate between the various freons, comparing them with ammonia.

A past president of San Francisco chapter of the N.A.P.R.E., King has given courses on refrigerants and other refrigeration subjects in connection with educational courses of the chapter. He has five years experience teaching in technical schools and has been affiliated with refrigeration work since 1931. Some of his most recent articles have been published in the trade magazine, Ice and Refrigeration.

Following King's talk, a discussion period will be led by Lester L. Westling, chairman of the technical committee. John F. Kooistra is program chairman. Reservations should be telephoned to EXbrook 4404.

BIDS WANTED
TERMINAL ISLAND, Los Angeles Co, Calif.—Until March 15, 11 A. M., new bids will be received by the U. S. Navy, Public Works Office, U. S. Naval Base, Terminal Island (San Pedro), for the construction of a one-story steel frame pipe and bar storage shed at the U. S. Naval Shipyard, Terminal Island; Specification No. 17294, NOy 13120.

Plans and specifications may be obtained from the Public Works Office, U. S. Naval Base, Terminal Island, San Pedro, upon deposit of check or postal money order for $10, payable to the Chief of Bureau of Yards and Docks.

All bids received January 11 have been rejected by the Bureau of Yards and Docks, since it considered that timber roof construction cannot be justified in view of certain restrictions. The new bid will be on the basis of revised drawings and specificatins to cover an alternate design incorporating steel roof construction.

As previously reported, Fred D. Kyle submitted the previous low bid at $36,663.

3/12/46 ** 4

PREPARING PLANS
BREMERTON, Wash.—The U. S. Navy, Bureau of Yards and Docks, Washington, D. C., is preparing plans and specifications and will probably issue a call for bids within the next few months, for the construction of six ship-mooring piers, for reserve warships of the 19th fleet, at the Puget Sound Navy Yard, Bremerton, Wash.

The work involves construction of 1200-ft. piers, one and perhaps two of which will be of reinforced concrete construction. The others will be of the interrupted caisson type, but all of them will have water, power, oil and some trackage lines installed. The work will also involve considerable dredging; estimated cost, $12,000,000.

The NATION
is reading about
the assets and opportunities of
NORTHERN CALIFORNIA

For more than six months, your gas and electric company has been carrying on a consistent national advertising campaign to bring new business and industry to Northern California.

This advertising with colorful illustrations has been keyed to one dominant theme—"Northern California, the industrial center of the new Pacific World."

Four main objectives, important to every community in this area, have been the goal of this series of advertisements. These objectives are:

1. To hold much of the wartime gains of business and industry as permanent assets here.
2. To help in the reconversion and expansion of existing business and industry.
3. To attract new business and industry to Northern California.
4. To absorb in productive work the greatly increased population, the recently acquired force of skilled labor and the thousands of veterans who plan to live and prosper in Northern California.

Already we have abundant evidence that our national advertising has opened many eyes and minds throughout the Nation to the great future shaping up for this region.

This ambitious program is being carried on in complete cooperation with local committees, service clubs, industrial groups, chambers of commerce and other civic organizations.

We shall keep this advertising at work for Northern California well into 1946.

Fifty-sixth Year—Vol. 56—No. 50 SAN FRANCISCO, WEDNESDAY, MARCH 13, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

Martinez: County officials are reported seeking acquisition of from 35 to 50 dwellings to relieve the housing shortage for veterans. Warren Harrold, county housing director, has been instructed by the Board of Supervisors to investigate possibility of obtaining units adjacent to Buchanan Field, under a federal-state grant.

oOo

Watsonville: The state highway commission and seven highway engineers are slated to make a survey of proposed highway improvements in southern Santa Cruz county and northern Monterey county on March 21. Particular interest will be paid to the proposed new bridge over the Pajaro river in this city.

oOo

San Mateo: Plans for construction of an estimated $100,000 South San Mateo branch post office to serve an anticipated 30,000 residents in the south end during the next ten years, were revealed last week by Postmaster Edward J. Carrigan. Postal inspectors are scheduled to make an early survey of possible locations and will make recommendations for needed facilities.

oOo

San Jose: Nearly 2000 acres northeast of this city and 746 acres southeast have been recommended for industrial zoning by a six-man committee representing the city and County Planning Commission and the Chamber of Commerce industrial committee. Thos. L. Mitchell is chairman of the subcommittee, and Russell E. Petit, chamber of commerce manager and representative.

oOo

San Francisco: More than 1,000 men will be employed in construction of the proposed Folsom Dam, Army engineers estimate. Peak employment during the three-year period required to complete the project will be nearly 2,500.

oOo

Alameda: Opening of a manufacturing plant of Pumice Industries was anticipated in this city by the chamber of commerce who announced that three acres of land on Webster street north of the Posey Tube have been leased by the company.

American Anode, Inc. Announces Plans For L. A. Plant

American Anode, Inc., of Akron, Ohio, will construct a manufacturing and processing plant in Los Angeles, it is announced by B. F. Stauer, Anode president. The new plant, to be erected as rapidly as possible, is expected to be in operation late this year.

Equipped to make latex mixes for use in the manufacture of all types of latex products such as rubber-covered metals, rubber sundries, cord dipping, paper and textile coating and impregnating, casting and molding, the new unit will serve the west coast in this field, the company announcement states.

"All types of rubber, synthetic rubber and plastic latices will be made available through the addition of this new facility and will be manufactured in quantities ranging from drums to tank cars."

The new Anode plant will be constructed in East Los Angeles near the factories and offices of The B. F. Goodrich Company on Olympic Blvd. and Pacific Avenue.

RETURN AIRPORT BIDS UNOPENED

Bids were returned unopened to contractors yesterday by the Public Utilities Commission, Rm. 287, City Hall, on San Francisco Airport Contract No. 82 for airport extension fill, pavement and related construction.

Reason given was that recently negotiated contracts between contractors and labor unions created a rise in labor cost not included in the bids submitted.

A new bid opening date will be announced soon.

For Better Building . . .
1946 EDITION UNIFORM BUILDING CODE

The 1946 Edition of the Uniform Building Code, scheduled for publication January 1, 1946, is now off the press. It contains many important and far-reaching changes which have been approved at Annual Conventions of the Pacific Coast Building Officials Conference since publication of the 1943 Edition. There are revised provisions concerning administration, heavy timber construction, masonry, stairs and exits, chimneys, vents, fireplaces, motion picture projection rooms, and heating appliances. For the first time, a chapter on prefabricated construction has been incorporated in the Code, as well as new sections regulating glued construction.

In making these extensive revisions, the Conference answers the insistent public demand for a building code that is modern enough to recognize new materials and elastic enough to permit new uses of old materials. The accepted policy of the Conference of specifying the results desired has been followed throughout, with the single exception of the limiting dimensions of masonry-bearing walls specified in Chapter 24. Here, definite dimensions are specified for the use of the architect or engineer who desires to use time-tested construction; but Code specifications do not suppress the ingenuity and imagination of the designer who wishes to depart from the conventional, as long as he does not depart from structural stability.

Following are a few "highlight" changes and revisions.

Chapters 1 to 4 on Administration have been entirely rewritten to conform to modern practice.

Complete revision has been made in Chapter 24, on Masonry. The Building Official will find it necessary to forget the chapter on masonry in the 1943 Edition and familiarize himself with a new set of regulations.

Sections 2526 to 2530 of Chapter 25 introduces detailed regulations on glued structural lumber. Tests for glues are specified, both for interior uses and for conditions of exposure. The methods of construction are specified, and the allowable stresses and methods of design are regulated.

The material formerly found in Chapter 37 has been revised and divided into two chapters: Chapter 37—Chimneys, Vents, and Fireplaces, and Chapter 51 (in the Appendix)—Heating Appliances.

Chapter 50 is a new chapter covering prefabricated construction. It provides for a certificate of approval by an approved testing agency, except where a prefabricated assembly is accessible for inspection at the site. A prefabricated assembly must be designed to resist the loads specified in Chapter 23.

Chapter 51 (Appendix) contains material on heating appliances, formerly found in Chapter 37. Additional regulations are included for floor furnaces, attic furnaces, commercial gas ranges, large boilers, domestic water heaters, construction of warm air ducts, and the performance standards of the appliances.

Copies of the Uniform Building Code may be obtained from the Colling Publishing Co., 124 West Fourth St., Los Angeles 13, Cal., at the following rates: for non-members of Pacific Coast Building Officials Conference, cloth-bound, $3.00 each; paper, $2.50. Prices for quantity lots, and prices of copies for members of the Pacific Coast Building Officials Conference may be obtained by writing the Colling Publishing Co.

A copy of the Uniform Building Code is on file at the offices of Daily Pacific Builder.

ARCHITECTURAL RECORD SCORES ANOTHER 'FIRST'

The March issue of "Architectural Record" adds to an already long list of editorial "firsts"—the first analysis of perhaps the most successful master planning ever done by school architects: a school development in California designed by Ernest J. Kump Co., San Francisco. The same Building Types study features the **first** finished postwar schools to appear in any architectural magazine; the **first** use by the Kump firm of the new square-type classroom; the **first** fully-developed outdoor classroom, and one of the first introductions of radiant heating in a school in California.

In April the "Record" will carry an extended presentation of New York State's **first** serious project embodying the so-called "California Classroom" in a 2-story building.

GROOVER AND I

OVERSEAS MAIL

To My Son
Naha, Okinawa
Dear Son:

We are thinking of you, just as thousands of other parents are thinking of their sons who are watching the calendar in various and scattered spots around the world.

* * *

I know it is especially tough on all of you boys on Okinawa which has been by-passed. The parade has moved on and your island is the hole in the doughnut. Even though time may drag for you, we at home know it is slowly passing, as we, too, are watching the calendar.

* * *

I have told you that the demobilization program has been progressing as rapidly as can be expected. Here are some figures: The peak strength of the Army was something over seven million men. On March 1, the War Department estimated there were 2,670,000 men in the service. The Federal payroll, at last report, carried 2,946,947 persons. This means at the present time there are more civilians on the U. S. payroll than there are men in the Army.

* * *

Here at home most of the activity is on the labor front. Wage adjustments follow a general platform of an 18c per hour increase over the wartime rate. Trouble is, as soon as one strike is settled, another one starts.

* * *

Perhaps this is because there may be more excitement on a picket line than on a production line. I have only one suggestion to make: Run the straight time work day from midnight until 8 A.M., then overtime from 8 A.M. to 4 PM. In this way, the boys could strike on straight time and work the overtime. This would give every [illegible] the PLEASURE of a strike and the BENEFIT of a day's work per each day.

* * *

Seriously, your Nation may have a lot of bumps and bruises but it is still the best Country anywhere in the world today. The Republic you are now serving still has strength and vitality. There may be loose joints and squeaky gears but it will be for you boys now coming home to take over, get the machine back on the track and in running order.

* * *

Just remember that for every soldier who wants to come home, there is a Wife, Mom, or Dad who is anxiously awaiting his return. I am one of them.

With love,
YOUR DAD.

New Wage Stabilization Laws Go Into Effect Saturday

A warning to employers that Friday is the deadline for putting unapproved wage increases into effect without waiving their right to use them subsequently for requesting price relief was issued today by Thomas Fair Neblett, Chairman of the Tenth Regional Wage Stabilization Board.

"We want all employers to understand clearly that we will not be able to act on unauthorized increases made after March 15," Neblett said.

"After March 15 an employer must secure prior approval of a wage increase from the WSB if he intends to use it in asking price relief. If he puts it into effect first, then he waives his right to ask such approval for the duration of the wage stabilization laws."

Neblett said that the Stabilization Administrator has authority to make exceptions to this general rule, but so far the only exception is for employers of not more than eight. Such firms, providing they are not in the building and construction industry, nor firms in which wages are set by a master contract or similar contracts negotiated on an industry- or area-wide basis, may make wage increases at any time and apply direct to OPA at any time for price relief.

Neblett also warned that firms putting wage increases into effect between February 14, the date of the new wage-price order, and the March 15 deadline must apply to the WSB for approval for pricing purposes within 30 days of the time the increase is first reflected in current payrolls. The WSB has the authority to approve its use for pricing purposes in full or in part, or to deny it.

In cases where the employer is willing to absorb the cost of a wage increase himself, he may increase wages in any amount at any time without seeking any approval, Neblett pointed out. The sole exception to this is the building and construction industry in which all wage increases still must have prior approval, regardless of price aspects.

As for wage decreases, they require prior approval of the WSB in all cases. Employers who put decreases into effect without securing approval are liable to penalty.

#

INCOME TAX DEADLINE FRIDAY AT MIDNIGHT

Income tax returns for the year 1945 must be filed or in the mail before midnight Friday. If you mail them be sure to take them to a post office to insure postmarking prior to midnight.

Engineers Needed For Northwest Bureau Projects

BOISE, Idaho, Mar. 11.—Openings for nearly 165 professional and sub-professional people, chiefly engineers, in Northwest project offices of the Bureau of Reclamation were announced here today. The positions range in salary from $2980 to $4300.

Positions open are in field offices engaged in making studies of potential irrigation and other water developments in Salem, Medford, Walla Walla, Kalispell, and Boise. Needed are civil engineers, hydrologists, geologists, draftsmen, agricultural economists, soils technicians, persons with professional writing experience to handle report writing, and chiefs of engineering survey parties.

Recruiting headquarters, set up last week in Seattle, Spokane and Portland, have filled a number of positions. However, there still are many openings in the above fields, F. Russell Sparks, regional employment officer of the Bureau, announced today.

Although the recruiting headquarters are now closed, applications still are being taken by the project offices. Sparks urged prospective applicants with any of the above qualifications to apply in person or by letter to the project offices in which they are interested. The adresses are as follows: 460 N. High Street, Salem, Oregon; Post Office Building, Medford, Ore. First Avenue and Main St., Walla Walla, Wash.; Box 97, Kalispell, Montana; and Box 2298, Boise, Ida.

Priority in the selection of candidates will be given in the following order: (1) Persons entitled to 10 point military preference; (2) Persons entitled to 5 point military preference; (3) Former Federal employees not entitled to military preference; and (4) Non-preference applicants who are not former Federal employees.

All appointments will be made under section 2, rule 8 of Civil Service Circular No. 549 which governs appointments at the present time. The Bureau is recruiting directly by authorization of the Civil Service Commission so the Commission may devote its entire recruitment and placement resources to the establishment of registers for probational appointment.

TO HOME BUILDERS . . .
Now is the time to secure your choice of building sites in a restricted tract of the finest view property available on the Peninsula.

Tract consists of 10 acres in the city of San Mateo and 55 acres in the town of Hillsborough subdivided into 69 beautiful building sites. They range from ¼ acre to 4 acres; priced from $2,750 to $13,600 including improvements.

Present prices are subject to sharp advancement upon completion of improvements; when unsold sites will be extensively advertised to the public.

Engineering is now being completed for streets, sewers and water system; work is scheduled to start during May of this year.

Property can be inspected by appointment by calling
Frank Ashby, Owner, at MArket 1230

(25) laying 200 lin. ft. of 18-in. diameter concrete pipe;
(26) laying 60 lin. ft. of 24-in. diameter concrete pipe;
(27) installing 3500 lbs. of gates and gate hoists;
(28) installing 6500 lbs. of miscellaneous metal work.

Schedule No. 2

Earthwork, dam embankment and structures, Contra Costa Canal, station 2512+25 to end, and Mountain View Reservoir.

(1) clearing 13 acres orchards and vineyards;
(2) grubbing 13 acres orchards and vineyards;
(3) 2000 cu. yds. of excavation, all classes, for outlet and spillway channels;
(4) 9500 cu. yds. of excavation, stripping dam foundation and borrow pits;
(5) 360 cu. yds. of excavation, all classes, for embankment toe drains;
(6) 160,000 cu. yds. of constructing dam embankment;
(7) 10,000 lin. ft. of sand-filled drain holes;
(8) 17,000 cu. yds. of sand drain in dam embankment;
(9) 6000 cu. yds. of riprap on dam;
(10) 450 cu. yds. of gravel surface on dam crest;
(11) 10,000 cu. yds. of excavation, all classes, for structures;
(12) 3000 cu. yds. of backfill;
(13) 2500 cu. yds. of compacting backfill;
(14) 480 cu. yds. of concrete in structures;
(15) placing 55,000 lbs. of reinforcement bars;
(16) placing 25 sq. ft. of elastic filler material in joints;
(17) placing 10 lin. ft. of rubber water stops in joints;
(18) placing 360 lbs. of metal water water stops in joints;
(19) 600 sq. yds. of dry-rock paving;
(20) constructing 1400 lin. ft. of 12-in. diameter sewer pipe drain with uncemented joints;
(21) laying 100 lin. ft. of 12-in. diameter sewer pipe with cemented joints;
(22) installing 2100 lbs. of gates and gate hoists;
(23) installing 7100 lbs. of outlet pipes and valves;
(24) installing 13,400 lbs. of miscellaneous metal work.

Total bids follow:

(A) Parish Bros., Benicia, (1) $345,-885, (2) $223,08950. Stipulation: Will accept Schedule 1 only if awarded Schedule 2, or will take Schedule 2 alone.

BIDS WANTED
KERN COUNTY, Cal.—Until Apr. 10, 2 P. M., bids will be received by the State Division of Highways, G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about 1.9 miles in length to be graded and paved with Portland cement concrete and asphaltic concrete between Brundage Lane and 24th St., Bakersfield, Kern County.

Specifications obtainable from the above office.

Quantities follow:

(1) 5,200 c.y. remove concrete;
(2) clear and grubb;
(3) 61,000 c.y. rdwy. excav.;
(4) 2,400 c.y. struc. excav.;
(5) 69,000 s.y. compacting original ground;
(6) 35,000 c.y. import borrow;
(7) 3,550 c.y. import top soil;
(8) 53,800 s.y. prepare Class C subgrade;
(9) develop water supply and furnish water equip.;
(10) 4,400 M. gals. apply water;
(11) 99 sta. finish rdwy.;
(12) 1,540 tons crusher run base;
(13) 90 tons liq. asph. RC-3 or RC-3 subgrade treat;
(14) 11,000 s.y. preparing, mixing and shaping surf subgrade treatment;
(15) 2,550 tons min. agg. plant mix surf.;
(16) 10 tons liq. asph. SC-2 prime coat;
(17) 127 tons liq. asph. SC-6, plant mix surf.;
(18) 100 tons asph. emulsion prime coat, paint binder, curing seal and seal coat;
(19) 15,100 tons asph. concrete;
(20) 1,070 l.f. asph. conc. raised bars;
(21) 8100 c.y. portland cement conc. base;
(22) 2480 c.y. portland cement conc. pavement;
(23) 2300 each pave. tie bolts assemblies;
(24) 455 c.y. portland cement conc. structures;
(25) 58,000 lbs. bar reinf. steel;
(26) 1,990 c.y. portland cement conc. curbs, gutter, sidewalks and driveways;
(27) 2,650 each curb dowels;
(28) 5 each monuments;
(29) 190 l.f. pipe handrail;
(30) 15 each move and reset street marker posts;
(31) 190 l.f. move and reconstruct chain link fence;
(32) 312 l.f. 18-in. reinf. conc. pipe standard strength;
(33) 488 l.f. 18-in. CMP, 16 gage;
(34) 156 l.f. 12-in. plain conc. pipe;
(35) 610 l.f. salvage part circle metal culverts;
(36) 17 ea salvage drop inlet frames and grates or covers;
(37) 15 each catchbasin frames and covers;
(38) 1 each manhole frame and cover
(39) 25 ea adjust manholes to grade;
(40) 15 each adjust handholes to grade;
(41) 95 each red reflectors;
(42) 600 l.f. ½-inch galv. iron pipe bubble head line;
(43) 950 l.f. ¾-inch do;
(44) 1,390 l.f. ¼-inch do;
(45) 1530 l.f. 1¼-inch do;
(46) 260 l.f. 1½-inch do;
(47) 280 each bubble heads, watering system;
(48) 1,180 l.f. ¾-in. galv. iron pipe nozzle line;
(49) 670 l.f. 1-inch do;
(50) 550 lbs. misc. iron and steel pedestrian underpass;
(51) 56 l.f. rubber waterstops pedestrian underpass;
(52) move and reset gates, pedestrian underpass;
(53) lighting equipment pedestrian underpass;
(54) 22 ea transplanting palm trees
(55) 3,700 l.f. furnish 1-inch electric conduit;
(56) 2,350 l.f. furnish 2-inch do;
(57) 3,270 l.f. install elec conduit;
(58) 2,780 l.f. install do by Jacing method;
(59) 45 each cast iron elec junction boxes or pull boxes;
(60) 23 each type A signal or dispatcher bases;
(61) 15 each type B signal bases;
(62) 20 each dispatcher guard posts.

3/13/46 ** 40
BIDS WANTED
SAN DIEGO COUNTY, Calif.—As previously reported, until April 11, 2 P. M., bids will be received by the State Division of Highways, G. T. McCoy, state highway engineer, State Bldg., Los Angeles, for about 4.1 miles in length to be graded and surfaced with portland cement concrete pavement, between .4 mile south of Mission Valley Rd. and .5 mile north of north city limits of San Diego (XI-SD-77-SD,A), in San Diego County.

Specifications obtainable from the State Highway Engineer, Public Works Bldg., Sacramento.

The work involves:

(1) 1680 cu. yds. remove concrete;
(2) clearing and grubbing;
(3) 843,000 cu. yds. roadway excavation;
(4) 12,000 cu. yds. structural excavation;
(5) 9650 cu. yds. ditch and channel excavation;
(6) 25,675,000 sta. yds. overhaul;
(7) 97,000 sq. yds. compact original ground;
(8) 11 acres plowing, weed control;
(9) 66 tons straw slope erosion protection;
(10) 16½ tons fertilizer slope erosion protection;
(11) develop water supply and furnish water equipment;
(12) 21,400 M gallons apply water;
(13) finish roadway;
(14) 26,400 sq. yds mix and compact cement subgrade treatment, 6-in. thick;
(15) 127,000 sq. yds. mix and compact cement subgrade treatment, 4-in. thick;
(16) 7300 bbls. portland cement subgrade treatment;
(17) 222 tons asphaltic emulsion curing seal and seal coat;
(18) 240 tons screenings seal coat;
(19) 6400 sq. yds. prepare, mix and shape surface bituminous surface treatment;
(20) 51 tons liquid asphalt, SC-3 or SC-4, bituminous surface treatment;
(21) 8150 tons bituminous surfacing;
(22) 53 tons liquid asphalt SC-2 prime coat;
(23) 3100 tons plant mix surfacing;
(24) 1660 tons asphaltic concrete base and level course;
(25) 870 tons asphaltic concrete, type A, surface course;
(26) 280 lin. ft. raised bars;
(27) 29,120 cu. yds. portland cement concrete pavement;
(28) 21,770 each tie bolt assemblies;
(29) 380 cu. yds. class A portland cement concrete structures;
(30) 80 cu. yds. class A portland cement concrete ditch lining;
(31) 41,500 lbs. bar reinforcing steel;
(32) 700 sq. yds. mesh reinforcing;
(33) 50 cu. yds. broken concrete masonry;
(34) 75 cu. yds. broken concrete riprap;
(35) 3250 cu. yds. portland cement concrete curbs and gutters;
(36) 80 each right-of-way monuments
(37) 22 each center line monuments;
(38) 14,200 lin. ft. metal plate guard railing;
(39) 265 each guide posts;
(40) 130 each culvert markers and project markers;
(41) 29,500 lin. ft wire mesh fence;
(42) 3 miles new property fence;
(43) 412 lin. ft. 18-in. reinforced concrete pipe, standard strength;
(44) 5076 lin. ft. 24-in. reinforced concrete pipe, standard strength;
(45) 444 lin. ft. 30-in. reinforced concrete pipe, standard strength;
(46) 68 lin. ft. 48-in. reinforced concrete pipe, standard strength;
(47) 1348 lin. ft. 60-in. reinforced concrete pipe, standard strength;
(48) 188 lin. ft. 24-in. reinforced concrete pipe; extra strength;
(49) 200 lin. ft. 30-in. reinforced concrete pipe, extra strength;
(50) 224 lin. ft. 36-in. reinforced concrete pipe, extra strength;
(51) 444 lin. ft. 60-in. reinforced concrete pipe, extra strength;
(52) 194 lin. ft. 12-in. CMP, 16-gage;
(53) 212 lin. ft. 18-in. CMP, 16-gage;
(54) 192 lin. ft. 24-in. CMP, 14-gage;
(55) 29 each spillway assemblies;
(56) 466 lin. ft. 8-in. CMP downdrains, 16-gage;
(57) 90 each red reflectors;
(58) 359,000 each ice plant cuttings;
(59) engineer's office;

Sanitary Sewers

(60) 460 lin. ft. 6-in. cast iron pipe;
(61) 300 lin. ft. 8-in. cast iron pipe;
(62) 510 lin. ft. 8-in. vitrified clay pipe;
(63) 3 each new sewer manholes.

3/13/46 ** 40
BIDS OPENED
ALAMEDA, Alameda Co., Calif.—Gallagher & Burk, 900 73rd Ave., Oakland, at $10,564.30, submitted low bid to Public Roads Administration, Charles C. Morris, division engineer, 720 Phelan Bldg., San Francisco, for construction of 0.171 mile access road to Army Air Force Intransit Depot, Webster St. from Tynan Ave. to Alameda Portal Bldg.; Project Calif. DA-WR-225 (1), Unit 2.

The work involves:

(1) extra and miscellaneous force account work;
(2) 840 cu. yds. unclassified excavation;
(3) 25 cu. yds. unclassified excavation for structures;
(4) 6 M gallons watering of subgrade;
(5) 28 M gallons watering of base course;
(6) lump sum, provide and maintain water plant or plants;
(7) 1450 tons crushed gravel or crushed stone base course, class 2, grading C-1;
(8) 4 tons medium curing cutback asphalt, grade MC-1, for prime coat;
(9) 1 ton emulsified asphal tfor tack coat;
(10) 4 tons type 4 blotter material for the bituminous preservative treatment;
(11) 1 ton medium curing cutback asphalt, grade MC-2, for bituminous preservative treatment;
(12) 350 tons plant mix, grading B (class F pavement, type F-1);
(13) 234 tons plant mix, grading B-2 (class F pavement, type F-1);
(14) 29 tons asphalt, grade 50-60 or 85-100 (contractor's option) for type F-1;
(15) 78 lin. ft. 10-in. vitrified clay culvert pipe;
(16) 4 each 10-in. vitrified clay culvert pipe elbows;
(17) 4 each catchbasins;
(18) 3 sets cast iron frames, gratings and curb inlet housings;
(19) 1 each storm drain manhole (depth approximately 5 ft.);
(20) 1460 lin ft. concrete curb, 14-in. depth.

Total bids follow:

(A) Gallagher & Burk, Oakland, $10,-564.30.

PLANS and Speculations

Washington: Plans for a national nurses memorial in California have been revealed by Arthur H. Johnson of the committee studying the feasibility of such a memorial.

oOo

San Francisco: Tentative changes in the city building code are being discussed in an effort to relieve the parking congestion downtown. Plans is to require all new buildings with a frontage of 60 feet or more to have "off-street parking space to facilitate loading and unloading . . and for occupants of the structure."

oOo

Oakland: A roller skating rink was proposed to the city council as use of the exposition building adjoining the municipal auditorium. Mrs. Ethel Jean Kibbe, who made the offer of a five-year contract, claims the arrangement will give the city a guarantee of at least 12,000 yearly for a building which is used only infrequently under present conditions.

oOo

Fall River Mills: This community seeking incorporation following a chamber of commerce proposal to construct a $50,000 sewage disposal plant, financing of which might lead to incorporation. The chamber also discussed a site for the Dr. Thos. D. Wyatt hospital. Phil Rice and Jas. Black presided at the meeting in the absence of President Pat Ryan of the chamber.

oOo

Sacramento: The pre-fabricated house question is one of the major subjects being discussed before the 18th annual covention here of the California State Council of Carpenters, who represent more than 90,000 tradesmen.

oOo

Delano: Veterans are assured of at least 15 houses within the next two months if plans of the city council mature. Collaborating with the Kern County Housing Authority, the council is attempting to obtain defense housing from Washington and Oregon projects, move it here and erect it for veterans' use. A site on Jefferson St., between 4th and 5th Aves., has been selected.

Army Engineers Add Pacific Districts Embracing War Gains West To Japan

Manila, Okinawa and Honolulu districts, comprising the Western Ocean Division in the Army Engineers program, have been added to the 46 districts under Engineers control.

Lieut. Gen. Raymond A. Wheeler, chief of engineers, created the new division by authority of the Secretary of War.

Honolulu district, detached from the Pacific division, will embrace the Hawaiian, Line, Gilbert, Marshall, Caroline Marianas, Bonin, Wake, Marcus, Johnston and other islands lying between the 159th meridian east longitude, and 108th meridian, west longitude.

Okinawa district will include the Ryukyu Islands of the Japanese Archipelago.

Manila district will have headquarters in Manila and include the islands of Philippine Archipelago.

The newly-created Western Ocean Division will maintain headquarters in San Francisco with Col. George Mayo as acting division engineer. Col. Mayo holds ths same position in Pacific Division.

In carrying out their peacetime mission of improving rivers and harbors, flood control and other construction, Army Engineers now have jurisdiction in 12 divisions. It is planned the new division will care for military construction in the Pacific.

#

Shasta Dam Pilot Plant Opens Today

An event of far-reaching importance to all northern California will take place today at Shasta Dam on the Sacramento river when notables, executives of the Bureau of Mines, and other government officials take part in an informal ceremony opening a pilot plant for testing of mineral ores.

William W. Stephens, engineer in charge of the plan, said today that Dr. R. S. Dean, Assistant Director of the Bureau of Mines, will attend the opening with C. W. Davis, Chief of the Boulder City division. Rep. Clair Engle is slated to attend, conditions permitting.

The Redding Chamber of Commerce has issued invitations to steel manufacturers and other interested individuals. Because of limitations of space, the event is not public.

Close cooperation between the Mines and Reclamation Bureaus of the United States Department of the Interior has made the Shasta Pilot Plant possible, holding out to California industry a new prospect for postwar development and extending the benefits of the power generated by the Central Valley Project to an entire new field of productive endeavor.

Sacramento Subscribers . . .

Improved mailing service to Sacramento subscribers was inaugurated today under a special agreement with the U. S. Postal Department, Washington, D. C., which has granted permission to the Daily Pacific Builder to express by fast truck copies for subscribers in the valley center. This extra service, arranged through cooperation of the San Francisco post office, insures prompt delivery of the "Builder" to the Sacramento post office, which, in turn, delivers them speedily to the subscriber.

Bolles and Smith Series Lecturers

Architect John Bolles and Realtor Raymond Smith will be today's speakers on the "House I Want" series. Both Mr. Bolles and Mr. Smith will speak on the problems of site selection. The morning lecture will be given at the 20th Century Club in Berkeley at 10:30, and the afternoon lecture is to be held at the San Francisco Museum of Art at 2:30.

This is the second of the series of six programs sponsored by the Womens' Architecture League, San Francisco Museum of Art and the Northern California Chapter of the American Institute of Architects. The speakers on last week's program were Gardner Dailey, architect, Thomas Church, landscape architect, and Maurice Sands, decorator.

Use "Builderads"– They Bring Results

GROOVER AND I

GAMBLING

If we were not a nation of hypocrites, it might be possible to ease the March 15th income tax jolt by cutting the Treasury Department in on the gambling "take" of the nation.

★ ★ ★

There is no way of estimating our annual betting turnover. The March 9th mutuel "handle" at Santa Anita was $4,601,461. This does not include bookmakers all over the country, who were wired to the track, or your neighborhood hairdresser or barber shop writing "books" for two-bits and 50 cents.

★ ★ ★

Then there are the slot machines and pinball games before you start counting the foreign lotteries, both real and fake, selling tickets in this country.

★ ★ ★

How many men are marched to church by their wives on Sunday, hold out on the collection and later play the punchboard at "Joe's place"—those dimes count up!

★ ★ ★

Of course, it is all illegal. But your Treasury Department is very tolerant and broad-minded. Remember, Al Capone did not go to Alcatraz for bootlegging. He was locked up because he did not pay income tax on the profits of his law violations.

★ ★ ★

The income tax boys are not concerned with how you get it, so long as you read all the fine print on form 1040 and cut the government in.

★ ★ ★

Why not be honest and run a weekly nation-wide lottery? Cut the government in for a heavy "take" and make all other gamblings and lotteries a Federal offense such as counterfeiting.

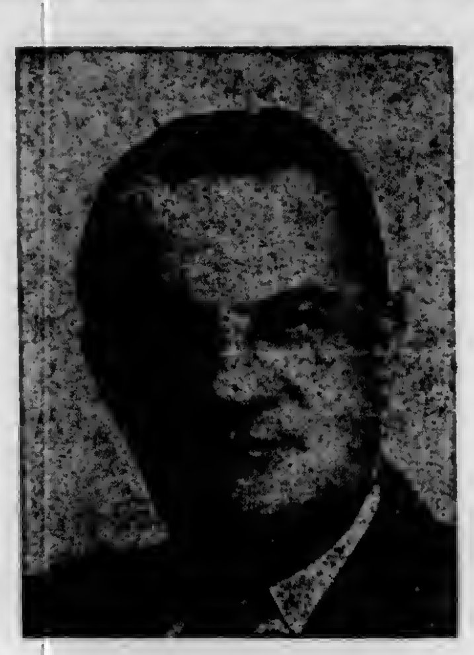
SURPLUS SEARCHLIGHTS

Surplus anti-aircraft searchlights of 800 million candlepower are on sale at the War Assets Corp., 30 Van Ness Avenue. The lights, of which 850 are for sale, are complete with power plants, control stations and cables and are adaptable for large construction jobs. Original cost was more than $15,000, but selling prices range between $500 and $1,500.

Wayne Oil Burner Company Announces Expansion Plans

A new corporation known as Wayne Home Equipment Company Inc., has been formed to succeed Wayne Oil Burner company. There is no change of ownership. The company's scope of operation has been greatly expanded. This announcement was made by B. G. Duer, vice president in charge of sales.

The company is a pioneer manufacturer of domestic oil burners and oil burning furnaces. According to Duer, designing and field tests have been completed and production started on "the WAYNE Line of Home Equipment" which includes turbine pumps and water systems for shallow wells, centrifugal jet pumps and water systems for deep wells, water heaters and water softeners, in addition to the new Model "O" domestic oil burner and a new line of oil and gas-fired automatic furnace units.



B. G. DUER

A strict Wholesaler-Dealer sales policy has been adopted and a number of wholesalers have received distributor franchises.

A comprehensive marketing program, known as "Wayne Wholesaler - Dealer Partnership Plan", has been set up around independent full-line wholesalers and dealers, and a thorough advertising and promotional program is provided to merchandise the complete line.

EAST BAY ARCHITECTS

The March meeting of the East Bay Association of Architects will be held tonight at 6:30 in Verikote's Lake Merritt dining room, 1520 Oak Street, Oakland.

Health Edict Bars Dumping Untreated Sewage In California Waters Next Year

No new permits will be issued by the State Board of Public Health for the disposal of raw sewage into California streams, bays and ocean waters and all outstanding permits for this practice will be revoked by the Board by January 1, 1947, Dr. Wilton L. Halverson, state director of public health, announces.

The ruling of the Board will require all communities which discharge sewage into bodies of water to pre-treat the sewage to render it inoffensive and not dangerous to the public health.

The State Bureau of Sanitary Engineering was instructed by the Board to investigate the status of all sewage disposal systems operating under State permits and to recommend suspension or modification where continuance is not warranted by the facts. State law requires that public disposal of domestic sewage and industrial wastes be by permit from the State Board of Public Health.

"The rapid population growth and expansion of industries have rendered many disposal systems obsolete and it is known that in some cases permit terms are no longer being met and the Health and Safety Code is being violated. During the War it was impossible to correct this situation but that crisis is now past," Dr. Halverson said.

Use which local governments will make of the $90,400,000 appropriation made by the special session of the Legislature in the Construction and Employment Act may be affected by the Board action. The Act provides that the State Department of Public Health declare as to the reasonable adequacy of sewage disposal before a city can secure funds for other projects.

Wage Board Kills March 15 Deadline

The San Francisco office of the Tenth Regional Stabilization Board today notified the Daily Pacific Builder that official Washington had made two last-minute changes in provisions of the procedure used in wages increases printed in yesterday's issue.

The changes are:

(1) Friday is not a strict deadline for putting wage increases into effect.

(2) Wage increases may be put into effect on March 16, or after, and price increases will be permitted if the local board is given written notice within 30 days after the change in wages has been inaugurated, and, that the employer believes a price adjustment may be necessary in the future although it may not be needed immediately.

Complete new regulations governing wage increases will be issued by Washington soon, Miss Rose Morry, assistant to the chairman, 1355 Market street, said today.

#

PRIVATE HOUSING UP

WASHINGTON, Mar. 8.—The Bureau of Labor Statistics said today that money spent for privately financed home building in February totaled $175,000,000, or more than eight times the amount for the same month is 1945.

BIDS OPENED
SANTA CLARA COUNTY, Calif.—Fredrickson & Watson Constr. Co., 873 81st Ave., Oakland, at $379,441.54 submitted low bid to G. T. McCoy, state highway engineer, Public W'ks Bldg., Sacramento for construction of a separation structure and approaches about .6 mile in length to be graded and surfaced with portland cement concrete and asphalt concrete on crusher run base on Bayshore Freeway at Santa Clara St. in the City of San Jose, Santa Clara County.

Plans and specifcations obtainable from the above office.

The work involves:
(1) 2600 cu. yds. remove concrete;
(2) clearing and grubbing;
(3) 45,000 cu. yds. roadway excavation;
(4) 2810 cu. yds. structural excavation;
(5) 2000 cu. yds. structural backfill;
(6) 24,500 tons imported borrow;
(7) 450,000 sta. yds. overhaul;
(8) 20,000 sq. yds. preparing class C subgrade;
(9) develop water supply and furnish water equipment;
(10) 960 M gallons apply water;
(11) 34 sta. finish roadway;
(12) 2100 tons crusher run base;
(13) 9 tons liquid asphalt SC-1 prime coat and penetration treatment;
(14) 2½ tons liquid asphalt SC-2 penetration treatment;
(15) 16 tons sand penetration treatment;
(16) 6½ tons asphaltic emulsion paint binder and seal coat;
(17) 2½ tons liquid asphalt SC-6 armor coat;
(18) 44 tons screenings armor coat;
(19) 1450 tons asphaltic concrete leveling course;
(20) 1200 tons asphaltic concrete type B surfacing;
(21) 350 lin ft. raised bars;
(22) 4700 cu. yds. class B portland cement concrete pavement;
(23) 2950 each tie bolt assemblies;
(24) 7100 cu. yds. class B portland cement concrete base slab;
(25) 950 cu. yds. class B portland cement concrete membrane base;
(26) 1038 cu. yds. class A portland cement concrete structures;
(27) 2518 lin. ft. furnish treated timber piles;
(28) 84 each drive piles;
(29) 8750 sq. yds. membrane waterproofing;
(30) 1050 cu. yds. class B portland cement concrete curbs, gutters and sidewalks;
(31) 21 each monuments;
(32) 8 each centerline monuments;
(33) 775 lin. ft. 21-in. reinforced concrete pipe;
(34) 1320 lin. ft. 12in-. CMP, 16-gage;
(35) 465 lin. ft. 18-in. CMP, 16-gage;
(36) 1650 lin. ft. 8-in. perforated metal pipe;
(37) 185 cu. yds. filter material;
(38) 265,400 lbs. furnish bar reinforcing steel;
(39) 265,400 lbs. place bar reinforcing steel;
(40) 13,600 lbs. miscellaneous iron and steel;
(41) 339 lin ft. steel railing;
(42) 4400 lin. ft. chain-link fence;
(43) 6000 sq. yds. roofing paper;
(44) 8 each adjust manholes to grade;
(45) 2 each adjust catchbasins to grade;
(46) 46 lin. ft. manholes;
(47) 1850 lin. ft. 2-in. galvanized steel pipe;
(48) 1750 lin. ft. 2½-in. galvanized steel pipe;
(49) 280 lin. ft. 3-in. galvanized steel pipe;
(50) electrical equipment;
(51) pumping equipment;
(52) miscellaneous items of work.

Total bids follow:
(A) Fredrickson & Watson Constr. Co., Oakland, $379,441.54.
(B) Macco Constr. Co., Clearwater, $394,395.60.
(C) N. M. Ball Sons and Lou Jones Constr. Co., Berkeley, $395,756.
(D) Dan Caputo and Edward Keeble, San Jose, $400,709.50.
(E) Earl W. Heple, San Jose, $415,600.20.

BIDS POSTPONED
BOULDER CANYON PROJECT.—Until April 8, 10 A. M. (postponed from March 19), bids will be received by the U. S. Bureau of Reclamation, Yuma, Ariz., under Spec. 1195 for the construction of earthwork, canal lining and structures, stations 5725+00 to 6106+06, Coachella Canal, All-American Canal System, Boulder Canyon Project, Arizona-California-Nevada. The work is situated in the vicinity of Indio, Calif.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1
(1) 396,500 cu. yds. excavation for canal;
(2) 220,000 cu. yds. excavation for drainage channels and dikes;
(3) 44,000 cu. yds. excavation for structures;
(4) 64,000 cu. yds. compacting embankments;
(5) trimming 201,400 sq. yds. foundations for concrete lining;
(6) 800 cu. yds. compacted subbase;
(7) 30,000 cu. yds. backfill about structures;
(8) 13,000 cu. yds. compacting backfill;
(9) 12,800 cu. yds. backfill at top of concrete lining;
(10) 19,000 cu. yds. riprap;
(11) constructing 330 cu. yds. reverse filter;
(12) 50 cu. yds. pit-run gravel blanket
(13) 4200 cu. yds. concrete in structures;
(14) 9800 cu. yds. concrete in unreinforced lining;
(15) 9800 cu. yds. concrete in reinforced lining;
(16) placing 610,000 lbs. reinforcement bars;
(17) placing 287,500 lbs. reinforcement fabric in canal lining;
(18) placing 1500 sq. ft. elastic filler material in joints;
(19) placing 820 lin. ft. rubber water stop in joints;
(20) erecting 112 M ft. b.m. timber in structures;
(21) laying 392 lin .ft. 12-in. diameter concrete pipe;
(22) laying 168 lin. ft. 18-in. diameter concrete pipe;
(23) laying 280 lin. ft. 24-in. diameter concrete pipe;
(24) laying 96 lin. ft. 36-in. diameter concrete pipe;
(25) laying 40 lin. ft 12-in. diameter asbestos-cement pipe;
(26) jacking 80 lin. ft. 84-in. diameter concrete pipe under railroad;
(27) installing 6800 lbs. screw-lift gates;
(28) installing 18,000 lbs. radial gates;
(29) installing 20,000 lbs. radial-gate hoists and operating and control mechanisms;
(30) installing 6500 lbs. metal water stops in joints;
(31) installing 3200 lbs. miscellaneous metal work;
(35) placing 65 cwt. bituminous material in float drums;
(33) installing 360 lin. ft. electric metal conduits;
(34) installing 50 lbs. ground wires.

Schedule No. 2
(1) 410,000 cu. yds. excavation for canal;
(2) 220,000 cu. yds. excavation for drainage channels and dikes;
(3) 44,000 cu. yds. excavation for structures;
(4) 64,000 cu. yds. compacting embankments;
(5) trimming and preparing 208,400 sq. yds. foundations for asphaltic-concrete lining;
(6) 800 cu. yds. compacted subbase;
(7) 30,000 cu. yds. backfill about structures;
(8) 13,000 cu. yds compacting backfill;
(9) 12,800 cu. yds. backfill at top of asphaltic-concrete lining;
(10) 19,000 cu. yds. riprap;
(11) constructing 330 cu. yds. reverse filter;
(12) 50 cu. yds. pit-run gravel blanket
(13) 4200 cu. yds. concrete in structures;
(14) 208,400 sq. yds. asphaltic-concrete course for canal lining;
(15) 2100 tons of asphalt for asphaltic-concrete;
(16) 170 tons asphalt for seal treatment;
(17) placing 610,000 lbs. reinforcement bars;
(18) placing 1130 sq. ft. elastic filler material in joints;
(19) placing 820 lin. ft. rubber water stop in joints;
(20) erecting 112 M ft. b.m. timber in structures;
(21) laying 392 lin. ft. 12-in. diameter concrete pipe;
(22) laying 168 lin. ft 18-in. diameter concrete pipe;
(23) laying 280 lin. ft. 24-in. diameter concrete pipe;
(24) laying 96 lin. ft. 36-in. diameter concrete pipe;
(25) laying 40 lin. ft. 12-in. diameter asbestos-cement pipe;
(26) jacking 80 lin. ft. 84-in. diameter concrete pipe under railroad;
(27) installing 6800 lbs. of screw-lift gates;
(28) installing 18,000 lbs. radial gates;
(29) installing 20,000 lbs. radial-gate hoists and operating and control mechanisms;
(30) installing 6500 lbs. metal water stops in joints;
(31) installing 3200 lbs. miscellaneous metal work;
(32) placing 65 cwt. bituminous material in float drum;
(33) installing 360 lin. ft. electrical metal conduits;
(34) installing 50 lbs. ground wires.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; E. A. Morits, regional director, Administration Bldg., Boulder City, Nev.; J. K. Rohrer, acting construction engineer, Yuma, Ariz., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the acting construction engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.50 per copy, not returnable.

BIDS POSTPONED
CENTRAL VALLEY PROJECT.—Until March 27, 10 A. M. (postponed from March 15) bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, Chief Engineer, Friant, Calif., under Spec. 1178 for construction of Friant-Kern Canal stilling basin, Cottonwood Creek Bridge, Friant Dam landscape area improvements, Friant Division, Central Valley Project. Work is located about 1.5 miles northeast of Friant.

Work involves:
(1) 400 c.y. common excavation for structures;
(2) 2,600 c.y. rock do;
(3) 190 c.y. excavation, concrete;
(4) 2,200 c.y. all classes excav. for pipe trenches;
(5) 320 s.y. chipping and roughening concrete surfaces;
(6) 13,000 c.y. backfil;
(7) 13,000 c.y. compacting backfill;
(8) 800 c.y. embankment;
(9) 400 c.y. riprap;
(10) constructing 860 l.f. 12-in. diam. split-sewer pipe drains with cemented joints;
(11) constructing 900 l.f. 12-inch do with uncemented joints;
(12) constructing 80 l.f. 24-in. diam. sewer-pipe drains with cemented joints;
(13) drilling 1,600 l.f. holes for anchor bars and grouting bars in place
(14) 130 c.y. concrete in outlet valve structure;
(15) 3,000 c.y. concrete in floor and wall footings of stilling basin;
(16) 2,100 c.y. concrete in walls of stilling basin;
(17) 180 c.y. concrete in bridge struc.
(18) 20 c.y. concrete in septic tanks;
(19) 90 c.y. concrete in water tanks;
(20) 260 c.y. concrete in rest-houses;
(21) constructing three rest houses, except concrete;
(22) 54,000 s.f. vacuum concrete process for floor and inside surfaces of walls of stilling basin and transition;
(23) placing 580,000 lbs. reinf. bars;
(24) 1,000 s.y. grouted paving gutters
(25) 90 l.f. gravel backfilled gutters
(26) installing 5,000 lbs. misc. metal-
(29) placing 1,850 l.f. rubber water work;
(27) constructing 3 M ft. b.m. timber railings;
(28) placing 250 s.f. elastic joint filler stop;
(30) installing 4,500 lbs. of standard metal pipe, fittings and valves;
(31) laying 150,000 lbs. cast iron pipe
(32) 5 c.y. rubble masonry;
(33) laying 100 l.f. clay sewer pipe with poured joints;
(34) laying 2,400 l.f. drain tile embedded in gravel;
(35) placing 350 c.y. of water-bound macadam base course;
(36) 180 c.y. crushed rock for wearing course, in place;
(37) furnish, haul and spread 5,000 gals. road oil;
(38) mix, compact and finish 2,100 s.y. oil-treated wearing course;
(39) installing 1,100 lbs. pumps;
(40) installing 150 l.f. embedded electrical conduits;
(41) installing 5,000 l.f. of armored parkway cable.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Building, 7th and K Streets, Sacramento 14; R. K. Durant, Acting Construction Engineer, Friant, Cal., and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for specifications; to others, $2.50, not returnable.

BIDS POSTPONED
CENTRAL VALLEY PROJECT.—Until April 8, 10 A. M. (tentative date), postponed from March 27, bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Antioch, Calif., under Spec. 1183 for the construction of Delta-Mendota Canal, stations 686 to 1365, and Westley wasteway, Delta Division, Central Valley Project, California. The work is situated in the vicinity of Patterson, Calif.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1
Station 686 to Station 1365
(1) 2,800,000 cu. yds. excavation for canal, unclassified;
(2) 100,000 sta. cu. yds. overhaul;
(3) 350,000 cu. yds. compacting embankments;
(4) 40,000 cu. yds. excavation for drainage channels;
(5) 45,000 cu. yds. excavation for structures;
(6) 27,000 cu. yds. backfill;
(7) 24,000 cu. yds. compacting backfill;
(8) trimming 844,000 sq. yds. foundation for concrete lining;
(9) 11,100 cu. yds. concrete in structures;
(10) 47,000 cu. yds. concrete in unreinforced canal lining;
(11) 47,000 cu. yds. concrete in reinforced canal lining;
(12) placing 1,760,000 lbs. reinforcement in structures;
(13) placing 3,000,000 lbs. reinforcement in canal lining;
(14) 1500 sq. yds. dry-rock paving;
(15) placing 4600 sq. ft. elastic joint filler;
(16) placing 1500 lin. ft. rubber water stops;
(17) installing 255,000 lbs. gates and hoist;
(18) installing 58,000 lbs. miscellaneous metal work;
(19) installing 250 lin. ft. electrical metal conduit;
(20) installing 200 lbs. electrical conductors;
(21) constructing 40 cattle guards;
(22) placing 900 lin. ft. 15-in. precast pipe;
(23) placing 100 lin. ft. 18-in. precast pipe;
(24) placing 50 lin. ft. 24-in. precast pipe;
(25) erecting 510 M ft. b.m. timber in bridges.

Schedule No. 2
Westley Wasteway
(1) 193,000 cu. yds. excavation for wasteway channel;
(2) 33,000 cu. yds. excavation for structures;
(3) 100,000 cu. yds. of backfill for wasteway channel;
(4) 13,000 cu. yds. backfill for structures;
(5) 20,000 cu. yds. compacting embankment along wasteway;
(6) 4000 cu. yds. compacting backfill;
(7) trimming 105,000 sq. yds. foundation for lining;
(8) 3100 cu. yds. concrete in structures;
(9) 21,000 cu. yds. concrete in wasteway lining and sidewalls;
(10) placing 2,400,000 lbs. reinforcement steel;
(11) installing 130,000 lbs. of structural steel;
(12) installing 11,500 lbs. miscellaneous metal;
(13) installing 700 sq. ft. elastic joint filler;
(14) erecting 65 M ft. b.m. timber in bridges;
(15) placing 100 lin. ft. 18-in. precast pipe;
(16) placing 20 lin. ft. 24-in. precast pipe.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; R. L. Boke, regional director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; O. G. Boden, construction engineer, Antioch, Calif., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.50 per copy, not returnable.

Fifty-sixth Year—Vol. 56— No. 52 SAN FRANCISCO, FRIDAY, MARCH 15, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

San Rafael: The topic of "Nine War Memorials or One", will be discussed soon by veterans groups, who have approved nine separate sites and memorials, and other groups, who favor one county memorial. $630,000 has been requested by the veterans for the construction.

oOo

Pittsburg: Norman D. Sundborg manager of the Contra Costa county fair, disclosed today that plans for additional buildings have been tentatively approved and will be drawn this month.

oOo

Sacramento: Toro Mountain fire watch station and four other vital posts will be built in time to serve during this year's fire season, Wm. F. Koch, forestry division supervisor of communications, has announced. By the 1947 fire season all 21 of the state's proposed stations will be completed, he said.

oOo

Mill Valley: A survey of street improvements urgently needed by this community is in progress, authorized by the city council. City Manager R. E. Baumberger has authorized City Engineer Al Siemer to determine what repairs should be done and estimated costs.

oOo

Los Angeles: A $45,000,000 modernization program is underway here by the hotel industry, Oren W. Nicholls of the Southern California Hotel association, and general manager of the Hayward hotel, said recently.

oOo

Reno: The county road commission has completed a tour of inspection of roads needing repair and plans are under consideration for construction work necessary to put the highways in top condition.

oOo

Greenbrae: Outline of a proposed county airport here has been presented to the board of supervisors by Col. Raymond Morrision, chairman of the airport committee of the Citizens Postwar Planning committee. Property with an assessed valuation of $79,244 is involved.

oOo

Sacramento: Inyo county will receive approximately $285,000 in state funds for school buildings under provisions of Senate Bill 60, recently passed and awaiting signature of Gov. Warren, Sen. Charles Brown, co-author of the bill, has announced.

FOR SURPLUS SALES GET ON MAILING LIST

The War Assets Corporation (subsidiary of Reconstruction Finance Corporation) issues sales lists of surplus goods. You may have your name placed on the mailing list by making direct request to the War Assets Corporation (appropriate Division) and stating commodities in which interested. (See list below).

Consumer Goods Division — 30 Van Ness Ave., San Francisco:
- Machinery and Constr. Equipment;
- Motor Vehicles and Auto Parts: Accessories and Equipment;
- Hardware;
- Plumbing, Heating, Air Conditioning and Electrical.

Producer Goods Division — 256 Montgomery St., San Francisco.
- Paints, Varnishes and Lacquers;
- Petroleum Products, i.e., gasoline, lubricating oil, greases road oils and asphalts;
- Lumber;
- Pipe and Pipe Fittings;
- Structural Iron and Steel Shapes
- Wood Working and Metal Working Machines;
- Electrical Equipment, i.e., starters, switches, transformers, motors and generator sets.

A sales display room has been established at 460 Market Street, San Francisco.

OFFER SURPLUS BUILDING MATERIALS

In a special offering list now in the mail, the San Francisco office of the War Assets Corporation lists approximately $1,500,000 of miscellaneous building and maintenance items for sale from surplus inventories.

Included in the list are building paper and wallboards, cement, asphalt, fire bricks, and large inventories of well-known makes of insulation material.

In addition, this list also offers poles and piling and electrical wood specialty items, including oak brackets and cross arms.

Arrangements to inspect and purchase may be made through the San Francisco War Assets Corporation's sales office at 256 Montgomery street, and those not having received this miscellaneous list may obtain a copy by requesting List No. M-50.

GROOVER AND I

LIVERMORE

A reader in Bakersfield may wonder why I write a column about Livermore. The Livermore reader will understand. This proves our thinking is geographic.

★ ★ ★

This column was inspired by an information folder issued by the Livermore Chamber of Commerce. Seldom have I seen so much pertinent information on less than a square foot of paper.

★ ★ ★

Livermore was founded in 1835 by Robert Livermore, "an English sailor, who left the sea to establish his home here"—another way of saying the guy jumped ship. A healthy community proven by the fact that Livermore lived almost to the age of 80 years.

★ ★ ★

(This was seven years before MacMillian invited the bicycle—or Robert might have gone further.)

★ ★ ★

The city is one and a quarter miles square. The boundary lines run due north and south, east and west. A square city, setting true with the compass is unusual and should delight the heart of an engineer.

★ ★ ★

However, the simplicity isn't carried out—the streets are on a bias. This doesn't make sense until you note that the streets are laid out square with the old Central Pacific (now the S. P.) and the Western Pacific tracks.

★ ★ ★

In the founding days of the west railroads were more important than compass points and besides at that time, the only two important directions were East and West.

★ ★ ★

San Francisco is 44 sq. miles in area and no place to park an automobile. Livermore is about the right size—you can park at the county line and be practically downtown.

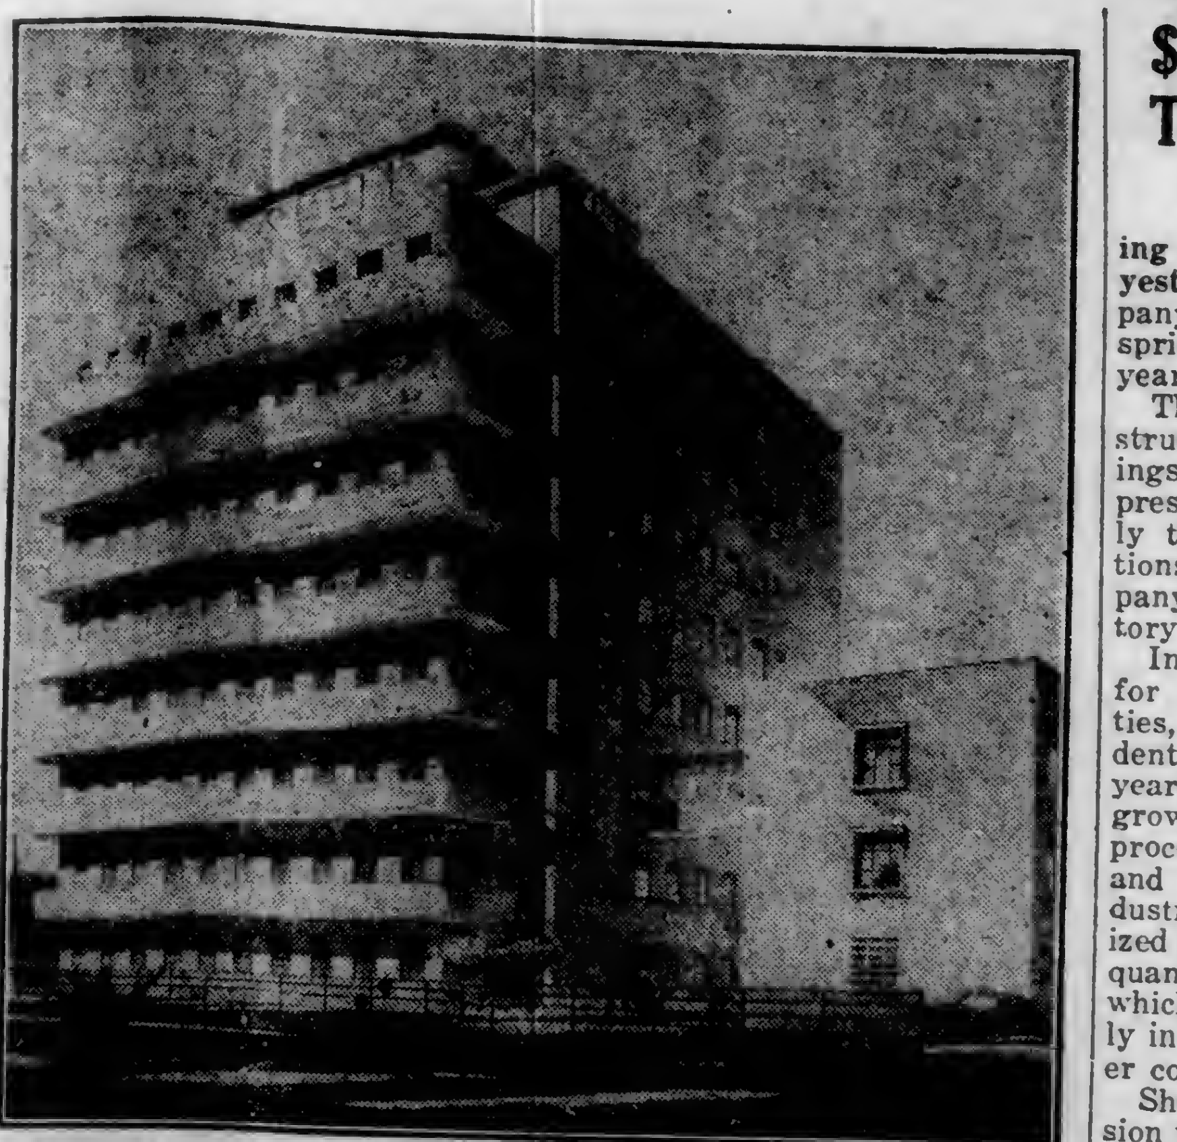
BUSINESS CLASS AT U. OF C. EXTENSION

Among the classes beginning next week at the San Francisco center, University of California Extension, 540 Powell street, are three in the business administration department. "Office Management", is scheduled for Monday evening; "Legal Aspects of Credit" meets Tuesday night; and "Real Estate Appraisal and Evaluation" starts Wednesday night. All classes meet from 7 to 9 p. m.

Shell Starts Huge Expansion



All eight floors of this proposed new building will be used to house the staff of scientists and the research laboratories of Shell Development Company in Emeryville, Calif. It is one of three major structures included in a $3,500,000 expansion program now being undertaken by Shell's research organization, largest in the West.

$3,500,000 Construction Program Begins To Expand Emeryville Research Facilities

Expansion of Shell's research laboratories at Emeryville, involving a capital expenditure of more than $3,500,000 was announced yesterday by A. E. Lacombe' president of Shell Development Company. Construction will begin this spring and continue over a two-year period.

The undertaking includes construction of three major new buildings and extensive remodeling of present facilities. It follows closely the lifting of building restrictions which did not allow the company to add much-needed laboratory space during the war.

In explaining the critical need for expansion of research facilities, the Shell development president pointed out that in recent years the petroleum industry has grown from a relatively simple processing industry into a complex and diversified manufacturing industry producing highly specialized petroleum products and large quantities of chemical materials which were formerly available only in limited volume at much higher cost.

Shell leaders view their expansion undertaking as a long-term investment in the continued technical progress of American industry.

"Our building program is another step to insure that the Shell organization will always be a leader in the quality of products sold, in the development of new products, and in the improvement of manufacturing methods," Lacomble' said.

To aid and expand this type of scientific probing, Shell Development's management asked the architectural firm of Allison and Rible, Los Angeles, to submit plans for complete modernization of present facilities at Emeryville. Their unitized design calls for construction of three major new buildings and considerable remodeling and rearranging of present facilities.

Architectural plans now approved show the largest of the new buildings as an eight-story structure with basement, designed primarily to house the research laboratories. It will be of steel and concrete construction, built in the form of a square with ventilation ducts and elevators in the center and laboratory space around the perimeter. Exterior balconies will be a feature of the architecture.

The second major building will be in reality a five-story addition to the present administration building. Its completion will necessitate modernizing the existing facilities to harmonize with the new construction and will double the space now available for office and staff workers.

The third structure is designed for heavy equipment. It will reach four stories with a basement and will house the large-scale laboratory facilities and service shops. As its long dimension will face toward San Francisco Bay on the west, architectural treatment of the building features a windowless wall to eliminate sun glare.

In addition to the new buildings Shell Development's expansion program calls for a substantial expenditure to remodel present facilities, construct small experimental plant buildings and provide new furnishings and equipment.

Five high-speed automatic elevators will provide passenger transportation in what will be Emeryville's tallest buildings. Two additional elevators will handle freight.

All buildings will be equipped with fluorescent lighting, central heating and ventilation. A separate drinking water system will pipe water to individual coolers.

Specially constructed laboratory furnishings will be installed and the interior will be decorated in a color harmony chosen for eye comfort and attractive appearance. Extensive use of sound-proofing will reduce noises commonly associated with an industrial section.

The two main buildings will be connected at the third-floor level by enclosed bridges, and a covered walk-way will permit easy movement throughout the plant area.

#

LUMBERMEN'S LUNCHEON

The next luncheon and get-together of the San Francisco Lumbermen's club will be at noon Tuesday in the Concert Room of the Palace hotel.

Clinton W. Stein, special agent in charge of the local FBI office, will speak on the activities of the FBI.

State Labor Code Revisions Published

Changes in the labor laws made at the 1945 session of the Legislature have been included in the 1945 edition of the Labor Code which has just been published, announced Paul Scharrenberg, Director of the California Department of Industrial Relations, today.

"We find that many violations of the labor law are not due to wilfulness but to lack of acquaintance with the statutes," said Mr. Scharrenberg, who urged all employers, labor unions and interested parties to secure copies of the new Labor Code.

The current edition of the Labor Code is of particular importance because it incorporates the far-reaching changes brought about as a result of the recent reorganization of the Department of Industrial Relations.

Copies may be secured at the office of the Bureau of Printing, Documents Division, Room 214, State Capitol, Sacramento, at 77 cents each.

Architects' Luncheons Slated March 20, 29

President Andrew T. Hass of the Northern California Chapter of the American Institute of Architects, announced today that architects luncheons will be held on March 20 and 29 in the English Room in the Palace Hotel.

Architect Paul Williams, Los Angeles, will be the guest and speaker at the luncheon to be held at noon Wednesday, and Architect Pietro Belluschi, Portland, Ore., will be the guest and speaker at the luncheon to be held Friday noon, March 29. All architects are invited to attend these luncheons. Reservations are to be made with Architect Theodore Bernardi, EXbrook 8918.

Mr. Williams and Mr. Belluschi are coming to San Francisco as speakers on the "House I Want" program, which is being given under the auspices of the Womens' Architectural League, the San Francisco Museum of Art, and the Northern California Chapter of the American Institute of Architects.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

Clearing the Rector Creek Reservoir Site in Napa County, California

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION of WATER RESOURCES

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Engineer, Room 401, Public Works Building, Sacramento, California, until 1:30 o'clock p.m. on **Wednesday March 27, 1946**, at which time they will be publicly opened and read, in the same room of said building, for performing work in accordance with the specifications therefor, to which special reference is made as follows:

CLEARING THE RECTOR CREEK RESERVOIR SITE IN NAPA COUNTY, CALIFORNIA.

State Engineer's Estimate

Item: 76.5 acres clearing the Rector Creek Site in Sections 19 and 20, T. 7 N., R. 4 W., M. D. B. & M.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Choker setter	$1.10
Hand timber faller	1.25
Head choker setter	1.25
Laborer	1.00
Machine (power-saw) faller	1.35
Powderman	1.375
Tractor operator	1.70
Truck driver (8 cubic yards water level capacity or more)	1.50
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.25
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.10
Truck driver (less than 4 cubic yards water level capacity)	1.00
Any classification omitted herein not less than	1.00

Overtime — one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen and guards)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modifications thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is particularly directed to the provisions of Section 7 of the Standard Specifications published by the Department of Public Works, Division of Highways, in April, 1945, regarding the laws to be observed, and Section 8, article (b), of the Standard Specifications regarding assignment of contract, and to Sections 4100 to 4108, inclusive, of the Government Code, State of California, regarding subcontracting and assignment of subcontracts.

Forms of proposal, bonds, contracts and specifications may be seen and obtained at the office of the State Engineer, Public Works Building, Sacramento, California, and they may be seen at the office of the State Engineer, 803 California State Building, Los Angeles, and at the offices of the Associated General Contractors in San Francisco and Los Angeles.

A representative from the State Engineer's office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character, and quantity of work to be done with a representative of the State Engineer.

No bid will be considered unless it is made on a blank form furnished by the State Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **April 3, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Shasta County, between 4.5 miles east of Ingot and Montgomery Creek (II-Sha-28-B), about nine and seven-tenths (9.7) miles in length to be surfaced with plant-mixed surfacing.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Flagman	1.00
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shove lor other excavating equipment, shovel type controls (over one cubic yard)	2.00
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime — one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen) — one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Frnacisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. See said Proposal Requirements and Conditions.)

Highway Improvements — Monterey County at Priest Valley Maintenance Station

STATE OF CALIFORNIA
DTPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 50 Higuera Street, San Luis Obispo, California, until 10:00 A. M. o'clock, on **March 21, 1946**, at which time and place they will be publicly opened and read, for performing work as follows:

Monterey County, at the Priest Valley Maintenance Station, about 23 miles east of San Lucas (V-Mon-10-C) a water well to be drilled and cased.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

The rates of wages, including overtime, holiday or Sunday rates, herein specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Laborer	$1.00
Drilling machinery operator	1.70
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates. Sundays and holidays (except watchmen, guards and flagman) — one and one-half (1½) times the above rates.

Intention No. 1-26-46F—Sanitary Board of the San Pablo Sanitary District of California

NOTICE INVITING SEALED PROPOSALS FOR SEWER IMPROVEMENTS UNDER IMPROVEMENT ACT OF 1911 AND UNDER IMPROVEMENT BOND ACT OF 1915

Pursuant to statute and to resolution by the Sanitary Board of the San Pablo Sanitary District of California, ordering the work and directing this notice, said Sanitary Board hereby invites sealed proposals or bids for doing the work and improvement described in Resolution of Intention No. 1-26-46F of said Sanitary Board of the San Pablo Sanitary District of California adopted January 26, 1946. Said Resolution of Intention is hereby referred to for a description of said work and improvement, the grades to which it is to be done, a description of the District to be assessed to pay the costs and expenses thereof, the bonds to be issued upon the security of the unpaid assessments and for all other particulars contained in said Resolution of Intention. Reference is hereby further made to the plans and specifications for said work and improvements on file in the office of the Secretary of said Sanitary Board, in accordance with which said work and improvement shall be done and made.

All proposals or bids shall be accompanied by a check payable to the Sanitary Board of said San Pablo Sanitary District and certified by a responsible bank for an amount which shall be not less than ten percent (10%) of the aggregate amount of proposal, or by a bond for said amount and so payable, signed by the bidder and two sureties, who shall justify, before an officer competent to administer an oath, in double the said amount, over and above all statutory exemptions.

Notice is hereby given that in accordance with law, said San Pablo Sanitary District, California, has determined and established the general prevailing rate of per diem wages for each craft or type of workman needed to execute and perform said work and improvement, a schedule thereof being hereto appended and designated ".Schedule of Per Diem Wage Rates".

SCHEDULE OF PER DIEM WAGE RATES

Classification	Per Diem Wage
Pipe Layer (Ironstone Sewer Only)	$13.60
Plumbers	13.60
Tractor Operator	13.60
Power Grader Operator	14.80
Drag Line or Crane Operator (Under 1 cubic yard)	16.00
Drag Line or Crane Operator (Over 1 cubic yard)	18.00
Trenching Machine Operator	14.80
Power Roller Operator	13.20
Power Shovel Operator (Under 1 cubic yard)	16.00
Power Shovel Operator (Over 1 cubic yard)	18.00
Oilers and Firemen	11.20
General Laborers	10.00
Pneumatic Tool Operators	11.00
Powder Men	12.00
Bricklayer (plus transportation)	16.40
Hod Carrier (plus transportation)	12.20
Guards, Flagmen and Watchmen	10.00
Labor Foremen	12.00
Concrete Mixer Operator	12.00
Cement Finishers	14.00
Carpenters	14.00
Pilemen-Bridgemen	14.88
Truck Driver:	
(Dump—under 4 cubic yards)	9.20
(Dump—4 cu. yd., under 6 cubic yards)	10.10
(Dump—6 cu. yds., under 8 cubic yards)	11.00
(Dump—8 cubic yards)	13.80
(Pickup under 1000 lbs.)	8.50
(Flat rack over 1000 lbs., less than 4500 lbs.)	9.20
(Flat rack over 4500 lbs.)	9.80
(Transit Mix Concrete under 2 cubic yards)	9.28
(Transit Mix Concrete, 2 cu. yds. and under 3 cu. yds.)	9.88
(Transit Mix Concrete, 3 cu. yds. and under 5 cu. yds.)	10.58
(Winch Truck)	10.38
(Road Oil)	9.78
(Water Truck)	9.78

The minimum wage paid to all skilled laborers for which rates are not shown above shall be not less than $1.50 per hour.

The minimum wage paid to all unskilled laborers for which rates are not shown above shall be not less than $1.25 per hour.

Overtime rates, unles otherwise specified, at rate of double time.

Teamsters, all overtime at rate of time and one-half.

Shift work, two or more consecutive shifts, 7 hours work at eight hours pay. Eight hours shall constitute a day's work unless otherwise noted. The contractor shall, in the performance of the work and improvements, conform to the Labor Code of the State of California and other laws of the State of California, applicable thereto, the exception only of such variations as may be required under the special statutes pursuant to which proceedings hereunder are taken and which have not been superseded by the provisions of the Labor Code. Preference to labor shall be given only in the manner provided by law. Veterans and resident local labor shall be given preference by the contractor whenever possible, if skill and working ability permit without increasing the ultimate cost of the work and improvements to the District and its officer.

Reference is hereby made for further particulars to the resolution of the Sanitary Board of the San Pablo Sanitary District of California, adopted March 1, 1946, establishing such wage rates and the attention of all bidders is directed to said resolution on file in the office of the Secretary of the Sanitary Board of the San Pablo Sanitary District.

Said proposals or bids shall be delivered to the Secretary of said San Pablo Sanitary District on or before 7 o'clock P. M., on Monday, **the 25th day of March, 1946**, on which day and hour all proposals or bids received will be publicly opened by said Sanitary Board of the San Pablo Sanitary District, California.

Dated: March 1, 1946.
FRITZ CARLFIELD,
Secretary of the Sanitary Board of San Pablo Sanitary District, Contra Costa County, California

Highway Imp.—Merced County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock P. M., on **March 27, 1946** at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Merced County, between Black Rascal Canal and Buhach Station (X-Mer-4-C), about three and eight-tenths (3.8) miles in length to be graded and paved with Portland cement concrete and four (4) bridges to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.325
Cement finisher	1.75
Concrete mixer operator (one cu. yd. capacity or less)	1.45
Concrete mixer operator (over 1 c.y yd. capacity and paving type)	1.70
Mechanical tamper and finisher operator (concrete or asphalt)	1.70
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including 1 cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over 1 cubic yard)	2.00
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Headerboard man	1.375
Jackhammer operator	1.25
Oil distributor bootman	1.125
Oiler power shovels or cranes	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime: one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagman): one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime — one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President of any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements—Lake Co.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 27, 1946**, at which time they will be publicly opened and read, in the Assembly Room of said building, for construction in accordance with the specifications therefor, to which special reference is made, of a portion of State highway as follows:

Lake County, across Kelsey Creek at Kelseyville (I-Lak-89-D), a structural steel girder bridge and approaches to be constructed.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.125
Cement finisher	1.75
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity and paving type)	1.70
Derrick operator	2.00
Motor grader operator	1.85
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Painter (structural steel)	1.625
Pile driver hoistman or operator	1.85
Pile driver man	1.61
Reinforcing steel worker	1.50
Roller operator	1.65
Structural steel worker	1.75
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Jackhammer operator	1.25
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

For Better Building

OFFICE AND WAREHOUSE

Ground was broken in December for the construction of a Frigidaire District Office and warehouse in North Kansas City. The building will provide approximately 45,000 sq. ft. of office, storage, repair and sales space, will cost approximately $200,000. Construction is expected to take from 90 to 120 days.

RESEARCH LABORATORIES

The Standard Oil Co. of Indiana has announced plans for new research laboratories in Hammond, Ind., and work has been started on some of the buildings in the group. The main administration building, general laboratories, three pilot-plant buildings and a cafeteria are scheduled for immediate construction; an engine laboratory, a greenhouse for insecticide work, additional pilot-plant buildings and other research facilities will follow later.

Principal buildings in the group will be of light-gray brick, will be air conditioned througout. The basic unit will be a two-man laboratory, with removable partitions to permit easy alteration to one-man laboratories or larger areas as desired. Holabird & Root, Chicago, are the architects.

FLOOR SPACE TREBLED

Immediate trebling of floor space in its Kokomo, Ind., factory has been announced by the Pittsburgh Plate Glass Co. The plant fabricates Pittco storefront metal.

The expansion, expected to cost approximately $800,000, will increase floor space from 30,000 to 90,000 sq. ft., and will add facilities for the production of a new line of rolled shapes from aluminum sheet or strip. The Mahony-Troast Construction Co., Passaic, N. J., is engineer and building contractor.

PLANT FOR WASHERS

Immediate construction of a new Los Angeles plant has been announced by the Hurley Machine Division, Electric Household Utilities Corp., for the manufacture of Thor Automagic Washers.

Representing a possible $1,000,000 investment when fully developed, the new plant will be built on a 10-acre site in El Monte, a suburb of Los Angeles, will have a 600-ft. frontage and cover 170,000 sq. ft.

Men Behind The Jobs - - Frank A. Banks, Engineer and Administrator

If Frank A. Banks hadn't become a Government engineer he would have been a good teammate for "Cannonball" Baker or "Barney" Oldfield, because the man who will direct the destinies of the Bureau of Reclamation's largest single irrigation system likes to travel fast, whether on land or water.

Fortunately for the Columbia Basin Project and for the multitude of 140,000,000 Americans who are shareholders in this great enterprise, Banks' love for speed has been applied mostly to the construction field—but he undoubtedly could have been a strong contender for land and water speed records. As it was, though, the engineer's aptitude for speedy action made it possible for Grand Coulee Dam to take its position early in the war as a leading producer of hydroelectric energy—and to make possible the operation of the atomic bomb plant at Hanford. Now the Government has called upon him to supervise construction of the irrigation phases of the Columbia Basin Project, a job much bigger than the building of Grand Coulee Dam, and Banks is extremely proud, but not boastful, of that distinction.

Banks' desire to move just a little faster than the average person was evidenced early in his career. He was graduated from the University of Maine in 1906 with a bachelor of science degree in Civil Engineering, joined the Bureau of Reclamation the same year and was assigned to the Lower Yellowstone Project in Montana.

After three years at Lower Yellowstone he became Division Designing Engineer at Boise, Idaho, where he prepared preliminary plans for the Arrowrock dam, for years the highest in the world. From 1913 to 1917 he was in charge of the Jackson Lake Dam in Wyoming, which created a reservoir then fourth largest in the United States and fifth largest in the world. During the following three years he was construction engineer on the Minidoka Project in Idaho, and from 1920 to 1927 he held similar responsibilities in the American Falls Project of Idaho.

From 1927 to 1933, he headed construction forces building Owyhee Dam of the Owyhee Project (Ore.-Ida.) which, until the completion of Boulder Dam, was the highest dam in the world.

Then, in 1933, the engineer came to the Columbia Basin Project and took over the reins in building the biggest dam ever constructed by man. He has held the job of construction engineer, and then supervising engineer of the Columbia Basin Project continuously since then and in addition he was drafted as Acting Administrator for the Bonneville Power Administration for four months in 1939. In October, 1943, the Bureau of Reclamation honored him further by naming him Regional Director of Region I. This heavy responsibility, however, frequently drew him away from his beloved Coulee Dam, and on Nov. 21 of last year he relinquished his duties as regional director so that he could devote full time to the Columbia Basin Project.

Highly respected throughout the engineering world, the supervising engineer for the Columbia Basin Project has not let honorary degrees and other plaudits change his inherently friendly nature.

FRANK A. BANKS

"The Boss", or "The Chief", as he is known by his associates, is wholly free of conceit and doesn't care to be addressed as "Dr Banks", although he holds honorary degrees from the University of Maine and Washington State College.

Despite that he holds the highest position in the Pacific Northwest's largest building job and his responsibilities surpass those of the president of a multi-million-dollar corporation, Banks hasn't surounded himself with swanky office furniture or other luxuries befitting his title. His desk is the same as anyone's, his chair is not leather upholstered, but is the familiar oak found in any office on the project.

Probably the greatest tribute ever paid the supervising engineer came from the Sacramento "Bee" on Aug. 14, 1943, which editoralized:

"Banks is the engineer who was in charge of building the Grand Coulee Dam, the greatest structure ever built by the hand of man. He is now its administrator.

"For the same job, a private utility would pay Mr. Banks probably $100,000 a year. Mr. Banks would get more money, but he probably would not have such tremendous things to do." And Frank A. Banks likes to do tremendous things.

#

U. S. STEEL TELLS OF WAR CONVERSION

The war role of the steel industry told by its largest producer, the United States Steel Corp., is graphically portrayed in a two-color 164-page book titled, "Steel in the War".

The book assembles for the first time facts and figures which measure the importance to national security of this basic metal. Generously illustrated with action photographs taken by the Army and Navy, the book carries the story of home-front production which backed up the assault on beaches and cities on European and Asiatic fighting fronts.

The story of the conversion of America's great basic industry to war production and its expansion to meet the greatest demand for steel ever known is impressive. Copies of it have been circulated to thousands of libraries where they may be used for reference purposes. The book was written and compiled by Douglas A. Fisher of the Office of Assistant to Chariman, United States Steel Corporation, New York City 6.

Cost Accountants In Quiz Program Duel

San Francisco cost accountants lost a battle of wits Saturday night in a radio quiz duel program heard over station KFRC in San Francisco.

The program, "Quiz of Two Cities", is a weekly feature and carried the battle between Los Angeles and San Francisco chapters of the National Association of Cost Accountants.

Local accountants participating were: Douglass M. Barrows, El Dorado Oil Works; Harry K. Roberts, Crown Zellerbach Corp.; Roger Rush, Sunset-McKee Standard Register Sales Co.; and Moritz E. Pape, Consolidated Chemical Industries, Inc.

A return engagement is anticipated in the near future when local "whiz kids of the figures" will attempt to recoup their losses.

#

RUBBER BASE PAINT AVAILABLE AGAIN

Before hostilities, when rubber was plentiful, the entire painting industry was becoming acquainted with a new type paint made with a rubber base. A paint that was tasteless, would dry in less than one hour, and would resist chemicals and food products the same as a rubber glove would.

This product, sold under the trade name of RUBBER-COAT, is again on the market and has a multitude of uses in renovating and modernizing homes and other buildings.

Unused space in existing homes can be reclaimed and useable space can be added in new small homes by making basements dry and colorful. This can be accomplished economically and efficiently without elaborate remodeling or installations by waterproofing and decorating basements with RUBBER-COAT. Unless there is actual water pressure, RUBBER-COAT will prevent seepage through walls and floors. It is applied like ordinary paint to the interior surfaces of basements, walls and floors. It is tough, wear resistant and colorful and will not be affected by the lime and alkalinity of concrete or by repeated washings with strong soaps. It is resistant to spillage of gasoline, oil or alcohol.

For information as to retail and wholesale outlets, write to the Wilbur & Williams Company, Park Square Bldg., Boston 16, Mass.

REQUIRED READING FOR BUILDERS

HOUSES

The Book of Houses Planned for Beauty and Utility at Low Cost. 150 photographs, 100 plans for $5,000 to $10,000 homes. By John P. Dean and Simon Breines. New York 16, N. Y. (419 Fourth Ave.), Crown Publishers, 1946, 8½ by 11 in., 144 pp., illus. $2.

Anyone who has read Dr. Dean's recent book, "Home Ownership: Is It Sound?" (see AR, July, 1945, p. 128), will find the first few chapters of the current volume thoroughly familiar. Dr. Dean still warns constantly and convincingly of the dangers inherent in buying or building a house. It is a little curious, therefore, to find him teaming up with an architect in the production of a book on house planning.

The team is a happy one, however. The sensible, albeit discouraging, warnings of Dr. Dean go very nicely with the architectural understanding and logic of Simon Breines. In their preface these authors say that they are addressing their ideas to prospective purchasers of homes in the $5,000 to $10,000 class. They explain that most of the houses they have included are traditional in style because (1) most of the homes to be found for sale are traditional, (2) most people prefer such homes, (3) there is no point in including primarily modern houses when they are so hard to find, and (4) the good modern design is slanted at the $20,000 to $30,000 pocketbook. All very sensible. The houses themselves are sensible, too—well planned, most of them, and varying widely in both size and style. They are not presented as a portfolio from which the would - be home owner can select the house of his dreams, but as a handbook from which he may glean an idea here and another there to be incorporated into his ideal home.

This is a book that the prospective home owner will really find useful. The text covers every imaginable subject — from check lists and risks, costs and purchase plans, legal pitfalls and home safety, to "purchasing a neighborhood", making the most of the lot, the plan, remodeling, the basic house, prefabs, and weekend cabins. Photographs and plans are liberal in number, adequate in size.

It is unfortunate that more care was not taken with the appearance of the book itself. The photos are all a wishy-washy gray, many of the plans are blurred.

HOME BUILDING

Make Your Home Your Hobby. By Walter J. Coppock. Yellow Springs, O, The Antioch Press. 1945. 6 by 9 in., 92 pp., illus. $1.50

Contrary to the implications of its title, this is not a handbook of ideas on interior decorating, but another of the rabbit-like home-building-manual family. The hobby part of the title refers to the fact that the book is intended primarily for the person who wishes to do his building with his own hands.

Because of its itended audience, the book contains a good bit of practical information, much of it perforce rather elementary. Not enough attention is paid, however, to the problems of design. What little mention of design is made is usually on the negative side—such and such is "not good design."

Mr. Coppock, an engineer, is much more concerned with materials and workmanship than he is with plan. A good part of his book is given over to the technical: walls, stairs, piping, and so on. There is a whole chapter devoted to air conditioning, and another dealing exclusively with the reduction of building costs. Just one short chapter is given over to interior planning, and this is merely a description of three rather ordinary little houses, all very much alike. One of them is the author's own.

BRITISH BUILDING

Architects' Year Book. Jane B. Drew, F.R.I.B.A., ed. London, E.C. 1 (Diamond House. 36-38 Hatton Garden), Paul Elek, Ltd., 1945. 7½ by 10 in., 412 pp. illus. 35 s.

The aim of this volume, says the editor in her foreword, is "to show trend and to help the forward-looking architect by giving him the necessary background of basic contemporary knowledge." With this end in mind, 13 papers are presented on various subjects ranging from landscape architecture and town planning to housing, planning industrial buildings, and service buildings. A technical section includes 16 papers on such items as structural steel, reinforced concrete, fiberbuilding boards, plastics, acoustics, glass. To many of the articles are appended bilbiographies and reference lists.

CITY PLANNING

OHIO

Comprehensive City Plan. By the City Planning Commission, Greenville, Ohio. 8½ by 11 in. 92 pp., illus.

The aerial view which comprises the frontispiece of this planning report shows Greenville to be a city of long straight streets bisecting each other for the most part at right angles. More than the usual number of trees is evident, and there is one square, with a city hall at its center. The population distribution chart shows exceptional evenness throughout the greater part of the city. Greenville, on the whole, would seem to be an orderly city, with much of the groundwork of good planning already laid.

Under the direction of Ladislas Segoe, Planning Consultant, a Comprehensive City Plan has been drawn up "to guide, and in some measure control, both public and private improvements and developments." Because of the inherent soundness of the city, no very striking recommendations have been made. Zoning, subdivision control and building code adoption are proposed; "an organized, community wide program to encourage and promote the repair and modernization of older or substandard dwellings and high standards of maintenance of all structures . . . would seem highly desirable"; a plan of thoroughfares and highways is proposed; construction of several new schools, recreation

BOSTON

In Which We Live. Annual Report of the Boston Housing Authority, 1944-45. Boston 6, Mass. (10 Post Office Sq.), 1945. 8¼ by 11¼ in., 36 pp., illus.

The Boston Housing Authority, this report shows, has constructed to date eight developments and has two further developments on its schedule. The success of the existing projects is described and illustrated; the need for further building is graphically presented. The Authority is fully aware of the gigantic problem it faces, and it is striving valiantly to keep what it has gained through good management and careful maintenance. To increase efficiency and keep costs as low as possible, the Authority is gradually turnig over to its own staff much of the repair work, including all exterior painting.

BIDS WANTED

LONE PINE, Inyo Co., Calif.—Until March 16, 9 A. M., bids will be received by the Lone Pine Union High School District, Lloyd Taylor, clerk, Lone Pine, for drilling of 10-in. well of a depth of at least 180 ft. Well to be finished with 10-in. double-duty casing. If necessary, driller is telescope well with 8-in. inner casing to finish up. When the well is completed the casings are to extend 18-in. above the surface of the ground. All materials to be furnished by driller.

3/15/46 •• 32
PROPOSED

YOUNTVILLE, Napa Co., Calif.—Consulting Sanitary Engineer Harry N. Jenks recently presented tentative maps showing location of the proposed $108,900 sewage disposal system and plant at Yountville to the County Board of Supervisors. The project, if approved, would entail organization of a sanitary district and a bond issue would be required to finance half of the cost. The tentative costs entail a $65,000 treatment plant, $34,000 pipeline costs, with $9900 for contingencies.

RECONSTRUCT RAILROAD TRACKS, STOCKTON

ROUGH AND READY ISLAND, near Stockton, San Joaquin Co., Calif. —The following submitted bids to the officer in charge of construction, U. S. Naval Supply Annex, Rough and Ready Island, Stockton, under Spec. 17620, NOy 13469, for reconstruction of railroad tracks at the U. S. Naval Supply Annex, Stockton.

Work consists of replacement of approximately eight track miles of worn rails, switches, etc., with new or acceptable relayer rails and accessories complete and ready for use.

The existing 70-, 72-, 75-lb. rails, turnouts, etc., are to be removed and replaced with new 75-lb., new 90-lb. or acceptable 110-lb. relayer rails and accessories. Spike holes in ties will be plugged and defective ties replaced. Track will be brought to grade and ballast properly retamped. Material removed will remain the property of the Navy and will be placed in a nearby storage area on the Naval Supply Annex, Stockton, by the contractor, Alternate bid items will be included for supplying and installing new 75-lb. rails and turnouts, new 90-lb. rails and turnouts or 110-lb. relayer rails and new turnouts and a separate bid item will be called for on cost per unit tie for removing the defective ties and furnishing and installing new ties.

Bids were asked as follows:
(1) work complete using new 90-lb. rails, fittings and accessories;
(2) work complete using new 75-lb. rails, fittings and accessories;
(3) work complete using 110-lb. relayer rails, fittings and accessories and new turnouts;
(4) price per tie for removing any existing defective ties in the track to be reconstructed and furnishing and installing new ties, as follows:
  (a) 8-ft. cross ties;
  (b) 8-ft. 6-in. switch ties;
  (c) 9-ft. switch ties;
  (d) 9-ft. 6-in. switch ties;
  (e) 10-ft. switch ties;
  (f) 10-ft. 6-in. switch ties;
  (g) 11-ft. switch ties;
  (h) 11-ft. 6-in. switch ties;
  (i) 12-ft. switch ties;
  (j) 12-ft. 6-in. switch ties;
  (k) 13-ft. switch ties;
  (l) 13-ft. 6-in. switch ties;
  (m) 14-ft. switch ties;
  (n) 14-ft. 6-in. switch ties;
  (o) 15-ft. switch ties.

Bidders were:
(A) A. D. Schader, San Francisco.
(B) W. A. Smith Constr. Co., Los Angeles.
(C) Clifford C. Bong & Co., Arcadia.
(D) H. B. Nicholson, Los Angeles.
(E) R. Goold & Son, Stockton.

"built-in telephone outlets are inexpensive"

A plan that includes built-in telephone facilities is practical for even modest building budgets. Conduit installed during construction adds little to building cost...and enhances future value. Even though only one telephone is needed immediately, others may be added later without tearing up the flooring or bringing wire in along baseboards. ¶ Your clients will approve your foresight in planning built-in telephone outlets. You are welcome to call on our Architects' and Builders' Service for any needed help at no cost.

BIDS WANTED

COLUMBIA BASIN PROJ., Wash.—Until April 15, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Coulee Dam, Wash., under Spec. 1236, for construction of earthwork, canal lining, tunnel, and structures, Main Canal, station 24 plus 00 to station 430 plus 00, Columbia Basin Project, Wash. The work is situated near Coulee City, Wash.

Principal items are as follows:

SCHEDULE No. 1

Main Canal

Sta. 24 plus 00 to Sta. 93 plus 00

(1) 15,000 c.y. common excav. for canal;
(2) 1,240,000 c.y. rock excav. for do;
(3) 800 c.y. compacted embankment
(4) preparing 32,700 s.y. rock foundations for concrete lining;
(5) 5,450 c.y. concrete in canal lining.
(6) placing 393,000 lbs. reinf. bars in canal lining;
(7) constructing 2,000 l.f. of underdrains with uncemented joints;
(8) laying 450 l.f. sewer pipe with cementer joints.

SCHEDULE No. 2

Main Canal, Sta. 93 plus 00 to Sta. 204 plus 58 (Bacon Siphon and Bacon Tunnel)

(1) 1,000 c.y. common excav. for structures;
(2) 33,500 c.y. rock excav. for do;
(3) 216,500 c.y. all classes of excav., in tunnel;
(4) 48,000 c.y. backfill;
(5) 3,500 c.y. compacted backfill;
(6) 8,180 c.y. concrete in structures;
(7) 43,400 c.y. concrete in tunnel lining;
(8) placing 2,570,000 lbs. reinf. bars;
(9) furnishing and installing 4,000,000 lbs. permanent steel tunnel supports;
(10) furnishing and installing 938 M ft. b. timbering in tunnel supports;
(11) erecting 10 M. ft. bm of timber in siphon bulkhead;
(12) installing 600 lbs. of blowoff valve and connections;
(13 placing 160 l.f. of rubber water stops;
(14) placing 25,600 lbs. metal do:
(15) installing 3,400 lbs. misc. metal work;
(16) drilling 1,200 l.f. of grout holes not more than 10 feet deep;
(17) placing 1000 lbs. of grout pipe and connections;
(18) 2,000 c.f. pressure grouting;
(19) placing 1,000 lbs. weep pipe.

SCHEDULE No. 3

Main Canal

Sta. 204 plus 58 to Sta. 430 plus 00

(1) 200,000 c.y. common excav for canal;
(2) 615,000 c.y. rock excav. for do;
(3) 5,400 c.y. common excav. for drainage channels and dikes;
(4) 2,700 c.y. rock excav. for do;
(5) 2,900 c.y. common excav. for road relocation;
(6) 3,400 c.y. rock excav. for do;
(7) 500 c.y. common excavation for structures;
(8) 150 c.y. rock excav. for do;
(9) 72,000 sta. c.y. overhaul;
(10) 450 c.y. backfill;
(11) 310 c.y. concrete in structures;
(12) placing 20,000 lbs. reinf. bars;
(13) erecting 200.000 lbs. struc. steel in railroad bridge;
(14) erecting 63 M. ft. b.m. timber in bridges;
(15) 3,000 s.y. dry-rock paving;
(16) 1,000 c.y. riprap.

No charge to prospective bidders for copies of the specifications and drawings; to others, $3.00 per copy, not returnable.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2. Colo.; R. J. Newell, Regional Director, P. O. Box 937, Reclamation Building, Fairgrounds, Boise, Idaho; F. A. Banks, Supervising Engineer, Coulee Dam, Wash.; and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Supervising Engineer.

PLANS and Speculations

Paradise: About 50 service and improvement clubs here are seeking building funds to construct an indoor recreation center for boys and girls. Kenneth Nevins, principal of the Paradise grammar school, said more than $1,000 has already been contributed. Next meeting to discuss the plans is set for April 8.

oOo

Woodland: John Griffith, chairman of the American Legion Fact-Finding Committee, is making a survey here to determine what kind of war memorial the community wishes to sponsor.

oOo

Los Gatos: Six separate groups have inquired about possibilities of constructing an airport here, according to the chamber of commerce.

oOo

Colusa: The Colusa Housing Authority, reportedly discussing sites for 24 emergency housing units for veterans, is contemplating means necessary to move Federal allotted housing here from other districts.

oOo

Bakersfield: The decision to engage a consulting engineer to open architectural competition for a living war memorial here has been made by the Kern County Board of Supervisors. Charles Lake is general chairman of the committee who aim to draft an over-all program of a memorial, auditorium and recreation center to fit the county's needs.

oOo

Oroville: The County Board of Supervisors has written a curt note to the Oroville city council asking "when the long-talked about city jail is going to be built?" Supervisor Walter J. O'Neill, who suggested the letter, said it wasn't intended to be antagonistic, but merely to get information.

#

CERTIFY ARCHITECTS

The Board of Architectural Examiners announces that certificates authorizing the practice of architecture in the state of California have been awarded to eight men.

They are: Allen Balch, 1340½ N. Edgemont street, Los Angeles; Donald Campbell, 2087 Navarro avenue, Pasadena; Sidney Hill Foster, 9809 MacArthur boulevard, Oakland; Boyd S. Georgi, 148 Chiquita street, Laguna Beach; Kenneth Nile Lind, 7417 Beverly boulevard, Los Angeles; Thomas Keret, 4152 20th street, San Francisco; William L. Simrell, Jr., 711 Costa Rice avenue, San Mateo; and Malcolm C. Smith, 683 22nd avenue, San Francisco.

Klamath Basin Irrigation Survey Launched This Month

Survey parties of the Bureau of Reclamation will begin field work this month in the 12,000-square-mile Klamath River Basin on a comprehensive investigation of its land and water resources available for full agricultural and industrial development of the area.

Inauguration of the reclamation study was announced today by Regional Director Richard L. Boke, Sacramento, who said it will include a complete mountains-to-the-sea inventory of potential irrigation, power flood control, fishing, and related recreational possibilities of the entire basin. Headquarters for the investigation will be established in Klamath Falls, Ore., in conjunction with the existing Klamath Reclamation Project which has been in operation since 1907.

The basin includes parts of Lake, Klamath, and Jackson counties in Oregon, and Siskiyou, Modoc, Del Norte and Trinity counties in California. Besides the main river, the Bureau's survey will cover the Sprague, Williamson, Wood, and Sycan rivers in the upper basin, the Klamath marsh areas, and the Shasta, Scott, Salmon, and Trinity rivers which are tributary to the Klamath River in the lower basin. In accordance with a specific request of the collier committee, special attention will be given the irrigation possibilities of the Butte and Shasta valleys in Siskiyou county, Boke said.

The long-range Klamath study was charted at a recent conference of Bureau officials in Klamath Falls where it was decided that a full-fledged investigation staff will be set up in the basin before June 30. The field work and the preparation of the Bureau's comprehensive report will be the responsibility of the Regional Branch of Project Planning headed by Regional Planning Engineer S. A. Kerr, with the cooperation and assistance of the Regional Branch of Operation and Maintenance with respect to the existing Klamath Project under Supt. E. L. Stephens.

Did You Know That . . .

For the past two months **Architect Michael Goodman** has been established in new offices at 2161 Shattuck avenue, Berkeley 4. Mr. Goodman is occupying rooms 4 and 5 at the new address and his telephone number is THornwall 4330.

—O—

M. J. Lynch, general engineering contractor, has moved to new quarters at 2251 Revere avenue, San Francisco. Formerly located at Barneveld and Oakdale avenues, the firm's telephone number remains VAlencia 1434.

—O—

Harry Hansell, former manager of the **Asbestos Company of California** in San Francisco has been elected president of the company. Mr. Hansell has been active in the Insulation and Mechanical Rubber field for a period of 20 years.

—O—

The California State Personnel Board is holding examinatoins April 20, for positions of junior highway engineer and assistant highway engineer. Salaries for the positions are $220 and $270, respectively, which includes wartime emergency increases of $25 for each job. Applications must be filed at State Personnel Board, 1015 "L" street, Sacramento, before midnight of April 4, or postmarked before that time.

—O—

Garrett **Eckbo,** Robert Royston and **Edward Williams** announce their association as **Eckbo, Royston & Williams,** Planning Consultants, Landscape Architects, Site and Recreation Planners, with offices at 21 Columbus Avenue, San Francisco 11 (EXbrook 1170), and 624 South Carondelet, Los Angeles 5 (PRospect 6484).

—O—

Al O. Erickson and **Ross Phillips,** formerly with Macco Constr. Co., have joined forces with Arthur Weisberg, recently discharged Lieutenant Commander in the Seabees, and are now doing business as general contractors under the name of Erickson, Phillips & Weisberg Construction Co., 2707 Grant street, Berkeley. Phone Berkeley 7825-J.

—O—

Fred L. Swartz and William G. Hyberg, Rowell Building, Fresno, have formed a partnership in architecture. Mr. Hyberg, a graduate of the University of Southern California, has completed three years work with W. D. Peugh and Associates, designers of buildings located at Camp Parks and Shoemaker Naval Hospital, Pleasanton.

Unemployment Rises Feb. Report Proves

As a result of industrial disputes in the iron and steel and electrical equipment industries, manufacturing employment in the San Francisco Bay Industrial Area was reduced further between January and February, Paul Scharrenberg, Director of Industrial Relations, announced today on the basis of preliminary reports.

Approximately 80,000 wage earners were at work in Area manufacturing industries in mid-February compared with 83,000 in the middle of January.

Employment losses were concentrated almost entirely in durable goods industries in which the number of wage earners fell to approximately 33,000 in February from 36,000 the preceding month.

In the nondurable goods division, factory employment remained fairly stable between January and February at around 47,000 production workers.

Carbide Tipped Masonry Tools Give Longer Wear

A line of Carboloy cemented carbide tipped and faced masonry tools recently introduced by a Detroit organization is reported to be giving excellent results. The development had its inception when Ralph Gwinn, a brick mason, asked his son Myron, who worked at Carboloy Co., Inc., to consult the company regarding the troubles he had with his regular tools—involving frequent sharpenings, etc.

A set of masonry tools, comprising a scutch to trim bricks, a brick both hammer head and cutting both haommer head and cutting edge, a tile setter hammer, and a three-inch brick set used to cut glazed brick were tipped with Carboloy, and ground to shape.

The results, according to Gwinn, were so surprising that, after a month with not a tool requiring sharpening, the Gwinns decided to go into the manufacture of Carboloy tools for the masonry trade. The business is reported to be flourishing.

GROOVER AND I

R.S.V.P.? THEY DID!

I should have bought new running shoes before starting any facetious correspondence with General Vandegrift regarding a payment of 31c for a first-aid bandage lost by former Lt. Maurice Savage, USMCR.

★ ★ ★

George C. White of the Wallace & Tiernan Sales Corp., warned me there would be days like this. White stated there might be several hundred dollars worth of paper work in addition to a possible Congressional investigation.

★ ★ ★

The M. P.'s haven't come clomping up the stairs yet but there is a letter from Lt. Col. LeRoy Houser, USMCR, who states that the record of Lt. Savage's equipment had already been cleared.

★ ★ ★

He returned the 31c money order by registered airmail. There is 32c postage on the return envelope—and I am stuck with the money order!

★ ★ ★

I am in one heluvafix. The postal money order is made payable to the U. S. Marine Corps. If I burn it up, I may be charged with destroying a Government document. If I keep it I may be charged with possession of Government funds.

★ ★ ★

Has any one a small cabin I can rent—preferably about six miles South of the Mexican Border?

Berkeley Architect Wins $1,000 Prize

In a nation-wide competition of architects and designers, George R. Klinkhardt, 44 Eucalyptus Rd., Berkeley, has won a $1,000 prize for his design of a two-story house adaptable to a 30-foot lot .

The contest was sponsored by the Chicago Tribune, and entries were exhibited at the Art Institute of Chicago. More than 15,000 persons viewed the display.

Mr. Klinkhardt's design is a practical example of building on a small lot and has effectively worked out a way of utilizing all available space.

He is chief architect of the department of architecture and engineering of the Oakland board of education.

State's Million Dollar Building Program Approved By Governor Warren

The $154,000,000 appropriation bill signed last week by Governor Warren provides funds for a vast state postwar construction and repair program of universities, hospitals and other institutions.

It will allow for modernization and expansion of state facilities to meet anticipated needs up to 1950.

San Francisco will receive a big share, an amount running into several milions.

Some of the buildings provided are for: a $2,670,000 grant for completion of the University of California's new teaching hospital in the San Francisco Medical Center; $2,275,000 medical sciences building and a $135,000 dental clinic expansion at the center. (Warren earlier signed a separate $4,000,000 appropriation for the medical center.)

San Francisco State College, $3,436,300; Langley - Porter Clinic, $200,000; State building annex, $1,900,000; San Francisco State building No. 2, $1,750,000; motor vehicle department building, $330,000.

An appropriation for the Yountville Veterans Home of $2,400,000 brings the total for that institution up to $3,481,000, and includes provision, for the first time, for women's quarters.

Among the major allocations eset up in the omnibus bill are:

University of California, $30,000,000; Department of Education, $13,500,000; Department of Institutions, $57,500,000; Department of Corrections, $12,200,000; Youth Authority, $7,000,000; Yountville Veterans Home, $2,400,000; State capitol and offices, $15,800,000; Department of Natural Resources $3,300,000; Department of Motor Vehicles, $3,400,000; Department of Agriculture, $400,000; State fair and exposition park, $3,500,000; miscellaneous repairs and improvements, $5,000,000.

New maximum security mental hospital, $6,133,200; new Los Angeles psychiatric research clinic, $1,000,000; new mental hospital, $5,333,200; new department of corrections medical facility (to be located in or as near the Bay area as possible), $5,130,000; new medium security prison, $4,000,000; new boys' reform school, $1,067,000; addition to State capitol building, $2,400,000.

AIR CONDITIONING TALK

Donald Williams, of the General Air Conditioning & Heating Co., will talk on "Industrial Air Conditioning" at the Wednesday luncheon of the American Society of Heating and Ventilating Engineers, Golden Gate chapter.

The meeting will commence at 12:45 p. m. in the El Jardin, 22 California street, just off Market street.

Plastic Composition Adapted To Many Construction Uses

A new construction material, somewhat in the nature of a plastic composition, has been announced by Research for Industry, Inc., of 2915 Detroit avenue, Cleveland. The product, according to Dr. Waldemar Dietz, executive director of the organization, will solve the problem of many manufacturers who now cannot obtain sufficient materials.

"This material, because of the fact that it is inexpensive and can be pressed into sheets or molded into a wide variety of forms, will solve the problem of many manufacturers who now cannot obtain materials," he said.

The product, known as Excelite, is made of materials which are easy to obtain even with the present shortages. Its relatively high strength, low conductivity of heat, low manufacturing cost, good resistance to fire and fine appearance make it applicable to many fields where metals or plastics now are used.

Beside molded products, applications for which the material is suited include insulating building boards, doors, sash mouldings, gutters, veneer cores, air ducts, stove pipe board liners, furniture, roofing, cabinets, refrigerator insulation, truck and bus bodies, caskets and coffins, containers and many others.

"Material shortages threaten to deprive the consumer of many badly needed things," said Dietz. "This material will help solve this problem and will make possible lower production costs for many articles due to minimum labor requirements."

CENTRAL VALLEY PROJECT.—Until April 18, 10 A. M. (postponed from April 8), bids will be received by the United States Bureau of Reclamation, Walker R. Young, chief engineer, Antioch, Calif., under Specification 1183 for the construction of Delta-Mendota Canal, stations 686 to 1365, and Westley wasteway, Delta Division, Central Valley Project, California. The work is situated in the vicinity of Patterson, Calif.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1
Station 686 to Station 1365
(1) 2,800,000 cu. yds. excavation for canal, unclassified;
(2) 100,000 sta. cu. yds. overhaul;
(3) 350,000 cu. yds. compacting embankments;
(4) 40,000 cu. yds. excavation for drainage channels;
(5) 45,000 cu. yds. excavation for structures;
(6) 27,000 cu. yds. backfill;
(7) 24,000 cu. yds. compacting backfill;
(8) trimming 844,000 sq. yds. foundation for concrete lining;
(9) 11,100 cu. yds. concrete in structures;
(10) 47,000 cu. yds. concrete in unreinforced canal lining;
(11) 47,000 cu. yds. concrete in reinforced canal lining;
(12) placing 1,760,000 lbs. reinforcement in structures;
(13) placing 3,000,000 lbs. reinforcement in canal lining;
(14) 1500 sq. yds. dry-rock paving;
(15) placing 4600 sq. ft. elastic joint filler;
(16) placing 1500 lin. ft. rubber water stops;
(17) installing 255,000 lbs. gates and hoist;
(18) installing 58,000 lbs. miscellaneous metal work;
(19) installing 250 lin. ft. electrical metal conduit;
(20) installing 200 lbs. electrical conductors;
(21) constructing 40 cattle guards;
(22) placing 900 lin. ft. 15-in. precast pipe;
(23) placing 100 lin. ft. 18-in. precast pipe;
(24) placing 50 lin. ft. 24-in. precast pipe;
(25) erecting 510 M ft. b.m. timber in bridges.

Schedule No. 2
Westley Wasteway
(1) 193,000 cu. yds. excavation for wasteway channel;
(2) 33,000 cu. yds. excavation for structures;
(3) 100,000 cu. yds. of backfill for wasteway channel;
(4) 13,000 cu. yds. backfill for structures;
(5) 20,000 cu. yds. compacting embankment along wasteway;
(6) 4000 cu. yds. compacting backfill;
(7) trimming 105,000 sq. yds. foundation for lining;
(8) 3100 cu. yds. concrete in structures;
(9) 21,000 cu. yds. concrete in wasteway lining and sidewalls;
(10) placing 2,400,000 lbs. reinforcement steel;
(11) installing 130,000 lbs. of structural steel;
(12) installing 11,500 lbs. miscellaneous metal;
(13) installing 700 sq. ft. elastic joint filler;
(14) erecting 65 M ft. b.m. timber in bridges;
(15) placing 100 lin. ft. 18-in. precast pipe;
(16) placing 20 lin. ft. 24-in. precast pipe.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; R. L. Boke, regional director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; O. G. Boden, construction engineer, Antioch, Calif., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.50 per copy, not returnable.

3/18/46 •• 34
BIDS POSTPONED
CENTRAL VALLEY PROJECT.—Until April 8, 10 A. M. (postponed from March 27), bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, Chief Engineer, Friant, Calif., under Spec. 1178 for construction of Friant-Kern Canal stilling basin, Cottonwood Creek Bridge, Friant Dam landscape area improvements, Friant Division, Central Valley Project. Work is located about 1.5 miles northeast of Friant.

Work involves:
(1) 400 c.y. common excavation for structures;
(2) 2,600 c.y. rock do;
(3) 190 c.y. excavation, concrete;
(4) 2,200 c.y. all classes excav. for pipe trenches;
(5) 320 s.y. chipping and roughening concrete surfaces;
(6) 13,000 c.y. backfill;
(7) 13,000 c.y. compacting backfill;
(8) 800 c.y. embankment;
(9) 400 c.y. riprap;
(10) constructing 860 l.f. 12-in. diam. split-sewer pipe drains with cemented joints;
(11) constructing 900 l.f. 12-inch do with uncemented joints;
(12) constructing 80 l.f. 24-in. diam. sewer-pipe drains with cemented joints;
(13) drilling 1,600 l.f. holes for anchor bars and grouting bars in place
(14) 130 c.y. concrete in outlet valve structure;
(15) 3,000 c.y. concrete in floor and wall footings of stilling basin;
(16) 2,100 c.y. concrete in walls of stilling basin;
(17) 180 c.y. concrete in bridge struc.
(18) 20 c.y. concrete in septic tanks;
(19) 90 c.y. concrete in water tanks;
(20) 260 c.y. concrete in rest-houses;
(21) constructing three rest houses, except concrete;
(22) 54,000 s.f. vacuum concrete process for floor and inside surfaces of walls of stilling basin and transition;
(23) placing 580,000 lbs. reinf. bars;
(24) 1,000 s.y. grouted paving gutters
(25) 90 l.f. gravel backfilled gutters
(26) installing 5,000 lbs. misc. metal-
(29) placing 1,850 l.f. rubber water work;
(27) constructing 3 M ft. b.m. timber railings;
(28) placing 250 s.f. elastic joint filler stop;
(30) installing 4,500 lbs. of standard metal pipe, fittings and valves;
(31) laying 150,000 lbs. cast iron pipe
(32) 5 c.y. rubble masonry;
(33) laying 100 l.f. clay sewer pipe with poured joints;
(34) laying 2,400 l.f. drain tile em-

LOS ANGELES RIVER IMPROVEMENTS

LOS ANGELES, Calif.—As previously reported, E. B. Bishop, Box 325, Orland, at $759,613.70 submitted low bid to the U. S. District Engineer's Office, 751 S. Figueroa St., Los Angeles, for construction of Los Angeles River improvements, North Broadway to Alhambra Ave., river mile 23.5 to river mile 22.9, Los Angeles; Serial 148.

The project involves the construction of 3300 lin. ft. of river channel improvement and appurtenant work. The channel improvement consists of construction of reinforced concrete paving on the slopes of the riverbank, with parapet walls and berm paving at the top. Concrete pier extensions will be built for the Spring St. and Main St. bridges. Other work includes the construction and removal of a temporary railroad embankment; replacement of wooden subdrain riser hoods in the invert with cast iron hoods; construction of fencing on channel walls, and the installaton of corrugated metal pipe drains with appurtenant concrete outlet structures. Principal features of the work include: Clearing site and removing obstructions; excavating and backfilling; driving steel sheet and steel bearing piles; constructing reinforced concrete slope paving, berm, walls and pier protection; side drainage structures and pipe and fencing.

The bids will be taken as follows:
(1) lump sum, clearing site and removing obstructions;
(2) 128 lin. ft. pulling or cutting off steel sheet pile wall;
(3) 125,000 cu. yds. channel excavation;
(4) 1270 cu. yds. structure excavation;
(5) 41,000 cu. yds compacted backfill and fill;
(6) 100 cu. yds. uncompacted backfill and fill;
(7) 7300 cu. yds. crushed gravel or crushed rock backing;
(8) 200 cu. yds. gravel in pockets and drains:
(9) 300 cu. yds. temporary railroad embankment;
(10) 13,900 lin. ft. steel bearing piles, vertical;
(11) 10,800 lin. ft. steel bearing piles, batter;
(12) 100 each, splicing steel bearing piles;
(13) 6600 sq. ft steel sheet piling;
(14) 6450 lin. ft. channel fencing;
(15) lump sum, pressure grouting;
(16) 12,400 cu. yds. concrete slope paving;
(17) 2700 cu. yds. concrete footings for walls and pier extensions;
(18) 2800 cu. yds. concrete walls and pier extensions;
(19) 550 cu. yds. concrete berm paving and misc. structures;
(20) 1,900,000 lbs. steel reinforcement bars;
(21) 6500 lbs. steel reinforcement fabric;
(22) 2250 each expansion joint sleeves
(23) 250 each cinch anchors;
(24) 20 each subdrain hoods;
(25) 14 lin. ft. 12-in. corrugated metal pipe;
(26) 14 lin. ft. 15-in. same;
(27) 17 lin. ft. 18-in. same;
(28) 40 lin. ft. 24-in. same;
(29) 48 lin. ft. 36-in. same;
(30) 24 lin. ft. 54-in. same;
(31) 1 15-in. automatic drainage gate;
(32) 1 18-in. same;
(33) 2100 lbs. misc. metal work;
(34) 27,200 bbls. portland cement;
(35) 38,000 tons salvaging and placing derrick stone;
(36) 115,000 ton miles hauling derrick stone;
(37) 2000 sq. ft. ¼-in. fiber expansion joint filler;
(38) 450 sq. ft. ½-in. fiber expansion joint filler;
(39) 20,000 sq. ft. 1-in. fiber expansion joint filler;
(40) 823 each, caps for steel bearing pile.

Total bids were:
(A) E. B. Bishop, Orland, $759,613.70.
(B) Morrison-Knudsen Co., Los Angeles, $837,225.20.
(C) Guy F. Atkinson Co., Long Beach $845,385.
(D) Bressi & Bevanda Constructors, Los Angeles, $900,702.65.
(E) Basich Bros., Alhambra, $1,030,256.50.
(F) E. W. Elliott, San Francisco, $2,287,212.75.
(G) Government estimate, $678,227.85.

BIDS POSTPONED

BALMORHEA PROJECT, Texas.—Until April 16, 10 A. M. (postponed from March 27), bids will be received by United States Bureau of Reclamation, Amarillo, Texas, under Spec. 1186 for the construction of earthwork and structures, Phantom Lake canal and inlet feeder canal, Balmorhea Project, Texas. The work is situated in the vicinity of Balmorhea, Texas.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1—Phantom Lake Canal
(1) 8400 cu. yds. excavation, common, for canal;
(2) 200 cu. yds. excavation, rock, for canal;
(3) 200 sta. cu. yds. overhaul;
(4) 3300 cu. yds. excavation, common, for structures;
(5) 50 cu. yds. excavation, rock, for structures;
(6) 1000 cu. yds. compacting embankments;
(7) preparing 200 sq. yds. of rock foundations for concrete lining;
(9) trimming 19,000 sq. yds earth foundations for concrete lining;
(9) 2000 cu. yds. backfill;
(10) 300 cu. yds. compacting backfill;
(11) 175 cu. yds. concrete in structures;
(12) 1640 cu. yds. concrete in canal lining;
(13) placing 105,000 lbs. of reinforcement bars;
(14) 25 sq. yds. dry-rock paving;
(15) 160 cu. yds. rubble masonry;
(16) erecting 2 M ft. b.m. of timber in structures;
(17) laying 240 lin. ft. 15-in. diameter precast concrete pipe;
(18) laying 1360 lin. ft. 27-in. diameter precast concrete pipe;
(19) laying 132 lin. ft. 30-in. diameter precast concrete pipe;
(20) erecting 24 lin. ft. No. 84 metal flume;
(21) installing 2000 lbs. of gates and miscellaneous metal work.

Schedule No. 2—Inlet Feeder Canal
(22) 11,500 cu. yds. excavation for canal;
(23) 160 cu. yds. backfill;
(24) 80 cu. yds compacting backfill;
(25) 600 cu. yds. compacting embankments;
(26) 22,000 sq. yds. preparing surface for concrete lining;
(27) 80 cu. yds. concrete in structures;
(28) 1880 cu. yds. concrete in canal lining;
(29) placing 110,000 lbs. of reinforcement bars;
(30) erecting 20 M ft. b.m. of timber in structures.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U S. Custom House, Denver 2, Colo.; W. R. Nelson, regional director, P. O. Box 1609, Oliver-Eakle Bldg., 6th and Polk Sts., Amarillo, Texas, and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the regional director.

No charge for specifications to prospective bidders; to others, $2, not returnable.

BIDS POSTPONED

SAN FRANCISCO.—Until Mar. 26, 3 P. M. (postponed from March 12), bids will be received by Public Utilities Commission, Room 287, City Hall, under S. F. Airport Contract No. 82 for airport extension, fill, pavement, and related construction at San Francisco Airport.

Work involves:

Proposition A:
(1) 6,000,000 c.y. dry fill;
(2) 420,000 s.y. compacting to 95% density;
(3) 25,000 M. gals. watering (unit is 1000 gals.);

Proposition B:
(1) 450,000 c.y. dry fill;
(1a) 5,550,000 c.y. hydraulic fill;
(2) 110,000 s.y. compaction to 95% density;
(3) 5000 M. gals. watering (unit is 1000 gals.).

Quantities for Items 4 to 31 are the same for Propositions A and B
(4) 135,000 c.y. rehandling;
(5) 125,000 c.y. misc. excav.;
(6) 4,000 s.y. sub-base preparation;
(7) 15,000 tons crushed rock base;
(8) 50 tons prime coat;
(9) 600 tons plant-mix surfacing;
(10) 200 s.y. bit. seal coat;
(11) 310,000 s.f. portland cement concrete pavement;
(12) none—portland cement adjustment price, to compensate for change in requirement for cement in concrete as provided in the specifications;
(13) lump sum, drainage of existing mud fill area;
(14) 100 l.f. 6-in. sale glazed vitrified clay pipe;
(15) 700 l.f. 15-in. reinf. concrete pipe
(16) 800 l.f. 18-inch do;
(17) 400 l.f. 21-inch do;
(18) 1,100 l.f. 24-inch do;
(19) 30 l.f. 21-in. corru. metal pipe;
(20) 30 l.f. 24-inch do;
(21) 1 each 21-in. automatic drainage gate;
(22) 1 each 24-inch do;
(23) 350 l.f. 21-in. corru. metal pipe, furnished by city, to be installed
(24) 350 l.f. 24-in. corru. metal pipe, furnished by city;
(25) 1 each 21-in. automatic drainage gate furnished by city;
(26) 1 each 24-inch do;
(27) 700 l.f. salvaging 21- and 24-in. corrugated metal pipe;
(28) 4 each new inlets;
(29) 11 each removal of inlets;
(30) 50 each reinstalling inlets;
(31) lump sum, removing drainage structures X and Y.

Specifications obtainable from the cashier's office, 6th floor, 425 Mason Street, upon deposit of $10.00.

38— ELECTRIC LIGHTING TRANSMISSION LINES EQUIPMENT

3/18/46 ** 38
BIDS POSTPONED

COLORADO-BIG THOMPSON PROJECT, Colorado. — Until March 28, 10 A. M., (postponed from March 18), bids will be received by the Bureau of Reclamation, Denver, Colo., for the construction of the Brush-Sterling 115-kilovolt and the Sterling - Holyoke 69 - kilovolt transmission lines, Colorado-Big Thompson Project, Colorado; Specification No. 1210. The work is situated in the northeast portion of the State of Colorado. Completion time, 150 days.

No charge to prospective bidders for specifications and drawings; to others, $2.25. Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; E. B. Debler, regional director, 501 Continental Oil Bldg., Denver, Colo.; C. H. Howell, project engineer, Estes Park, Colo., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the project engineer. Guarantee in the amount of 10% of bid required.

The specifications will provide for bids on either or both of the two transmission lines, but no bid will be considered for only a part of either line. A description of the proposed trnasmission lines is as follows:

(a) Brush-Sterling line will be a 115-kilovolt, 3-phase, single-circuit, 60-cycle, wood-pole, H-frame type transmission line, approximately 36 miles long, except that for about 3700 feet near Sterling, Colo., there will be constructed a section of double circuit line on steel towers. The conductors for the transmission line will be either No. 4/0 AWG aluminum cable, steel reinforced, or 133,100 circular mil copper expanded conductor.

(b) Sterling-Holyoke line will be a 69-kilovolt, 3-phase, single-circuit, 60-cycle, wood-pole, H-frame type transmission line, approximately 48 miles long. The conductors for the transmission line will be either No. 3/0 AWG aluminum cable, steel reinforced, or No. 1/0 AWG stranded copper conductor.

3/18/46 ** 38
LOW BIDDERS

RIO GRANDE PROJECT, New Mexico. — The following submitted apparent low bids to the Bureau of Reclamation, Denver, Colo., under Spec. 1170 for the construction of the Alamogordo-Hollywood and the Elephant Butte - Socorro 115 - kilovolt transmission line, Rio Grande Project, New Mexico. The work is situated in approximately the central portion of the state of New Mexico.

The specifications will provide for bids on either or both of the two transmission lines, but no bid will be considered for only a part of either line:

H. H. Walker, Inc., 1323 Venice Blvd., Los Angeles, (Sched I) $165,769.60 for copper conductor; $166,582.10 for aluminum conductor. (Sch. II) $228,738 for copper conductor; $229,838 for aluminum conductor.

Reynolds Electric & Engineering Co., El Paso, Texas, (Sch. I) $159,659.59 and $158,920.59. (Sch. II) $178,621.41 and $182,083.41.

3/18/46 ** 38
LOW BIDDERS

CENTRAL VALLEY PROJECT, Calif.—American Bridge Co., Denver, Colo., at $451,353, submitted low bid to the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Denver, Colo., under Spec. No. 1162 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Marysville, Calif., at the option of the bidder, galvanized steel towers and appurtenances for the 230 - kv. Oroville - Sacramento transmission line, Central Valley Project, California:

Second and third low bids follow:

Bethlehem Pacific Coast Steel Corp., San Francisco, $473,545.

Muskogee Iron Works, Dallas, Tex., $605,344.

Fifty-sixth Year—Vol. 56—No. 54 SAN FRANCISCO, TUESDAY, MARCH 19, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

Sparks: Extension of the Sparks Nev., sewer system and the construction of a new city garage have been approved by the city council who have adopted a resolution favoring a $135,000 bond issue to cover the projects. A June 3 election will determine the floating of the issue.

oOo

Reno; Methods for acquiring the site for the new high school and for selling $1,500,000 worth of bonds they are now authorized to issue, occupied the Reno school board at its last meeting.

oOo

Marysville: Three cities, Marysville, Oroville and Chico, will work in unison to put over the Bidwell Bar dam under a program already approved by chambers of commerce in the cities. Jack Pank is chairman of the public works committee handling the project.

oOo

Sacramento: Prefabricated metal building will take the place of tents this year at the State Fair, James S. Dean, state director of finance, has revealed. The Army will supply surplus housing for the event.

oOo

Vallejo: The proposed Yolo-Solano irrigation district, which hinges on the Monticello dam, was discussed in an illustrated talk last week given by Howard Posz, representative of the U. S. Bureau of Reclamation, before the Kiwanis Club. More than 400 members attended the session about the 40 million dollar project which would harness the power of Putah creek, furnishing a network of irrigation canals to the county.

oOo

Santa Rosa: A commission making a survey into the proposal for acquisition of Bodega Bay tidelands and beach frontage for a recreational area, will make a report of its findings within 30 days, Chairman Vernon G. Garrett of the Sonoma County Planning Commission, has agreed.

PARAFFINE OKAYS MERGER

At a meeting of stockholders of The Paraffine Companies, Inc., held at the offices of the corporation last Friday, 394,954 shares were voted for the merger with Schumacher Wall Board Corporation and 158 shares were voted against the merger.

The stockholders of Schumacher Wall Board Corporation were slated to consider approval of the merger at a meeting yesterday at South Gate.

Dr. A. Allan Bates To Discuss Enemy Science At A.S.M.E. Dinner

Dr. A. Allan Bates, manager of the Chemical and Metallurgical department, Westinghouse Electric Corporation Laboratories, East Pittsburgh, Pa., will talk on "War, Peace and Technology", Mar. 28 at the monthly meeting of the American Society of Mechanical Engineers, San Francisco section.

The meeting will be held at 6. p. m. in the Engineers' Club, 206 Sansome street.

Dr. Bates spent seven months in Europe as one of a picked group of scientists to study German methods of research and science. He will compare American, British and German research—the part industry and engineering played in winning the war on both sides—and reveal just how good the enemy's "super-scientists" actually were. He will discuss the possibility of future war and discuss what we can do if it should happen.

#

Simplified Practice For Brass Plumbing

Two closely related simplification programs for plumbing brass goods are now being developed through the procedure of the Division of Simplified Practice, National Bureau of Standards.

One program proposes a list of stock types and sizes of plumbing fixture fiittings and trim for housing; the other is a proposed revision of Simplified Practice Recommendation R21, Brass Lavatory and Sink Traps, which was initially promulgated in 1924.

They are sponsored by a committee of manufacturers that is endeavoring to establish, as standards of practice, lists of those items which will meet normal requirements. Support of these programs by all segments of the industry will aid materially in effectively meeting the postwar demand.

Mimeographed copies of the program are available for approval, comment or both, through the Division of Simplified Practice, National Bureau of Standards, Washington 25, D. C.

GROOVER AND I

CAVEAT EMPTOR

For centuries business was done on a "buyer beware" basis. A couple of present California fortunes were founded upon apricot pit kernels processed and sold as toasted almonds, and fine grass seed mixed into synthetic pink jelly and marketed as strawberry jam.

Then the Government started trying to popularize honesty by law. Countless millions have been spent under the Pure Food and Drug Act in protecting the citizenry against misbranding, adulteration and short weights.

★ ★ ★

In addition to the Federal law, states and municipalities have legally frowned upon short quarts, light pounds, and the friendly butcher chummily weighing his thumb on the scales with your pot roast.

★ ★ ★

We are now confronted with the problem of sending food to millions of starving people. We can share food with other countries—in fact the food we waste and throw away would probably fill our relief commitments.

★ ★ ★

But OPA must do it the hard way—and comes up with its 14.4 ounce pound loaf of bread in order to save food!

★ ★ ★

(There is a market need for a half-pound loaf of bread—think of all the gals who live alone, whether they like it or not, and limit themselves to one slice of toast in order to protect their pencil-like silhouettes.)

★ ★ ★

Meeting the problem, if we want to CONSUME less food, the way is to EAT less food, and not through any screwball plant of synthetic weights.

★ ★ ★

Here is one Bureau of the Government making a rule requiring people to violate long established laws and regulations — it doesn't add up.

★ ★ ★

We spent years building regulations with safeguards of proper checks and balances and then they are pitched out the window to make room for some dizzy doodle-bug idea.

#

OIL IN PHILIPPINES

Oil drilling will be resumed in the Philippines as soon as necessary equipment can be obtained, reports of the Department of Commerce indicate. Encouraging indications of oil were found in Cebu in pre-war drilling where operations had gone to 8,330 feet. Machinery used was destroyed in the path of the Jap advance early in 1942.

Residential Construction for February Rises 17 Per Cent to $175,000,000 Level

The amount of money spent in February for privately financed residential construction was only half of the monthly average needed to provide the volume of housing called for in the Wyatt Housing Program, the Construction Division of the Department of Commerce, said today.

Privately financed construction of all types in February totaled 462 million dollars, an increase of 11 per cent from January, with residential construction (exclusive of farm dwellings) rising 17 per cent from the January level to 175 million dollars in February.

Pointing out that the normal seasonal trend is a decline, since February is a short month, the Construction Division said that the contra-seasonal rise was encouraging, particularly in the case of residential construction.

The volume of private non-residential building in February also showed an increase over January (11 per cent), but privately financed public utility activity declined slightly (3½ per cent).

New construction of all types was valued at 547 million dollars in February, an increase of 7 per cent over January and of 90 per cent over February, 1945. Publicly financed construction, in contrast to privately financed, declined 10 per cent from January to 85 million dollars in February.

Data on new construction activity in February 1946, with comparable figures for January, 1946 and Feb., 1946, is illustrated. Figures represent joint estimates of the Department of Commerce and the Department of Labor.

NEW CONSTRUCTION ACTIVITY, CONTINENTAL UNITED STATES
(Joint estimates of the Dept. of Commerce and the Dept. of Labor)
(Millions of dollars)

The Tule Lake War Relocation Authority center will close tomorrow, Director Ray Best has disclosed.

POSTWAR AVIATION TOPIC OF LUNCHEON

Topics of the Wednesday meeting of the American Society of Mechanical Engineers to be held at noon in the El Jardin restaurant, 22 California street, will be "The Large Commercial Airliners of Today and Tomorrow."

Featured speaker will be J. E. Weesner, Division Engineer, Pacific-Alaska division, Pan American World Airways. Reservations should be telephoned to Paul Konston, EXbrook 5400, extension 390, before 3 p. m. today.

$400,000 Fire Razes Emeryville Plant Of Gardner Electric Co.

Twenty firemen were injured in the $400,000 blaze which ruined the one-story brick plant of the Gardner Electric company, 4227 Hollis street, Emeryville, last Saturday.

The fire, which is believed to have started in the electric ovens when transformers became overheated, spread rapidly through the building and threatened an entire city block before brought under control.

Cement Production Up 51 Percent Over 1945

Production of 9,633,000 barrels of cement in January, 1946, reported to the Bureau of Mines, Department of the Interior, was 51 per cent above that reported for January, 1945. This is the largest gain reported for January for many years.

Shipments of 7,391,000 barrels were 52 per cent above those reported for corresponding month of the previous year. This substantial gain reflects the increasing demands of construction industry. Mill stocks on January 31, 1946, of 18,668,000 barrels were 13 per cent below the January, 1945 figure.

Clinker production of 10,541,000 barrels in January, 1046, was 55 per cent above that reported for the corresponding month of 1945. In January, 1946, the industry operated at 47 per cent of capacity, whereas a year earlier only 31 per cent of capacity was being utilized. Clinker grinding activity has evidently increased greatly, for it not only has taken care of demands for current shipments but has at the same time added substantially to the stocks of finished cement.

Pre-Fab Builders Granted Priorities By Washington

The government has taken another step in providing veterans homes by granting priorities on building materials to builders of prefabricated homes.

Similar assistance had already been granted for construction of conventional type homes, the Civilian Production Administration said.

Both actions have been under the Veterans' Emergency Housing program, which fixes the top sales price of $10,000 for a house and maximum rent price of $80 a month. Veterans will have first chance to rent or buy the homes built.

Housing Administrator Wilson W. Wyatt and CPA Chief John D. Small, in a joint statement, said that hereafter producers of softwood plywood will be required to earmark 50 per cent of their output for home construction.

At the same time the OPA has granted price increases averaging 20 per cent to stimulate production of certain thicknesses and grades of softwood plywood needed in building.

#

COST ACCOUNTANTS TO COMPLETE FORUM

With the last session this evening at the IBM meeting room, the San Francisco chapter of the National Association of Cost Accountants will complete its series of 10 group discussions of "Standard Costs—Their Development and Use". Begun in October last year, these meetings were not a course of instruction but an open forum on all phases of the broad subject of "Standard Costs' as related to both manufacturing and construction industries.

The chairman of the program has been R. C. Jorgensen, vice president of the San Francisco chapter and assistant treasurer of Marchant Calculating Machine Co.

WASHDAY

can tell you a lot about your Water Heater

How does your water heater "size up" on washday? If family use of hot water in bathrooms or kitchen drains down your water heater so you must wait or do your laundry with luke-warm water, your water heater is too small.
Modern homes need a water heater with at least 30 gallons water storage capacity. • When you build a new or remodel your present home be sure to have your plumber "size up" your hot water needs according to the chart below.

How to "Size up" Hot Water Requirements
Minimum Recommendations for Normal, Average Hot Water Service.

Number Bathrooms	Number Bedrooms	Storage Capacity Gallons
1	1 or 2	30
1	3 or 4	40
2	2 or 3	40
2	4 or 5	50
3	3	50
3 or 4	4 or 5	75

Remember, too, a large size water heater costs very little more to operate. It more than pays for itself in worry-free hot water service for the whole family.

Fifty-sixth Year—Vol. 56— No. 55 SAN FRANCISCO, WEDNESDAY, MARCH 20, 1946 PRICE 15 CENTS PER COPY

PLANS and Speculations

Salinas: The memorial hospital association board of directors is contemplating setting up a hospital district to facilitate obtaining funds for new buildings. Under Senate bill 586 approved by Governor Warren last year, the project could be established as a hospital district and financed thru a bond issue.

oOo

San Francisco: The San Francisco Housing Authority has asked the city to apply for Federal funds to finance conversion of temporary Army and Navy barracks here into 2000 temporary family dwelling units for veterans and families. Units now used at Hunter's Point, Naval Receiving Hospital and Balboa Park are included in the conversion plans.

oOo

Washington: A war memorial stadium, similar to the large Rizal memorial stadium in Manila, is planned for the hallowed grounds of Okinawa. The athletic plant will include equipment for football, baseball, swimming, track, basketball, and many other games. The Okinawa memorial would be one of the first "memorials that live" for the dead of World War II, Col. Wm. S. Morris said.

oOo

San Francisco: A bill to authorize construction of extensions to San Francisco's Marine hospital was approved Monday by the House. It will provide for $3,500,000 in construction of additional dormitory wings, interns' quarters, laundry, garages and officers' quarters.

oOo

Fresno: Campaigning has begun for establishment of an agricultural extension to Fresno State College. J. E. O'Neill, chairman of the committee said $125,000 of the $500,000 sought has already been subscribed.

#

$100,000 LUMBER FIRE

A blaze of undertemined origin, Monday destroyed the main part of the Electric Planning Mills, Stockton, causing an estimated $100,000 damage to the plant which only recently opened after a year of inactivity. Lumber for more than 200 homes was being prepared by the mill.

For Better Building . . . New Building Products For Your Home

Manufacturers are planning a host of new items to include in the new home, which are either ready now for distribution or will be ready shortly, reports "Practical Builder", Chicago. Listed below are some of the very newest things which you may reasonably expect to include in homes now under construction.

A new basement incinerator is on the market which should provide a quick, sure, odorless way to burn all wet or dry garbage or refuse, and is particularly adaptable to gas or oil heated homes. Along this same line is a new wet-garbage incinerator which is used for efficient disposition of wet garbage and all kinds of rubbish and which dehydrates wet refuse as well as agitates packed-down paper for rapid burning.

A new miniature "venetian blind" type screening made of bronze wire is being produced. The purpose of the screening is to perform the combined services of awning and screens, permitting light and air to enter rooms, yet excluding the sun's heat and insects.

A "venetian blind" type window with slats of glass instead of wood or metal has also been announced. The "window" has the exact appearance of a venetian blind, but the salts, although movable like a blind, cannot be raised and lowered. Its purpose is to get maximum window ventilation, to make possible the simultaneous cleaning of both inside and outside of glass, and to provide weathertight seal against rain and snow.

A portable steam radiator which works on the same principle as permanent radiators is available for use in hard-to-warm areas. It can be carried from room to room, and works by simplv plugging in to the nearest electrical outlet.

A new type ventilator converts wind currents into a powerful suction force that rapidly exhausts stale air from the interior of the home. The ventilator is located in the roof and exhausts hot air from the attic while letting in fresh cool air through register openings.

These are just a few of the many new products that the building industry will soon have ready for you, says "Practical Builder". Keep your eyes on latest developments because they will be occurring continuously now that restrictions have eased.

GROOVER AND I

STRAY CATS

Every time there has been a meeting of the Big Three, it seems to produce bags out of which cats crawl at the most unexpected and embarrassing moments.

* * *

The latest "cat-out-of-the-bag" was released by Honorable Winston Churchill in his recent New York address. He stated that at the Potsdam Conference, Stalin was offered both wartime and peacetime passage-rights through the Dardanelles. He further stated that Stalin was not satisfied with this, but also wanted a fortress within the Dardanelles.

* * *

(By what right does the Big Three, three of a kind, three men on a horse or any other "three" sit in secrecy and portion out the rights of some other soverign nation—even such a "so-and-so" nation as Turkey?)

* * *

What ever became of the idea of "Open covenants, openly arrived at?"

* * *

Churchill did not state whether Stalin had been given this fortress within the Dardanelles—but Stalin has generally been given anything he has reached for—and this is probably another cat that will come out of the bag later.

* * *

How many cats will a bag hold—and how many bags are there?

BERKELEY TRUSS CO. APPOINTS SALES MGR.

Associated Wood Products Co., 1335 Sixth street, Berkeley, an independent company serving as fabricators and erectors of timber trusses, announce the appointment of Jack Godfrey as a partner and sales manager.

Mr. Godfrey has 12 years' experience in the timber truss business.

Since March 1, the firm has consisted of Leo Jacobson, Jerry Goldstein, Will Townes and Mr. Godfrey. J. F. Castelan is no longer a firm member, company officials stated today.

SACRAMENTO BUILDING PERMIT COVERAGE

Keeping pace with the rapid growth of the construction industry, the Daily Pacific Builder is pleased to announce today that it now publishes all building permits granted in the city of Sacramento.

These timely reports, transmitted each day direct to our editorial offices over a direct-wire teletype machine, bring our readers the latest, most accurate reports of the Sacramento building plans.

Metal Insulation Available Again

For the first time since before the war and carrying a new name, Reyn-o-met, formerly called Reynolds Metallation, is now available to the building industry in northern California and western Nevada.

This home insulation material is distributed by Western Asbestos Co., whose main office is in San Francisco, with branches in Oakland and Sacramento.

For the past 11 years, Western Asbestos Company has been associated with the Reynolds Metals Co. as a distributor in this area.

Two types of Reyn-o-met are obtainable: type "B" with foil mounted on both sides of heavy kraft paper, and type "C" with foil mounted on one side of heavy kraft paper.

Oakland Builders Elect Officers

At the March 12 election of officers, the Builders' Exchange of Oakland elected the following men: Hal Bennett, J. E. Carlstrom, H. J. Christensen, R. C. Fischer, Wm. J. Goodman, N. V. Heathorn, Don Kirby, Wm. E. McGrath, P. S. Ricker, C. H. Thrams, J. A. Turgeon, and John F. Tulloch.

At the reorganization meeting held Mar. 14, the board reelected the same officers for 1946, namely: Wm. E. McGrath, president; H. J. Christensen, vice president; P. S. Ricker, secretary, and J. A. Turgeon, treasurer.

OKAY McNARY DAM

WASHINGTON, Mar. 18.—The Senate Appropriations committee approved funds earmarked for flood control construction on the Willamette river and for construction on McNary dam, projects in Oregon.

Asiatic Excavations Prove Clay Pipe Nearly Six Centuries Old Still Good

While the peoples of the ancient world did not have such "improvements" as the atomic bomb, radar that hits the moon, and airplanes that swish from coast to coast in a matter of minutes, nevertheless they did possess some of the basic necessities that we have today.

Mr. and Mrs. John Q. Citizen, 1946 model, have nothing on the folks who lived in Babylonia some 5000 years ago. This clay pipe—a forerunner of today's highly improved product—was used as a house sewer back in 3100 B. C. It was still in useable condition when unearthed by an historical expedition a few years ago.

Another photographic bit of evidence that clay pipe stays on the job a mightly long time is this photo of jar pattern clay pipe used as part of a house sewer system 2100 years ago. It was uncovered in the ruins of Parthia.

Among these, surprisingly enough, was clay pipe.

Away back in 4500 B. C. . . 6400 years ago . . the necessity for sanitation was already beginning to be recognized. Excavations at Nippur, one of Babylonia's ancient cities, have revealed clay pipe drains with "T" fittings laid in an arched aqueduct of bricks.

AS GOOD AS NEW

The pipes appear to be just as good now as when the workmen laid them centuries ago. American expeditions to Chaldea, where civilization as we know it, had its birth, have discovered that subjects of King Nimrod, the mighty hunter, realized the need for greater cleanliness in their temples, palaces and dwellings.

And so, 5700 years ago they equipped their buildings with drains of clay pipe. Those of the pipes that have been dug up are as perfect as the day they were put in place.

USED IN PALACE

Another instance of the use of clay pipe recorded by historians was on the island of Crete. In the palace of a Sea King at Grood Knossos there has been uncovered an amazing system of clay pipe sanitary drains installed about 3,500 years ago. Sections of this ancient pipe have been unearthed and are exhibited by museums in perfect condition.

All of the ancient civilizations, historians claim, used clay pipe and examples have been found in Egypt, Rome, Greece and China in addition to those mentioned above.

And this clay pipe, used in the early centuries, still remains in perfect condition, even though it did not have the dense, hard vitrified body made possible with today's modern powerful presses and the intense heat of present-day kilns.

DIRECTORS ELECTED BY S. F. B. EXCHANGE

At an election of the San Francisco Builders' Exchange held Monday, the following directors were elected:

A. I. Bos, Al W. Cobby, A. F. Edwards E. J. Finnerty, Chas. E. Gordon, E. E. Hundley, G. H. Martinelli, H. N. Patterson, E. H. Patterson, George W. Reed and A. H. Wilhelm.

Construction Field Unaffected By New Wage Laws

The new wage regulations issued last week permitting employers to reserve their right to ask post approval of wage increases by filing a notice with the Wage Stabilization Board, do not apply to the construction industry, Thos. Fair Neblett, Chairman of the 10th Regional WSB, said today.

The building and construction industry still remains under wartime controls requiring prior approval of all wage increases by the Wage Adjustment Board in Washington, D. C.

Neblett pointed out that previously any increases for other businesses made after March 15 without prior WSB approval could never be used as a basis for increasing prices or cost to the government. On increases made on or before Feb. 13 and Mar. 14, however, employers could apply, within a 30-day period after effecting the increases, for post approval.

Under the new regulation employers who grant wage or salary increases and have no present intention of using the increases as a basis for seeking higher price ceilings may put the raises into effect without advance WSB approval and still protect their future right to seek price relief merely by filing notice describing the nature, number and amount of the pay increases with the FSB within 30 days after the increases appear on the payroll.

"If at some later date the employer decides to seek price relief he must first secure WSB approval of the wage rise," Neblett said. "The WSB has authority to approve the increase for pricing purposes in whole or in part, or may deny the application. If approval is granted, the OPA will then consider his application if he shows a reasonable ground for the change in his original intention."

In filing notices, employers are asked to file two copies, one which will be noted "received" and returned to the employer for his files.

Copies of the new wage price regulations and an interpretive question and answer bulletin are available at the Regional WSB offices in San Francisco and Los Angeles.

3/20/46 ** 2
PLANNED
UNDERGROUND GARAGE Cost Over $1,000,000
SACRAMENTO, Sacramento County, Calif. City Plaza, 9th, 10th, I and J Sts.
Convert the City Plaza into an underground garage, including two underground floors served by ramps to accommodate nearly 1000 cars; modernize and plant surface of park, etc.
Owner—Directors of a corporation now being formed.
Architect—Harry J. Devine, 624 R St., Sacramento.

Plans for the project were announced by George C. Conover, manager of Hale Bros. department store, 9th and K Sts.; Willard H. Davis, manager of Hotel Sacramento, 10th and K Sts., and Chris R. Jones, president of the real estate firm of Jones, Brand & Hullin, Inc., 803 J St., representing a large group of Sacramento merchants and other citizens. While the project would be privately financed, the title to the entire undertaking would at all times remain in the city. Tentative plans call for a long-term lease, probably 25 years, of the plaza. When the project has been entirely paid for, it will become the sole property of the City of Sacramento.

3/20/46 **
CONTRACT AWARDED
INYOKERN, Kern Co., Calif.—Haddock Engineers, Ltd., 129 W. 2nd St., Los Angeles, at $846,809, awarded contract by the U. S. Navy, Bureau of Yards and Docks, Washington, D. C., for the construction of miscellaneous buildings, paving and utilities in Area "K," hangar No. 2 (Yakutat), paving and utilities and a supersonic building and appurtenances thereto at the U. S. Naval Ordnance Test Station, Inyokern; Spec. 17379, NOy 13211.

TO HOME BUILDERS . . .

Now is the time to secure your choice of building sites in a restricted tract of the finest view property available on the Peninsula.

Tract consists of 10 acres in the city of San Mateo and 55 acres in the town of Hillsborough subdivided into 69 beautiful building sites. They range from 1/4 acre to 4 acres; priced from $2,750 to $13,600 including improvements.

Present prices are subject to sharp advancement upon completion of improvements; when unsold sites will be extensively advertised to the public.

Engineering is now being completed for streets, sewers and water system; work is scheduled to start during May of this year.

Property can be inspected by appointment by calling

Frank Ashby, Owner, at MArket 1230

BIDS OPENED 4

LOS ANGELES, Calif.—Guy F. Atkinson Co., 1103 Heartwell Building, Long Beach, at $992,000 submitted the low bid to the U. S. District Engineer Office, 751 S. Figueroa St., Los Angeles, March 18, for construction of Los Angeles river improvements, Aliso St. to Alhambra Ave., river mile 22.2 to river mile 22.9; Serial 149.

The project involves the construction of 4100 lin. ft. of river channel improvements and appurtenant work. The channel improvement consists of construction of reinforced concrete slope paving on the riverbanks, with parapet walls and berm paving at the top. Concrete pier extensions and connecting walls will be built for the Union Pacific and Southern Pacific bridges. Other work includes the replacemnet of wooden subdrain riser hoods in the invert with cast iron hoods, construction of fencing on channel walls, and the installation of corrugated metal pipe drains with appurtenant concrete outlet structure. Principal features of the work include: Clearing site and removing obstructions; excavating and backfilling; driving steel bearing piles; constructing reinforced concrete slope paving, berm walls and pier protection; side drainage structures and pipe, and fencing.

The bids will be taken as follows:
(1) lump sum, clearing site and removing obstructions;
(2) 72 lin. ft. pulling or cutting off steel sheet pile wall;
(3) 117,300 cu. yds. channel excavation;
(4) 1840 cu. yds. structure excavation;
(5) 34,320 cu. yds. rock excavation;
(6) 4850 cu. yds. rock excavation;
(7) 6700 cu. yds. crushed gravel or crushed rock backing;
(8) 460 cu. yds. grave lin pockets and drains;
(9) 738 each cap for steel bearing piles;
(10) 240 lin. ft. steel bearing piles, vertical;
(11) 21,900 lin. ft. steel bearing piles, batter;
(12) 50 each splicing steel bearing piles;
(13) deleted;
(14) 350 cu. yds. concrete, invert;
(16) 312 cu. yds. concrete slope paving toe;
(16) 11,080 cu. yds. concrete slope paving;
(17) 6540 cu. yds. concrete footings for walls and pier extensions;
(18) 5470 cu. yds. concrete walls and pier extensions;
(19) 800 cu. yds. concrete berm paving and misc. structures;
(20) 2,625,000 lbs. steel reinforcement bars;
(21) 13,000 lbs. steel reinforcement fabric;
(22) 4010 each expansion joint sleeves
(23) 980 each cineh anchor;
(24) 72 lin. ft. 8-in. corrugated metal pipe;
(25) 40 lin. ft. 12-in. same;
(26) 82 lin. ft. 15-in. same;
(27) 40 lin. ft. 18-in. same;
(28) 40 lin. ft. 24-in. same;
(29) 50 lin. ft. 30-in. same;
(30) 19 lin. ft. 42-in. same;
(31) 5 each 8-in. automatic drainage gate;
(32) 5 each 15-in. same;
(33) 6833 lin. ft. channel fencing;
(34) 4350 lbs. misc. metal work;
(35) 27 each subdrain hoods;
(36) 36,200 bbls. portland cement;
(37) 33,000 tons salvaging and placing derrick stone;
(38) 80,000 ton miles hauling derrick stone;
(39) 4500 sq. ft. ¼in. fiber expansion joint filler;
(40) 350 sq. ft. ½-in. fiber expansion joint filler;
(41) 12,000 sq. ft. 1in. fiber expansion joint filler.

Total bids were:
(A) Guy F. Atkinson Co., $992,000.
(B) Bressi & Bevanda Constructors, Inc., Los Angeles, $995,586.40.
(C) Basich Bros., Alhambra, $1,113,-209.85.

BIDS POSTPONED

CENTRAL VALLEY PROJECT, California.—Until April 10, 10 A. M. (postponed from March 29), bids will be received by Bureau of Reclamation, Walker R. Young, chief engineer, Friant, Calif., under Spec. 1181 for construction of earthwork, canal lining and structures, King's River wasteway and King's River siphon, Station 1591 plus 66.15 to Station 1647 plus 75, Friant-Kern Canal, Friant Division, Central Valley Project. The work is situated approximately 18 miles east of Fresno.

The principal items of work and the estimated quantities involved are as follows:
(1) 237,500 c.y. common excavation for canal;
(2) 193,000 c.y. rock do;
(3) 5,500 c.y. compacting embankments;
(4) 40,000 c.y. common excavation for wasteway channel;
(5) 100 c.y. rock do;
(6) 35,000 c.y. common excavation for struc. except siphon barrel;
(7) 300 c.y. rock do;
(8) 200,000 c.y. common excav. for siphon barrel bet. Sta. 1596 plus 88.9 and 1627 plus 41.36;
(9) 100 c.y. rock do;
(10) trimming 6,100 s.y. earth foundations for concrete lining;
(11) preparing 16,000 s.y. of rock do;
(12) 16,300 c.y. backfill about struc.;
(13) 122,000 c.y. backfill about siphon barrel;
(14) 6.200 c.y. compacting backfill about structures;
(15) 6,100 c.y. riprap;
(16) constructing 265 c.y. filter;
(17) constructing 1,250 l.f. of feeder drain;
(18) constructing 1,150 l.f. of 6-inch dia. tile drains with uncemented joints;
(19) 4,325 c.y. concrete in struc.;
(20) 21,600 c.y. concrete in siphon barrel;
(21) 2,070 c.y. concrete in canal lining;
(22) placing 3,944,000 lbs. reinf. bars;
(23) placing 785 s.f. elastic joint-filler material;
(24) placing 280 l.f. rubber water stops;
(25) installing 360 l.f. clay pipe in filters;
(26) installing 8,700 lbs. of cast-iron pipe in filters;
(27) layng 66 l.f. 12-in. diam. cement-asbestos pipe;
(28) erecting 250,000 lbs. structural steel in highway bridge;
(29) placing 79,500 lbs. of metal water stop in joints;
(30) erecting 11 M. ft. b.m. tmber in railings;
(31) installing 61,000 lbs. radial gates
(32) installing 42,200 lbs. radial-gate hoists and operating and control mechanisms;
(33) installing 10,930 lbs. cylinder gate, gate frames and hoist;
(34) installing 11,900 lbs. of misc. metal work;
(35) installing 125 cwt. of bit. material in float drums;
(36) installing 1,400 l.f. of electrical conduits;
(37) installing 550 lbs. of electrical conductors and ground wires;
(38) installing 600 lbs. electrical apparatus;
(39) constructing 0.75 mile barbed wire right-of-way fence;
(40) constructing 0.20 mile of comb. barbed-wire and woven-wire right-of-way fence;
(41) constructng two cattle guards.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; R. K. Durant, Acting Construction Engineer, Friant Calif., and Michael W. Straus, Commissioner, Bureau of Reclamaton, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for copies of the specifications and and drawings; to others, $2.50 per copy, not returnable.

PLANS and Speculations

Terra Bella: Ferris R. Sherman of the Tulare County Housing Authority, has explained plans for erecting temporary veterans housing here, consisting of 10 to 12 apartment units and designed to relieve the housing shortage. The meeting was sponsored by the Terra Bella-Ducor Chamber of Commerce.

oOo

Chico: Improvements in eight local creeks, all tributaries of the Sacramento river, are being sought in an appropriation bill before Congress as part of a flood control project. Improvements in these waterways would cost nearly $500,000. Creeks considered are Chico, Butte and Antelope creeks, Cherokee canal. Elder, Deer, Thomes and Willow creeks.

oOo

Eureka: Because of the recent edict of the State Board of Public Health, to end dumping of untreated sewage into California waters, Eureka may be forced to construct a sewage disposal plant. A sum of $180,000 would be appropriated under the recent State appropriation bill to cover partial expense, Mayor John Ryan said.

oOo

Truckee: State engineers are making a survey of a proposed new main street preparatory to determining costs, etc. The California Highway Commission has allocated $50,000 for the job.

oOo

EXPAND COVERAGE IN SACRAMENTO COUNTY

In addition to publishing a complete list of the building permits granted in the City of Sacramento, service which started yesterday, Daily Pacific Builder is pleased to announce today that publication of building permits granted in the County of Sacramento and the City of North Sacramento have been added to our regular news features.

GROOVER AND I

THIS AND THAT

Outside the realms of politics and diplomacy, business, commerce, and agriculture, Henry A. Wallace is a very remarkable person. Among his hobbies is boomerang-throwing—a hobby requiring high courage by a man in public office.

* * *

Mr. Wallace recently referred to Mrs. Eleanor Roosevelt as the "First Lady of the World." It is encouraging to know that at last some one man speaks for the entire world. Contesting for this job started a sizeable war about seven years ago.

* * *

Mrs. Roosevelt has a well paid Federal job with UNO, which also supplies her with copy for her highly profitable newspaper column. What a break!

* * *

Mrs. Roosevelt recently applied to Moscow for permission to enter as a working reporter. It will be interesting to know if Mr. Stalin permits her to see anything beyond the stage-set, officially conducted tours.

* * *

The Big Itch: Whatever became of Harold L. Ickes, the vociferous secretary without whom the Interior Department seems to get along very well?

* * *

On the Town: When people are out making the rounds of night spots, prowling the drinkeries, etc., it is referred to as "pub-crawling".

* * *

"Pub-crawling" sounds sawdustish — why not try "BAR-STOOLING"?

Paper Shortage Is Gypsum Bottleneck, Declares Schweim

CHICAGO, Mar. 19.—The lack of sufficient quantities of gypsum board paper is the primary reason why a critical shortage of gypsum board and lath exists today, according to Henry J. Schweim, Executive Secretary of the Gypsum Association.

Schweim said that: "the gypsum industry, which is operating at a point considerably below peak capaciyt, could swing quickly into full production and turn out sufficient materials for 1,000,000 homes a year if paper could be obtained by the manufacturers of gypsum board products."

"The paper shortage is out bottle-neck," he said. "Some paper manufacturers do not find it profitable to manufacture gypsum board paper and we, therefore, are unable to secure enough paper to satisfy the needs of our industry."

Schweim stressed that there is no shortage of gypsum or of facilities and that manpower for manufacturing gypsum products is adequate.

"Gypsum plaster, which includes about 95 per cent of our building plaster, is plentiful," he said, "and so are other gypsum products that do not require liner paper.

Approve Valve Simplified Practice

A proposed Simplified Practice Recommendation covering automatic regulating valves, widely used in industry, which was submitted to producers, distributors and users last November by the National Bureau of Standards, has been approved for promulgation effective on new business from Apr. 1, according to the Department of Commerce.

Automatic regulating valves are used in industry for controlling temperature, pressure, level or rate of flow of fluids. The purpose of the recommendation — R219-46, Automatic Regulating Valves—is to establish as a useful standard of practice in the industry a simplified list of pressure ratings and sizes of seven types of valves made of steel, iron and bronze.

Mimeographed copies of R219-46 may be obtained without cost from the Division of Simplified Practice, National Bureau of Standards, Washington 25, D. C.

PAUL R. WILLIAMS TO SPEAK TODAY

Paul R. Williams, architect of Los Angeles, will be the speaker today on "The House I Want" series to be given at the Twentieth Century Club in Berkeley at 10 a.m. and the San Francisco Museum of Art at 2:30, p. m. Mr. Williams is internationally prominent and is the author of today's best seller in the field of home planning books.

He is currently engaged in designing a number of hotels located in resort areas from Las Vegas, Nevada to Bogota, Columbia. Mr. Williams was guest of honor of the Northern California Chapter of the American Institute of Architects at a luncheon meeting held at the Palace hotel yesterday.

New Light-Weight Concrete Block

Marking the addition of another major building material to its list of products either manufactures or distributed, the Kraftile company of Niles, this week announced the availabality on approximately May 1, of "Kraftlite" light-weight concrete blocks.

"Kraflite" blocks will represent controlled quality manufacture of structural units long-established in the building industry and which have recently gained in popularity in California. They are inexpensive, fire-proof, and termite-proof, and can effect savings in construction because they eliminate the cost of forms. The blocks will be manufactured of batched aggregates and pure light-weight pumicite.

James Crawford, vice president of Kraftile, will be in charge of the "Kraftlite" division and will supervise distribution to the San Francisco Bay Counties area.

Foamglas Furnace To Increase Output

The Pittsburgh Corning corporation has announced a $300,000 expansion of existing facilities for the manufacture of Foamglas, a glass insulation material, at its Port Allegany, Pa., plant.

Construction of a new plant to house a melting furnace will begin as soon as weather conditions permit. Additional buildings designed to house batch handling and cullet crushing equipment will be erected at the same time.

Refinements in manufacture have lightened the weight of the material, it now being 15 parts air and one part glass. It is vermin and rodent proof and totally unaffected by water.

Because it is so light and impervious to water, it found many wartime uses as the buoyant element in life rafts, net buoys and other heavy floatation equipment.

Widespread use of the product in private housing and commercial and industrial plants has resulted in the current expansion at the Port Allegany plant.

Did You Know That . . .

William Wilson Wurster, Theodore C. Bernardi and Donn Emmons, local architects, have established the firm of Wurster, Bernardi and Emmons, 402 Jackson street, San Francisco. Telephone EXbrook 8918.

—O—

Calvin Wood, formerly with the Spencer Curtis advertising agency, has opened an agency at 617 Montgomery street.

—O—

Ens. Gilbert Edwards last week replaced Lt. Comdr. Morris Lustbader as Resident Officer in charge of construction at the Alameda Naval Air Station.

—O—

Newell Farrar, advertising and publicity chief of the local War Assets Corporation, has resigned his position to go into business for himself. His office will be in Room 825, Rialto Bldg., San Francisco.

American Institute of Architects Diagnoses Rising Building Costs

The American Institute of Architects has made a penetrating analysis of the abnormal factors which enter into the present building costs. The cost of building construction, says the Institute, has continued to increase in the past few months and will be a serious deterrent to any housing program. The statement continues:

We do not believe that these increased costs are due to profiteering, for the industry is highly competitive, yet the present cost level cannot be understood in terms of present prices for labor or material. In our opinion, there are three primary factors involved:

(a) Uncertainty, as to future regulations concerning the flow of materials by re-imposition of priorities and other changes of government policy, is a serious factor. Not knowing what to expect, it is only natural that sub-contractors and contractors try to protect themselves by making allowances for unforeseen contingencies. A definite and continued policy should be announced at an early date, in order to remove uncertainty.

(b) The inadequate production of building materials is much more serious than the price. O.P.A., by maintaining excessively low price ceilings on a number of building materials, has vastly increased the cost of the finished building to the consumer. The lack of two or three critical items may tie up a whole project and result in increased cost of the project many times more than the increased cost that would have resulted from paying a fair price for these materials.

(c) Low productivity of existing labor supply. A partial answer to the low productivity of labor may be found in the disorganized conditions which exist in the industry as a result of material shortages, but this is insufficient to explain the present low output of labor. It is to be hoped that labor will see the wisdom of removing restrictive practices, at least for the duration of the present emergency when they are not needed to spread employment. Public opinion will be sympathetic of labor cooperates in the effort to increase productivity.

#

Kaiser Shipyard Portland Dormitories Declared Surplus

In a move to aid in overcoming the present shortage of housing and building materials in the United States Maritime Commission today declared as surplus to the War Assets Corporation, 16 dormitory units located at the Government-owned Swan Island shipyard of the Kaiser Co., Portland.

The dormitories, designed to house unmarried shipyard workers, have a total capacity of 2,048 individuals. Each unit consists of two buildings, two stories in height with 16 rooms on each floor for a total of 64 rooms to the unit. The two buildings are connected with a concrete wash room and heating plant.

A proposal of the Kaiser Company to dispose of the dormitories and restore the premises will be transmitted to War Assets with the surplus declaration.

IMPROVE OLYMPIC BLVD., LOS ANGELES

LOS ANGELES, Calif.—T. E. Sherlock, 1303 W. 40th St., Los Angeles, submitted the low bid to the Los Angeles Board of Public Works, 153 City Hall, Los Angeles, March 6, at (Alt. 1) $299,453.81, (Alt. 2) $235,960.30, (Alt. 3) $302,340.53, (Alt. 4) $238,847.53, for the grading, paving and otherwise improving Olympic Blvd., between Park View and Western Ave.; a cash contract.

The work involves:
(1) lump sum bids for the removal of: 161,000 sq. ft. of pavement and gutter; 25,500 sq. ft. of burning pavement; 16,000 ft. of curb; 91,000 sq. ft. of sidewalk and drives; miscellaneous foundations, walls, trees, etc.;
(2) lump sum for grading:
  (a) for disintegrated granite sub-base, where sub-base is required, 21,500 cu. yds. of excavation and no fill;
  (b) for select material sub-base, where sub-base is required, 22,400 cu. yds. of excavation and no fill;
(3) 72.124 sq. ft. of prepared sub-base;
  (a) per sq. ft. for disintegrated granite sub-base, 8-in. thick;
  (b) per sq. ft. for select material sub-base, 12-in. thick;
(4) 5136 tons asphalt concrete wearing surface, including trench resurfacing;
(5) 13,426 tons asphalt concrete base, including trench resurfacing;
(6) 1142 tons rock and oil roadway;
(7) 85,523 sq. ft. concrete pavement, 8-in. thick;
(8) 1655 sq. ft. concrete pavement, 6-in. thick;
(9) 822 sq. ft. concrete pavement, 4-in. thick;
(10) 148 sq. ft. class C resurfacing;
(11) 1967 lin. ft. type A curb;
(12) 334 lin. ft. type B curb;
(13) 8815 lin. ft. type D curbs;
(14) 2275 lin. ft. monolithic curb;
(15) 44 lin. ft. curb as per plan;
(16) 2275 lin. ft. curb armor;
(17) 8815 lin. ft. curb bar;
(18) 50,303 sq. ft. sidewalk, 3-in. thick
(19) 2810 sq. ft. sidewalk, 4-in. thick;
(20) 11,600 sq. ft. sidewalk, 6-in. thick
(21) 11,897 sq. ft. monolithic sidewalk;
(22) 4435 sq. ft. gutter, 6-in. thick;
(23) 448 sq. ft. gutter, 8-in. thick;
(24) 256 lin. ft. roof drains;
(25) sanitary sewer complete, not including house connections;
(26) 2 manholes, complete;
(27) reconstruct manholes as required, including new frame and cover sets (26 units);
(28) 869 lin. ft. 6-in. house connections;
(29) storm drain and appurtenances, complete;
(30) 9 units reset manhole frame and cover sets;
(31) electrolier lighting system, complete;
(32) electrolier lighting conduit cross- and appurtenant work, complete.

Altrnate No. 1—Items 1, 2a, 3a and 4 to 31, inclusive.

Alternate No. 2—Items 1, 2a, 3a, 4 to 30, inclusive, and item 32.

Alternate No. 3—Items 1, 2b, 3b and 4 to 31, inclusive.

Alternate No. 4—Items 1, 2b, 3b and 4 to 30, inclusive, and item 32.

The total bids were:
(A) T. E. Sherlock, (Alt. 1) $299,453.81, (Alt. 2) $235,960.30, (Alt. 3) $302,340.53, (Alt. 4) $238,847.53.
(B) Warren Southwest, Inc., (Alt. 1) $314,620, (Alt. 2) $243,720, (Alt. 3) $318,089.34, (Alt. 4) $247,189.34.
(C) Griffith Co., (Alt. 1) $326,286.30, (Alt. 2) $252,571.30, (Alt. 3) $329,765.15, (Alt. 4) $256,050.15.
(D) R. A. Wattson Co., (Alt. 1) $336,863.45, (Alt. 2) $263,369.45, (Alt. 3) $338,142.21, (Alt 4) $264,648.21.
(E) engineer's estimate (Alt. 1) $296,580.27, (Alt. 2) $236,740.27, (Alt. 3) $299,453.99, (Alt. 4) $239,613.99.

OVERHEAD CROSSING, LOS ANGELES

LOS ANGELES, Calif.—As previously reported, Oberg Bros., 401 W. Redondo Blvd., Inglewood, at $264,297.30, submitted low bid to G. T. McCoy, state highway engineer, 808 State Bldg., Los Angeles, for the construction of a structural steel overhead crossing with graded approaches, surfaced with asphalt concrete, on Anaheim St. approach road to Terminal Island Freeway, at Nicholson Ave., Los Angeles, VII-LA-Terminal Island. This is a national defense contract.

Work involves:
(1) 10 c.y. remove concrete;
(2) 5 acres clear and grubb;
(3) 100 c.y. rdwy. excav.;
(4) 3,100 c.y. struc. excav.;
(5) 15,000 l.f. vertical holes sand drains;
(6) 2,000 tons sand backfill, sand drains;
(7) 75,000 tons import borrow;
(8) 3,700 tons import subgrade material;
(9) 3,850 sq. yds. prepare Class C subgrade;
(10) develop water supply and furnish water equipment;
(11) 700 M. gals. apply water;
(12) finish roadway;
(13) 1,560 tons asph. concrete;
(14) 2 tons asph. emulsion, seal coat
(15) 1,468 c.y. Class A portland cement conc. struc.;
(16) 682,000 lbs. furnish struc. steel;
(17) 682,000 lbs. erect do;
(18) 12,200 l.f. furnish Douglas fir piling;
(19) 244 each drive timber piles;
(20) 1,325 l.f. furnish steel piling;
(21) 20 each drive steel piles;
(22) 10 each steel pile splices;
(23) 210 c.y. portland cement conc. curbs and gutters;
(24) 2,900 l.f. chain link fence;
(25) 350 l.f. 48-in. reinf. conc. pipe, standard strength;
(26) 80 l.f. 48-in. reinf. concrete pipe 2000-D;
(27) 200 l.f. 15-in. plain conc. pipe;
(28) 188,000 lbs. furnish bar reinf. steel;
(29) 188,000 lbs. place do;
(30) 3,200 lbs. misc. iron and steel;
(31) 3,000 each Mesembryanthemum Edule cuttings;
(32) 1,201 l.f. steel railing;
(33) electrical equipment;
(34) 124 each 9.5 ft. 16 gage stringers
(35) 44 each 9.5 ft. 14 gage do;
(36) 12 each, 9.5 ft. 12 gage do;
(37) 7 each 5.2 ft. 16 gage spacers;
(38) 75 each 9.6 ft. 14 gage do;
(39) 5 each 5.2 ft. 16 gage bottom spacers;
(40) 8 each 96 ft. 14 gage do;

PLANS and Speculations

Woodland: The city council has agreed to present a resolution calling for the construction of 48,099 feet of curb and gutter within the city limits, Mayor Henry Anderson announced. Cost of the project has not been determined.

oOo

Reno: Allotment of 50 additional temporary housing units for veterans in Reno has been authorized by the Federal Public Housing Authority headquarters in San Francisco, Langdon W. Post, regional director, announced.

oOo

Napa: Property owners of the Park avenue district, north of the present Napa Junior College, have protested the school trustee's plan of acquiring property, on which their homes are built, for the proposed enlargement of the college.

oOo

Red Bluff: Two Army engineers from Sacramento have inspected the Sacramento river channel here as part of a preliminary survey to determine work which must be done. $150,000 has been allocated for the job. The engineers were conducted on the tour by D. C. Conway, Los Molinas engineer. According to Conway, they expressed the belief work should commence at once.

Add Steve D. Bechtel To Advisory Board of National A.G.C.

The Associated General Contractors of America, Inc., through its National President, Warren Belleows of Houston, and his Executive Committee has appointed Steve D. Bechtel of Bechtel Bros. & McCone Co., local contractors, as a member of the Advisory Board of the National A.G.C.

Members of this Board are selected from the leading general contractor firms of the United States.

Mr. Bechtel is an engineer and contractor nationally known and his firm's outstandly successful operation in war construction were a matter of nation-wide comment.

The firm originally came into prominence as one of the Six Companies who built the great Boulder Dam, which was considered such a great accomplishment in its day.

During the war this firm undertook and successfully carried out many building and heavy construction jobs not only in this country—but in distant countries, such as Arabia. The firm is a member of Central California Chapter, of The Associated General Contractors of America, Inc.

W. A. Bechtel, Sr., now deceased, was one of the several important cotractors who founded The Associated General Contractors of America 26 years ago.

GROOVER AND I

SIR! SALUTE! SALAAM!

The Commies and Fellow Travelers are working on a project to break down the morale and discipline of our fighting forces. It goes by the reasonable sounding name of eliminating the "caste" system in the Army — or what's the difference between a Colonel and a Corporal?

* * *

The idea being that the Commander - in - Chief and the Chief Gunner, the Palace Guard and the Stable Guard should share the same tent and chow. Any Army man who has taken his job seriously knows such an idea is just bushwa.

* * *

Our late Commander - in - Chief, Franklin D. Roosevelt, was a firm believer in the designation of rank and authority which is being protested as "caste". It was he who sponsored the rating of "Private, first-class", which is slicing it very thin.

* * *

The argument is advanced that rank and distinction is not democratic. Well, who said it was? War isn't democratic, either!

* * *

Unless we are civilized enough to settle our differences through some process of organized reason, such as UNO, war is a good way to protect frontiers and your institutions.

* * *

Of course there have been mistakes and abuses. This was inevitable when, in a peace-loving and non-military nation you hastily herd together a fighting force of eleven million.

* * *

An Army's objective is to win a war—we seem to have done that. Now are we able to make secure the Peace?

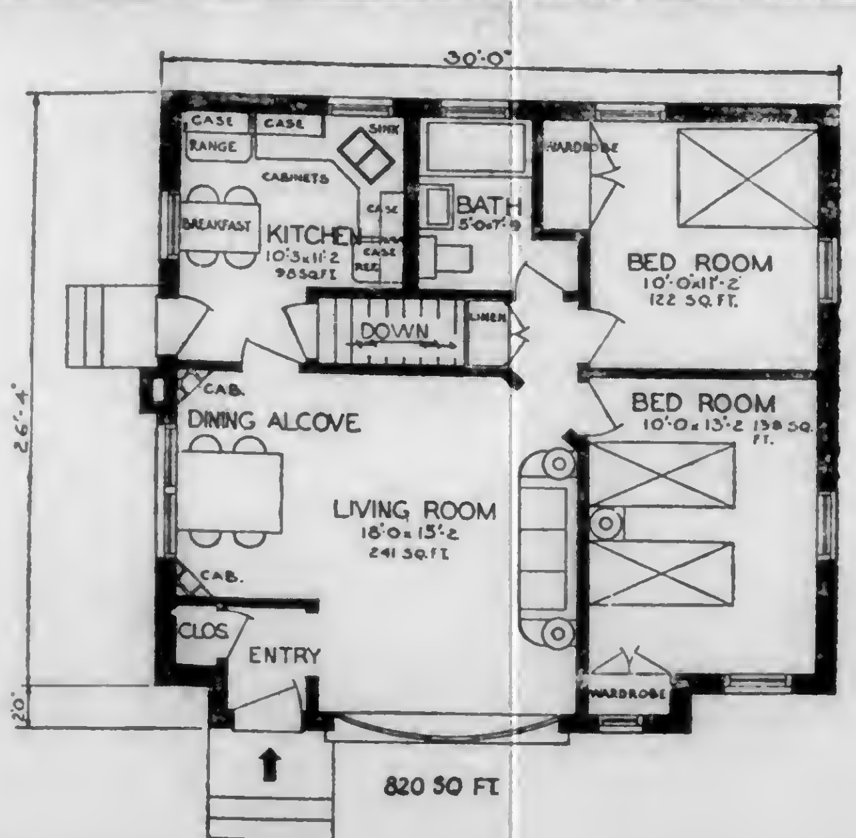
PARAFFINE TO MERGE

Stockholders of the Schumacher Wall Board Co., Monday approved the proposed merger with the Paraffine Companies, Inc., at a meeting of stockholders in South Gate.

Urge New Industries To Move Here

IDEAL SMALL HOME FOR VETERANS



Compact Design Has Many Fine Features

Practical Builder's home of the month is important in these days of rising costs because the design and lines are simple, straightforward and compact. The plumbing is in one wall and cross ventilation is provided in all rooms. The plan can be varied to a story and a half by moving the linen closet into the bathroom and installing a stair to the second floor, which would give space for a den, large bedroom and additional bath, if desired.

The living room with dining room "L" is well designed for furniture placing and will accommodate full sized dining room table and chairs in the alcove. Corner cabinets provide space for linen and dishes. The framing is simple and economical. Outside walls are a buff or white brick and the trim is white, with shutters of blue-gray.

The kitchen arrangement is simple. The space beneath the corner cabinet which is usually wasted is utilized for the sink location with a window adjacent. Cabinets on either side are easily reached, as are refrigerator and range. Breakfast space is ample, pleasantly situated under the window.

Although this is a minimum house, providing the greatest amount of living space for the smallest amount of cost, its design avoids the rubber-stamp monotony of run-of-the-mine low cost housing, claims "Practical Builder" Chicago.

MORE HOMES FOR VETS

President Truman has asked Congress to appropriate $253,727,000 more to buy an additional 100,000 temporary homes for returning veterans.

CALIFORNIA FAIR LIST AVAILABLE AT NO COST

California is reconverting at a very satisfactroy rate as far as her fairs, fiestas, rodeos and other colorful events are concerned, according to the Travel and Recreation Committee of the California State Chamber of Commerce.

For the first time since the end of 1942, the Travel and Recreation Committee of the California State Chamber of Commerce is issuing as complete a bulletin of these and all of the other colorful events which have made California noted throughout the world. This first list covers some 200 events. Copies of this list may be obtained free of charge at any of the State Chamber offices, or upon written request.

HONDURAS TIMBER

Twelve thousand acres of virgin timber land in the Chamelecon Valley, Honduras, has been purchased by a United States firm and a 50-year lease has been taken on 60,000 adjoining acres, according to the Department of Commerce. A sawmill with capacity of 25,000 board feet a day will be erected. It is expected that large amounts of the lumber produced will be exported.

Publicity Campaign To Lure Commerce To Bay Region; Building Boom Promised

The San Francisco Chamber of Commerce, in cooperation with chambers of commerce of cities within the 11 surrounding counties, has launched an intensified campaign to bring more new industry to the Bay Area and surrounding territory.

The announcement was made Thursday morning by Alfred H. Meyer, chairman of the Industrial Committee of the local chamber, at a press conference in the chamber building, on Pine street.

"The new program", G. Lewis Fox, manager of the Industrial Department, said, "is a regional project to get people to come to this area. Then, after they have discussed their problems with us, we will turn them over to the local chambers who can best fill their needs."

"There is very little available factory space in this area," Fox said, "and probably 3½ or 4 million feet of floor space will be needed. We aim to put over the thought that construction costs for commercial building have risen some, but have not skyrocketed like in the home building industry," he said.

There are several sources of new business, Fox pointed out, all of which may mean a boom in the already busy construction industry.

The chambers will: urge expansion of present facilities of manufacturers located here; assist the conversion of war-time plants to present needs; encourage large eastern concerns to establish branches here in the most centrally located part of the West Coast; help industries to use products grown here to expand or develop new business; and will invite new businesses based on inventions and developments to locate in this active growing area.

"Henry Kaiser wanted a factory here containing 1,200,000 feet of floor space but we did not have any building which would fit his needs," Fox said.

The western market is now sufficient to lure new business here, and San Francisco is an ideal outlet and port for the potential business in the Orient.

To sell this plan the Chamber of Commerce has published a comprehensive survey of Bay Region industrial factors. The brochure, printed in three colors and costing over $20,000, is profusely illustrated with maps, photographs, charts and diagrams to convey the wealth of opportunity in this area for new industries.

One chapter, "Sites and Buildings," shows how, within the 11 counties, a factory site to fit almost any need can be found, and lists the varied industries now in operation within the area.

A copy of the survey is on file in the Daily Pacific Builder office, 465 Tenth street.

Hold Funeral Today For H. D. Dewell, Bay Engineer

Funeral services will be held today at 3 p. m. in the chapel of the Oakland Crematory for Henry Dievendorf Dewell, 64, prominent Bay engineer, who died Wednesday in Berkeley.

Mr. Dewell during the past 30 years had been connected with many important engineering projects on the West Coast, and thruout the country. He was chief structural engineer for the Panama Pacific International Exposition in 1915, after which he opened offices as a consulting engineer. He had been practicing with his son, Robert D. Dewell.

The author of several technical books and numerous engineering articles, he received world-wide recognition as an authority on timber structures and earthquake resistant construction.

He was active in many technical and honor societies and was a life member of American Society of Civil Engineers, of which he served as president, and, at one time as director of the National society.

He belonged to the Structural Engineers Association of Northern California, Seismological Society of America, American Concrete Institute, Hillside Club of Berkeley, and Sigma Xi, Tau Beta Pi, and Chi Epsilon, honor societies.

He is survived by his wife, Mrs. Ola Harrell Dewell, three children and three grandchildren.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

Highway Improvements—Lassen County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **April 10, 1946**, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Lassen County, between Viewland and Secret Valley (II-Las-73-B), about thirteen and eight-tenths (13.8) miles in length, to be surfaced with imported gravel base and plant-mixed surfacing.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Flagman	1.00
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvement—Yolo County, at the State Highway Nursery, About Three Miles East of Davis (III-Yol-6-A)

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 703 B Street, Marysville, California, until 2 P.M. o'clock on **April 4, 1946**, at which time and place they will be publicly opened and read, for performing work as follows:

Yolo County, at the State Highway Nursery, about three miles east of Davis (III-Yol-6-A), water well to be drilled and cased.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

The rates of wages, including overtime, holiday or Sunday rates, herein specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Laborer	$1.0625
Well driller	1.70
Any classification omitted herein not less than	1.0625

Overtime—one and one-half (1½) times the above rates. Sundays and holidays (except watchmen, guards and flagman)—one and one-half (1½) times the above rates.

Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Clearing the Rector Creek Reservoir Site in Napa County, California

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION of WATER RESOURCES

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Engineer, Room 401, Public Works Building, Sacramento, California, until 1:30 o'clock p.m. on Wednesday March 27, 1946, at which time they will be publicly opened and read, in the same room of said building, for performing work in accordance with the specifications therefor, to which special reference is made as follows:

CLEARING THE RECTOR CREEK RESERVOIR SITE IN NAPA COUNTY, CALIFORNIA.

State Engineer's Estimate

Item: 76.5 acres clearing the Rector Creek Site in Sections 19 and 20, T. 7 N., R. 4 W., M. D. B. & M.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Choker setter	$1.10
Hand timber faller	1.25
Head choker setter	1.25
Laborer	1.00
Machine (power-saw) faller	1.35
Powderman	1.375
Tractor operator	1.70
Truck driver (8 cubic yards water level capacity or more)	1.50
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.25
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.10
Truck driver (less than 4 cubic yards water level capacity)	1.00
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen and guards)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modifications thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is particularly directed to the provisions of Section 7 of the Standard Specifications published by the Department of Public Works, Division of Highways, in April, 1945, regarding the laws to be observed, and Section 8, article (b), of the Standard Specifications regarding assignment of contract, and to Sections 4100 to 4108, inclusive, of the Government Code, State of California, regarding subcontracting and assignment of subcontracts.

Forms of proposal, bonds, contracts and specifications may be seen and obtained at the office of the State Engineer, Public Works Building, Sacramento, California, and they may be seen at the office of the State Engineer, 803 California State Building, Los Angeles, and at the offices of the Associated General Contractors in San Francisco and Los Angeles.

A representative from the State Engineer's office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character, and quantity of work to be done with a representative of the State Engineer.

No bid will be considered unless it is made on a blank form furnished by the State Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

An Approach To A Rational Solution Of The Earthquake Problem

By

MARK FALK

President of the State Board of Registration for Civil Engineers
and
Partner of ERNEST J. KUMP, Architect
251 Kearny Street, San Francisco

(A talk delivered before joint meeting of Northern California Chapter A.I.A. and Structural Engineers Association of Northern California—March 5)

I have been asked to prepare this paper with the idea in mind that discussion on it will lead to a more rational seismic formula than any of those now set forth in the vast majority of Building Codes with which we are required to conform.

The inconsistencies of our codes are apparent to the most casual observer. Many communities — and our own City of San Francisco is one of them — have no requirements for design against earthquakes, but the largest of these cities, at any rate, require compliance with the State law known as the Riley Bill. This statute requires that structures be designed to resist two per cent of the weight thereof applied horizontally thereto—a modest requirement, indeed.

From there we go by leaps and bounds to the eight or ten per cent or more required by other codes. The examples cited are only "shotgun" approximations of the detailed requirements of these various codes, but no purpose would be served by setting them forth in greater detail.

They will give some idea of the wide divergence of our code requirements to those of you who are, happily, not too conversant with the subject.

Now we all know that the structural engineers were consulted in the drafting of these ordinances and that both ends of this somewhat elastic yardstick have vehement and vociferous advocates among them. I fear that this argument has only tended to confirm the opinion held in some cynical quarters, that engineers are engaged in a vast guessing contest—and that most of them aren't even very good guessers.

Now, I can only hope that I shall not further confound the subject by contending that both schools of thought are correct in their theses. However, the schools are badly in need of a little bi-lateral lighting—and it is this that I hope to be able to furnish—coming, as I do, from a long line of bi-lateral-lighters.

Now the ten-percenters contend that a ten-percent earthquake is nothing more than a moderate shock that you can expect to have any where in our state any morning before breakfast—that we have had 20-percenters and even 30-percenters — and that anyone who would advocate designing structures against anything less than the lowest of these intensities is a conscienceless monster who ought to be taken into custody for the good of the community.

It is pretty hard to quarrel with any of these contentions—except, possibly, the last one. As for the two-percenters, they can point out buildings which would hardly figure to withstand a hearty blow by the Big Bad Wolf, but have successfully ridden out a couple of right sharp shakes and they feel that any engineer who would squander his client's money in designing against ten-percent of gravity should have his license revoked on the grounds of malpractice or fraud.

And they have tried to design some of the tall buildings which are liberally scattered through our fair city for these higher factors and have found that it is prohibitive to attempt to do so. And so—far into the night

Now, if you can persuade two of these protagonists to sit down together at a table—taking the precaution to tie them firmly in their seats on opposite sides thereof and gagging them gently with bandanas — they will nod in acquiescence at the interlocutor's sage observations that the percentages of gravity which they advocate are only figures of speech and that the matter with which we are primarily concerned is the effect of an accelerated movement of the foundations upon the structure in question.

Here at last is an area of agreement, but you can see that they are trying to tell you not to forget that it must be some sort of formula that can be written into an ordinance. Fair enough! We are an old hand at the writing of ordinances and are privy to the fundamental requisites thereof. It would hardly profit us to write in something that could only be resolved by the ministrations of a mathematical physicist.

Now, you may smile at the notion, but we must be mindful of the fact that these learned gentry have, in times past, fashioned the antecedents of the tools of our professional practice. These tools, through long and intimate association, have become so familiar to our hands that we are prone to forget the arduous labors of the minds which originally conceived them.

It is far cry from the cumbersome tool which was the original conception of the slope deflection method to the polished and facile instruments which have been evolved therefrom: the Moment Distribution of Hardy Cross—the Conjugate Point Method of Leon Nishkian or the Restraining Stiffness concept of Earle Russell, to mention only a few — some one of which the structural engineer uses every day and to which his hand has become as accustomed as to a glove.

"True enough", our friends nod, but one can easily read their thoughts. "These are precise methods which will give answers as exact as the fundamental equations themselves. The forces generated on a structure by an earthquake are something else altogether." That also is more or less true—rather more than less, probably; but, nevertheless and notwithstanding, none of these methods of analysis is more valid than the basic assumptions underlying them; he loads to which they will be subjected; the modulus of elasticity of our materials; the deformations due to shear, which we cheerfully neglect; or the distribution of the stresses within the section, which we have simplified because we know that in the vast majority of cases no appreciable error is involved.

Now, it is doubtless true, insofar as aseismic design is concerned, that it is "beyond the ability of any mathematician to develop formulae which would take accurate account of the extremely variable nature of the factors involved"—the complexity of the earthquake waves and the structures which a capricious clientele (and we do not here refer exclusively to the architectural profession) ask us to design to withstand them. Some simplifications of these factors must be introduced.

Ships are designed to sag between standardized waves or to hog over them and there is no loss of virtue in the fact that in a long and vigorous life of going to and fro acros the seas our vessel may never have encountered any such idealized undulations. Suffice it that she survives the duty for which she was designed.

Now, if we substitute simple harmonic motion for the unpredictable jiggling of our earthquake and assign to our structure that period of vibration which most closely coincides with that of similar structures—the free period of structures of all kinds has been determined experimentally by our good friends of the Coast and Geodetic Survey—we can begin to get somewhere.

As an approximation, then, buildings have a free period of from 1/10 to 1/20 of a second per story, depending upon the type and general dimensions of the structure. It isn't to important for our purposes at the moment. It will change appreciably with amplitude, anyhow, as certain stiffening elements within it come into play or are fractured and so go out of action.

It is pretty well established that earthquakes have periods ranging from one-tenth of a second to possibly as much as two second, but the accelerations of these later are so low that they need cause us ltle concern. The "oomph" in earthquakes is pretty largely supplied by the acceleration, particularly with reference to relatively rigid structures, and high accelerations are invariably associated with short periods. Taken together, of course, these two are a measure of the energy generated by the earthquake—the amplitude of the movement, divided by the time involved, giving us the velocity of the movement, and dividing through by "time" again, gives us the acceleration—in the familiar terms of feet per second per second.

Now, if our building in infinitely rigid we cannot evade the fact that the full acceleration of the 'quake will be imparted to it and we will be somewhat at a loss to explain away the fact that very rigid one-story buildings designed for ten per cent of gravity have come through earthquakes generating 30 or 35 per cent without damage. The answer lies, of course in the fact that there was some deformation of the structure, however small—some natural period, however brief, so that the full force of the 'quake was not imparted to the structure, or probably more correctly, was absorbed in deforming it.

Further, there is probably a much greater factor of safety available to resist the instantaneous maximum stresses generated by an earthquake than we are accustomed to think of when considering the long-time loading on which our maximum working stresses are set up.

It is my belief that, even after the usually permissable one-third increase in working stresses has bee nadded, we have available at least 100 per cent additional before the ealstic limit will be reached. Let us, then, consider a one-half "g" 'quake as a probably maximum against which we can hope to design; divide it by two for this factor of safety and by two again for the deformation of the structure and we come to about 12½% for the equivalent static load against which is should be designed. Now, it will generally be conceded that this is no particular trick; involves little if any additional cost to the owner and generally to be achieved by the exercise of just a little ingenuity on the part of the structural engineer.

All extraneous loads should be forgotten, such as the fictitious live loads on our roofs and the floors of ordinary buildings, or let us allow an additional five per cent for them and we will come to the 13-1/3% set up in the Los Angeles Code for a one-story building or the top story of any building.

Well, I fear that the cat is out of the bag now and it behooves us to look well to the bonds of our colleagues lest our amiable discussion end right here. I might just as well admit it—I am going to plug for some such formulae as that contained in the Los Angeles City Code—the not so well known factor of $H = W \dfrac{60}{4\frac{1}{2} \text{ plus } n}$ in which W equals the total deadload above the floor under consideration and "n" is the number of stories above the story being considered.

It will probably be well to pass out to you now a little mimeographed table which I have prepared, showing the lateral forces required by this formula on a column having a dead-load of 50,000 pounds per story—the load that would be supported by one column of a 20x20 bay carrying 125 pounds per square foot dead-load.

On it is shown the percentage of gravity required for each story as we move down from the top; the total shear in each story in amount and then plotted to scale, so that you may see the form of the shear curve.

Below the 26th floor the Riley Bill catches up with us and we must use 2% of gravity from there on down—which is probably just as well. Also, in passing, it may be well to note that the wind force will also catch up with us about this time on the broad face of a [illegible] building, say one about

ula previously mentioned.

It has, of course, been scaled to fit the diagram of the shears in our hypothetical building. I do not, nor do I believe anyone else can, hold any brief for the magnitude of the shears given by this formula or any other, but I think that a study of the subject will lead you to concur in the following statements regarding it:

First, that it is of the correct shape to cover, as well as any formula can, the variation of shear with height of building.

Second, that it is a sound minimum as well as the practical maximum that can be written into an ordinance to give that reasonable degree of safety to life and limb which is all that the police power of the State can justifiably encompass. When the structural engineer has reason to believe that severer stresses may be occasioned in a given structure or that additional strength or stiffness should be provided to reduce probable damage to equipment, installations, or expensive finish, he should confer with his client as to the advisability of providing for them.

A few words more and I shall be happy to relinquish the podium. I think that where an appreciable change in planform occurs at any level in a building, that level should be considered the "top story" for the purposes of the formula and should be required to carry 13-⅓% of its own weight plus that shear given by the formula for the portions of the building above.

That's a somewhat involved statement, but I'm sure that you follow me and that it could be written into an ordinance, so that its meaning would be unmistakable. The reason for it will, I believe, be quite clear to most of you who have made a study of, or even thought much about, the stresses set up by horizontal forces in structures which have sudden changes in stiffness at different levels.

I think that the frame of the building should only be required to carry those shears that may occur during the erection of the frame and that the seismic forces should be distributed to the various permanent structural elements of the building in proportion to their relative stiffness. Any other procedure seems absure. The formula should not be used for tanks and towers or for stacks and similar structures. For reasons that I do not have time to go into now, I feel that these always present special problems and require the detailed study of an expert.

Now let me repeat my opening statement: that I have prepared this paper with the idea in mind that discussion will lead to a more rational seismic formula than any of those now set forth in the vast majority of Building Codes with which we are required to conform.

Columbia Basin Two-Mile Solid Rock Tunnel Big Enough to Hold Freight Train

Speeding up its construction schedule for the million-acre Columbia Basin Project of south-central Washington, the Bureau of Reclamation is calling for bids for driving a huge tunnel, 23 feet in diameter and nearly two miles long, through solid rock in the vicinity of Coulee City, Wash., and for the building of about four miles of main canal and approximately 1,000 feet of concrete siphon in that area.

The gigantic siphon, largest of its type in the Pacific Northwest, will feed directly to the tunnel piercing a barrier of basalt. The two structures will be so large that a railroad locomotive could be operated in them "with plenty of rom to spare," Regional Director R. J. Newell commented.

Newell said that bids on the canal, siphon, and tunnel will be accepted by the Bureau at Coulee Dam until 10 A. M., April 15, and will be opened at that time. He added that the early call for bids was prompted partly by the fact that large numbers of recordable contracts are being received from the thousands of persons owning land in the basin. These contracts, which guarantee delivery of irrigation water to the hundreds of thousands of acres of arid and semi-arid land in the basin, are to be signed and returned to the Bureau at Coulee Dam by April 9.

"Many hundreds of the landowners are eastern residents", Newell added, "and their land cannot be served by the irrigation system unless it is covered by a recordable contract."

Copies of forms and specifications on today's bid call for the canal, siphon, and tunnel work may be obtained from the Bureau of Reclamation, Department of the Interior, Washington 25, D. C.; Chief Engineer Walker R. Young, Customhouse, Denver 2, Colo.; Regional Director R. J. Newell, Box 937, Boise, Idaho; and Supervising Engineer Frank A. Banks, Coulee Dam, Wash.

Newell said the successful bidder must complete the work within 900 calendar days after receiving the notice to proceed.

3/22/46 • 7
WORK UNDER WAY
STORE ADDN Est. Cost, $18,000
MILL VALLEY, Marin Co., Calif. South side Locust Street, 200 feet east of corner of Locust and Miller.
Addition to Efficiency Food Market building to be divided into two stores on the ground floor and two 3-bedroom apts. on 2nd floor.
Owner—Manuel S. Azevedo, 127 Sycamore Ave., Mill Valley.
Contractor—J. J. Hornsby, 135 Evergreen Ave., Mill Valley.

3/22/46 •• 6
WORK UNDER WAY
THREE STORES Est. Cost, $18,500
SAN CARLOS, San Mateo Co., Calif. El Camino Real.
Construction of three reinforced concrete stores.
Owner—G. B. Merritt.
Architect—John Davis Young, North Lemon Ave., Menlo Park.
Contractor—Chester W. Williamson, 938 Villa St., Mountain View.

3/22/46 •• 7
CONTRACT AWARDED
SUPERMARKET Est. Cost, $85,000
MILL VALLEY, Marin County, Calif. Corner Locust St. and Miller Ave.
Construction of supermarket and professional office building (100x80 ft.).
Owner—Manuel S. Azevedo, 127 Sycamore Ave., Mill Valley.
Contractor—Joe Hornsby, 135 Evergreen Ave., Mill Valley.

3/22/46 •• 8
WORK UNDER WAY
REMODEL STORE BUILDING Estimated Cost, $80,000
SACRAMENTO, Sacramento County, Calif. 13th and I Sts.
Modernization of exterior and complete rebuilding of interior of auto display building, including installation of new fixtures and equipment.
Owner—Lester Motors, Ford dealer, 13th and I Sts., Sacramento.

3/22/46 •• 6
PLANS COMPLETED
STORE BUILDING Cost, $30,000
FRESNO, Fresno County, Calif.
Construction of one-story class C store building.
Owner—J. C. Millet Co.
Architect—Irvin William Goldstine, 821 Market St., San Francisco.

3/22/46 • 5
TO START WORK
DRIVE-IN RESTAURANT Estimated Cost, $60,000
CORTE MADERA, Marin Co., Calif. Corte Madera Rd. intersection and Highway 101.
Construction of modern drive-in fountain an drestaurant (265x185x265 ft.), circular, with half of front walled-in glass, to seat 50 persons; parking space to accommodate 50 cars; to be called "The Circle."
Owner—E. C. Noon, 616 Main St., Sausalito, and O. M. Leth-Weile, San Francisco.
Architect—Conrad T. Kett, 75 CrescIente Dr., Sausalito.
Contractor—DeLuca & Son, 1745 Filbert St., San Francisco.

3/22/46 •• 4
PREPARING PRELIMINARY PLANS
OFFICE BUILDING Cost, $800,000
BERKELEY, Alameda County, Calif. Center St. near Milvia.
Construction of six-story office building containing approximately 17,000 sq. ft. of office space for each floor.
Owner—State Farm Insurance Co., Norval P. Goelzer, vice-president, 2054 University Ave., Berkeley.
Architect—James W. Plachek, Mercantile Bldg., Berkeley.
Plans provide for one additional story to be added later.

3/22/46 • 8
CONTRACT AWARDED
REMODEL STORE BLDG. Cost, $75,000
SACRAMENTO, Calif. SE Cor. 10th and J Streets.
Existing brick structure to be demolished to basement, new footings, sidewalk, etc.; also hydraulic freight elevator; steel frame and wood floor joists and brick walls; first floor and basement to be merchandise store, also a mezzanine floor; second floor to be public offices, conference room, etc.
Merchandise Store Lessee—Joe Sun & Co., Sacramento.
Architect — Frederick S. Harrison, 1206 Elks Bldg., Sacramento.
Mgr. of Constr.—Central California Constr. Co., Capitol National Bank Bldg., Sacramento.
Heating, Ventilating and Sheet Metal—M. R. Carpenter, 907 Front St., Sacramento.
Plumbing, Drainage, Etc.—Leonard U. Plummer, 1019 J St., Sacramento.
Terra Cotta—Gladding, McBean and Co., Lincoln, Calif.

3/22/46 •• 4
BIDS WANTED—TO CLOSE APRIL 10, 2 P. M.
ENTRANCE SWITCH
OAKLAND, Alameda County, Calif. U. S. Post Office and Courthouse.
Furnish and install new main entrance switch.
Owner—Federal Works Agency, Public Buildings Administration, office of the district engineer, 838 U. S. Appraiser's Bldg., San Francisco.
Plans and specifications are obtainable from the above office of the district engineer.

3/22/46 •• 6
CONTRACT AWARDED
REMODEL STORE Cost, $20,000
SACRAMENTO, Sacramento County, Calif. 1209 J St.
Remodel interior and exterior of store building into drapery shop.
Owner—Thomas Thompson.
Architect—S. Louis Barovetto, 620½ I St., Sacramento.
Contractor — Harry W. Robertson, 2917 T St., Sacramento.

3/22/46 •• 2
PREPARING PLANS
GARAGE Cost, $175,000
SAN FRANCISCO. N. Turk, 137.6 Leavenworth.
Construction of three-story class B garage.
Owner—Yellow Cab Co., 245 Turk St., San Francisco.
Architect—Albert F. Roller, 1 Montgomery St., San Francisco.

3/22/46 • • 5
PREPARING WORKING DRAWINGS
SHOP Est. Cost, $18,000
SANTA CRUZ, Santa Cruz Co., Cal.
Construction of 1-story reinforced concrete bakery shop.
Owner—Withheld.
Architect—C. J. Ryland, Box 847, Carmel.

3/22/46 • • 3
PREPARING WORKING DRAWINGS
GARAGE BLDG. Est. Cost, $30,000
MONTEREY, Monterey Co., Calif.
Construction of reinforced concrete garage building.
Owner—Withheld.
Architect—C. J. Ryland, Box 847, Carmel.

3/22/46 • • 8
CONTRACT AWARDED
MACHINE SHOP Est. Cost, $400,000
SUNNYVALE, Santa Clara Co., Cal. East and west sides of present plant.
Construction of three new units to include machine shop (400x60-ft.) and tool sheds (235x50), all of reinforced concrete construction.
Owner—Wooldridge Mfg. Co., Hendy Ave., Sunnyvale.
Contractor—Earl W. Heple, 494 Delmas Ave., San Jose.
Plans by Contractor.

3/22/46 •• 4
PLANS BEING FIGURED—BIDS OPEN APRIL 12
OFFICE AND LABORATORY
RICHMOND, Contra Costa Co., Calif.
Construction of office and laboratory building.
Owner — California Research Corp., 200 Bush St., San Francisco.
Plans by engineering department of owner.
Plans are being figured by a selected list of contractors.

3/22/46 • • 3
TO START WORK
QUICK FREEZE PLANT Est. Cost, $350,000
WOODLAND, Yolo Co., Calif. North of Marvin Landplane Company on Knights Landing - Woodland highway.
Construction of one-story concrete quick freeze plant to cover five acres, and freezing warehouse.
Owner—Karl H. Koch, 25 Court St., Woodland.
Plans by Owner.
Contractor—Empire Constr. Co., 344 Harriet St., San Francisco.
Ground will be broken in three or four weeks and completion is expected by Sept. 1. Costs include $200,000 for the building and $150,000 for equipment, bringing the total cost to $350,000.

3/22/46 • • 8
TO START WORK
DEPARTMENT STORE Est. Cost, $100,000
RICHMOND, Contra Costa Co., Cal. Tenth Street.
Construction of new 2-story department store and remodeling of the Keller building, both structures on 10th Street and will be integrated with the Annex building on 9th St. The Tenth Street frontage will be 125 feet.
Owner—Alberts, Inc., 835 Macdonald Ave., Richmond.
Plans by Owner.
Contractor—Empire Constr. Co., 344 Harriet St., San Francisco.
Work will start within a week to ten days and completion is expected by August or September.

9-10—EDUCATIONAL BUILDINGS

3/22/46 • • 9
PLANS COMPLETED
SCHOOL ADDN. Cost, $30,000
SAN ANDREAS, Calaveras Co., Cal.
Construction of one classroom and one all-purpose room at elementary school; frame and stucco.
Owner — San Andreas Elementary School District.
Architect—Geo. C. Sellon, California State Life Bldg., Sacramento

3/22/46 • 8
WORK UNDER WAY
STORE BLDG. Est. Cost, $100,000
FRESNO, Fresno Co., Cal. NW cor N and Stanislaus Streets.
Construction of 1½-story sales and service bldg. (150x75).
Owner — Sloss and Glikbarg, 2005 Broadway, Fresno, E. A. Harris, Manager.
Contractor — Trewhitt, Shields and Fisher. 1501 Pacific SW. Bldg., Fresno.

3/22/46 •• 9
ARCHITECT SELECTED
HIGH SCHOOL WING Approximate Cost, $100,000
ALAMEDA, Alameda County, Calif. Alameda High School.
Construction of new west wing to replace old wing now condemned.
Owner—Alameda Unified School District, William G. Paden, secretary, 2267 Alameda St., Alameda.
Architect—Ernest J. Kump Co., 25 Kearny St., San Francisco.

3/22/46 ••
FUNDS AWARDED
SCHOOL BLDGS. Est. Cost, $125,00

BONDS DEFEATED
SCHOOL ADDITIONS Cost $800,000
REDWOOD CITY, San Mateo Co., Calif. Sequoia High School.
School additions, including machine shop and mechanical drawing building, $69,000; recreation building, $18,000; new main boys' gymnasium room, $137,000; 16-room commercial wing, $119,500; little theater, $40,000; auto shop, aeronautics, forging and welding unit, $72,400; improve girls' gymnasium, $53,500; homemaking, fine arts, language and mathematics building, $190,530; fundamental shop unit, $25,000; remodeling academic building, $15,000; cafeteria and health unit, $17,000.
Owner—Sequoia Union High School District, A. C. Argo, superintendent, Broadway, Redwood City.
Architect—Not announced.
The district defeated a proposal March 19 to issue bonds in amount of $1,500,000 to finance the above construction and two new high school buildings. The next meeting of the board will be held April 19.

3/22/46 •• 9
BOND DEFEATED
HIGH SCHOOL Cost, $350,000
REDWOOD CITY, San Mateo Co., Calif. Menlo Park area.
Construction of new high school building to include 12 classrooms, 3 science laboratories, clothing laboratory, office, service area, cafeteriar, a little theater with capacity of 400 seats, general shop and gymnasium.
Owner—Sequoia Union High School District, A. C. Argo, superintendent, Broadway, Redwood City.
Architect—Not announced.
The district defeated a proposal March 19 to issue bonds in amount of $1,500,000 to finance the above project and two other projects.

3/22/46 •• 9
BONDS DEFEATED
HIGH SCHOOL Cost, $350,000
REDWOOD CITY, San Mateo Co., Calif. Bourdette property between San Carlos and Belmont.
Construction of new high school building to include 12 classrooms, 3 science laboratoles, clothing laboratory, office, service area, cafeteria, a little theater with capacity of 400 seats, general shop and gymnasium.
Owner—Sequoia Union High School District, A. C. Argo, superintendent, Broadway, Redwood City.
Architect—Not announced.
The district defeated a proposal March 19 to issue bonds in amount of $1,500,000 to finance the above project and two other projects.

3/22/46 •• 9
BONDS VOTED
SCHOOL ADDITION
NEVADA CITY, Nevada Co., Calif.
Construction of additions and alterations to school building.
Owner—Union Hill School District.
Architect—Not announced.
The school district voted bonds March 19 in the amount of $18,000, proceeds of which will be used to finance the above construction.

Proposition A:
(1) 6,000,000 c.y. dry fill;
(2) 420,000 s.y. compacting to 95% density;
(3) 25,000 M. gals. watering (unit is 1000 gals.);

Proposition B:
(1) 450,000 c.y. dry fill;
(1a) 5,550,000 c.y. hydraulic fill;
(2) 110,000 s.y. compaction to 95% density;
(3) 5000 M. gals. watering (unit is 1000 gals.);

Quantities for Items 4 to 31 are the same for Propositions A and B
(4) 135,000 c.y. rehandling;
(5) 125,000 c.y. misc. excav.;
(6) 4,000 s.y. sub-base preparation;
(7) 15,000 tons crushed rock base;
(8) 50 tons prime coat;
(9) 600 tons plant-mix surfacing;
(10) 200 s.y. bit. seal coat;
(11) 310,000 s.f. portland cement concrete pavement;
(12) none—portland cement adjustment price, to compensate for change in requirement for cement in concrete as provided in the specifications;
(13) lump sum, drainage of existing mud fill area;
(14) 100 l.f. 6-in. sale glazed vitrified clay pipe;
(15) 700 l.f. 15-in. reinf. concrete pipe
(16) 800 l.f. 18-inch do;
(17) 400 l.f. 21-inch do;
(18) 1,100 l.f. 24-inch do;
(19) 30 l.f. 21-in. corru. metal pipe;
(20) 30 l.f. 24-inch do;
(21) 1 each 21-in. automatic drainage gate;
(22) 1 each 24-inch do;
(23) 350 l.f. 21-in. corru. metal pipe, furnished by city, to be installed
(24) 350 l.f. 24-in. corru. metal pipe, furnished by city;
(25) 1 each 21-in. automatic drainage gate furnished by city;
(26) 1 each 24-inch do;
(27) 700 l.f. salvaging 21- and 24-in. corrugated metal pipe;
(28) 4 each new inlets;
(29) 11 each removal of inlets;
(30) 50 each reinstalling inlets;
(31) lump sum, removing drainage structures X and Y.

Specifications obtainable from the cashier's office, 6th floor, 425 Mason Street, upon deposit of $10.00.

ADVANCE CONSTRUCTION REPORTS

ENGINEERING SECTION

(Continued from Page Five)

22-26—RESIDENTIAL BUILDINGS

3/22/46 26
PLANNED
POMONA, Los Angeles Co., Calif.—R. J. Daum, 6803 West Blvd., Inglewood, and C. T. & W. P. Stover, 116 N. Alexander Ave., Claremont, joint venturers, will build a private housing project totaling 2500 dwellings in West Pomona for Pomona Homes, a corporation composed of C. T. and W. P. Stover, Edwin A. Tomlin and R. J. Daum.

Work is scheduled to start immediately on the first 500 dwellings upon the completion of engineering plans and the general site layout. Plans have been completed for the individual dwellings, all of which are to contain three bedrooms; total estimated cost $25,000,000.

Information is available and subcontracts will be taken soon on all trades at 6803 West Blvd., Inglewood; contact Wade Perong.

A job office will probably be erected later on the site.

3/22/46 24
CONTRACT AWARDED
CARETAKER'S COTTAGE
Cost, $3060
CARMICHAEL, Sacramento County, Calif.
One-story frame cottage, redwood rustic siding, sheet rock interior, living room, kitchen, bedroom and bath.
Owner—Judge Raymond T. Coughlin, Carmichael.
Architect — Frederick S. Harrison, Elks, Bldg., Sacramento.
Contractor — James Francis Butts, 1312 Del Paso Blvd., North Sacramento.

3/22/46 22
PREPARING PLANS
DEL MAR, San Diego Co., Calif.—Architect Walter C. See, 4460 Park Blvd., San Diego, is preparing plans for the construction of a 2-story, 100-room frame and concrete slab hotel building in Del Mar for Del Mar Beach Hotel Co. L. T. Fisher, Oceanside, will be the general contractor.

3/22/46 22
WORK STARTED
PALM SPRINGS, Riverside Co., Calif.—Waale-Camplan Co. & Smith, Inc., 1670 Beverly Blvd., Los Angeles, and 930 Palm Canyon Dr., Palm Springs, have started work on the construction of Rancho Royale Hotel at Palm Springs for Samuel H. Levin. The work will consist of an administration building, 13 hotel bungalows, swimming pool and garages; estimated cost is $350,000. Plans were prepared by H. L. Gogerty Organization, architects and engineers, 3123 W. 8th St., Los Angeles.

31-32—WATER SUPPLY & PLANTS

3/22/46 32
PLANNED
SACRAMENTO, Calif.—Sacramento County Supervisors have authorized Sanitary District 1, situated just south of Sacramento ,to go ahead with plans for the construction of a $1,000,000 sewage disposal system and a small separate sewage treatment plan. Supervisors set April 1 for a hearing on any possible objections to the sanitary district project, which must be ready to operate next January 1.

3/22/46 32
TO START WORK
OILDALE, Kern Co., Calif.—The Superior Court of Kern County has issued an order validating proceeding and approved form of contract to be entered into by the Sanitary Board of the North of the River Sanitary District No. 1 of Kern County, Oildale, with Bechtel Bros.-McCone, 601 W. 5th St., Los Angeles, and 220 Bush St., San Francisco, for the construction of a sewer collecting system, pumping station and treatment plant in Oildale, Kern County, to serve an area including Oildale, Riverview, Highland Park, Wingland Square and other north of the river communities at a cost of $669,038.63. Work on the project is expected to start within a short period. The bids for the work were received and the contract was awarded January 2. Plans were prepared by Engineer R. E. White, 2617 20th St., Bakersfield, Calif.

34—DAMS, RESERVOIRS & DREDGING

3/22/46 34
BIDS POSTPONED
TUCUMCARI PROJECT, New Mexico. — Until April 16, 10 A. M. (postponed from March 27), bids will be received by the U. S. Bureau of Reclamation, Tucumcari, N. M., under Spec. 1189 for construction of structures, laterals Unit No. 2; earthwork and structures, laterals Units Nos. 3 and 4; and Conchas Canal, stations 3343 plus 17 to 3662 plus 00, Tucumcari Project, N. M. The work is situated in the vicinity of Tucumcari, N. M.

The principal items of work and the estimated quantities involved are as follows:

SCHEDULE No. 1
Structures—Lateral Unit No. 2
(1) 20,200 c.y. unclass. excav. for structures;
(2) 13,650 c.y. backfill;
(3) 5,000 c.y. compacted backfill;
(4) 2,000 c.y. concrete in structures;
(5) placing 165,000 lbs. reinf. bars;
(6) erecting 26 M. ft. bm of timber in structures;
(7) installing 20,000 lbs. of gates and misc. metal work;
(8) laying 1000 l.f. 15-in. diameter concrete pipe;
(9) laying 950 l.f. 18-inch do;
(10) laying 200 l.f. 21-inch do;
(11) laying 1,825 l.f. 24-inch do;
(12) laying 400 l.f. 30-inch do;
(13) laying 100 l.f. 36-inch do;
(14) laying 100 l.f. 42-inch do;
(15) laying 600 l.f. 48-inch do;

SCHEDULE No. 2
Earthwork and Structures—Lateral Unit No. 4
(1) 116,000 c.y. common excav. for laterals;
(2) 18,500 c.y. rock do;
(3) 91,000 sta. c.y. overhaul;
(4) 120,000 c.y. compacting embankment;
(5) 12,000 c.y. unclass. excavation for structures;
(6) 5,300 c.y. backfill;
(7) 5,000 c.y. compacting backfill;
(8) 1,850 c.y. concrete in structures
(9) placing 103,000 lbs. reinf. bars;
(10) 1,900 s.y. dry-rock paving;
(11) installing 28,000 pounds of gates and misc. metal work;
(12) erecting 4.3 M. ft. bm timber in structures;
(13) laying 1,170 l.f. 15-in. diameter concrete pipe;
(14) laying 968 l.f. 18-inch do;
(15) laying 316 l.f. 24-inch do;
(16) laying 54 l.f. 30-inch do;
(17) laying 2,020 l.f. 36-inch do;
(18) laying 224 l.f. 42-inch do;
(19) laying 158 l.f. 60-inch do;
(20) jacking 50 l.f. 36-inch diameter concrete pipe thru embankment
(21) jacking 50 l.f. 60-inch do;

SCHEDULE No. 3
Earthwork and Structures—Lateral Unit No. 3
(1) 66,000 c.y. common excavation for laterals;
(2) 14,000 c.y. rock do;
(3) 21,000 sta. c.y. overhaul;
(4) 75,000 c.y. compacting embankment;
(5) 8,200 c.y. unclass. excavation for structures;
(6) 5,600 c.y. backfill;
(7) 3,500 c.y. compacting backfill;
(8) 1,300 c.y. concrete in structures;
(9) placing 91,000 lbs. reinf. bars;
(10) 2,200 s.y. dry-rock paving;
(11) installing 31,000 lbs. gates and misc. metal work;
(12) erecting 5 M ft. bm of timber in structures;
(13) laying 1,380 l.f. 15-inch diameter concrete pipe;
(14) laying 1,670 l.f. 18-inch do;
(15) laying 430 l.f. 24-inch do;
(16) laying 370 l.f. 30-inch do;
(17) laying 960 l.f. 36-inch do;
(18) laying 160 l.f. 42-inch do;

SCHEDULE No. 4
Earthwork and Minor Structures—Stations 3343 plus 17 to 3514 plus 50, and Stations 3517 plus 70 to 3660 plus 80, Conchas Canal
(1) 41,000 c.y. common excavation for Conchas Canal;
(2) 7,000 c.y. rock do;
(3) 7,000 sta. c.y. overhaul;
(4) 40,000 c.y. compacting embankment;
(5) 2,300 c.y. common excavation for structures;
(6) 700 c.y. rock do;
(7) 1,300 c.y. backfill;
(8) 400 c.y. compacting backfill;
(9) 370 c.y. concrete in structures;
(10) placing 27,000 lbs. reinf. bars;
(11) 350 s.y. dry-rock paving;
(12) installing 5,100 lbs. gates and misc. metal work;
(13) erecting 0.05 M. ft. bm timber in structures;
(14) laying 160 l.f. 15-inch diameter concrete pipe;
(15) laying 230 l.f. 18-inch do;
(16) laying 90 l.f. 48-inch do;

SCHEDULE No. 5
Earthwork and Major Structures—Stations 3514 plus 50 to 3517 plus 70, and Stations 3660 plus 80 to 3662 plus 00—Conchas Canal
(1) 275 c.y. common excavation for Conchas Canal;
(2) 275 c.y. rock do;
(3) 600 c.y. compacting embankment;
(4) 2,500 c.y. common excavation for structures;
(5) 450 c.y. rock do;
(6) 2,500 c.y. backfill;
(7) 800 c.y. compacting backfill;
(8) 370 c.y. concrete in structures;
(9) placing 37,000 lbs. reinf. bars;
(10) 100 s.y. dry-rock paving;
(11) erecting 1 M ft. bm timber in structures.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; W. R. Nelson, Regional Director, P. O. Box 1609, Oliver-Eakle Bldg., Sixth and Polk Sts., Amarillo, Texas; H. W. Mutch, Project Engineer. Tucumcari, N. M.; and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Project Engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.75 per copy, not returnable.

3/22/46 34
BIDS POSTPONED
BOISE PROJECT, Idaho. — Until April 5, 10 A. M. (postponed from March 21), bids will be received by the U. S. Bureau of Reclamation, Boise, Idaho, for labor and materials for the construction of Cascade Dam, Boise Project, Idaho; Specification No. 1194. The work is situated on the north fork of the Payette River at Cascade, Idaho. Completion time, 750 days.

No charge to prospective bidders for specifications and drawings; to others, $3. Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; R. J. Newell, construction engineer, P. O. Box 937, Reclamation Bldg., Fairgrounds, Boise, Idaho, and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer. Guarantee in the amount of 10% of bid required.

The work involves:
(1) diversion and care of river during construction and unwatering foundations;
(2) 20,000 cu. yds. excavation, stripping borrow pits;
(3) 7500 cu. yds. excavation, common, in open cut for outlet works;
(4) 19,000 cu. yds. excavation, rock, in open cut for outlet works;
(5) 2300 cu. yds. excavation, all classes, in tunnel;
(6) furnishing and placing 8000 lbs. permanent steel tunnel supports;
(7) furnishing and placing 8000 lbs. steel tunnel liner plates and steel lagging;
(8) 50,000 cu. yds. excavation, all classes, for foundation of dam;
(9) 400 cu. yds. excavation, rock, for footing of concrete cutoff wall;
(10) 24,000 cu. yds. excavation, common, for spillway;
(11) 33,000 cu. yds. excavation, rock, in spillway;
(12) drilling 16,700 lin. ft. of line holes for rock excavation for spillway;
(13) 315,000 cu. yds. excavation, common, in borrow pits and transportation to dam embankment;
(14) 200 cu. yds. backfill;
(15) 320,000 cu. yds. earth fill in embankments;
(16) tamping or puddling 3500 cu. yds. earth fill;
(17) 55,000 cu. yds. rock fill on downstream slope of embankment;
(18) 11,000 cu. yds. ripray on upstream slope of embankment;
(19) 60 cu. yds. porous concrete under floor of spillway gate structure;
(20) constructing 1000 lin. ft. 4-in. diameter sewer pipe drains with uncemented joints, embedded in porous concrete;
(21) constructing 325 lin. ft. 4-in. diameter sewer pipe drains with uncemented joints, embedded in gravel;
(22) constructing 750 lin. ft. 6-in. diameter sewer pipe drains with uncemented joints, embedded in gravel;
(23) drilling 1700 lin. ft. 1⅝-in. diameter grout holes up to 35-ft. stage;
(24) drilling 2000 lin. ft. 1⅝-in. diameter grout holes between 35-ft. and 60-ft. stage;
(25) drilling 1100 lin. ft. 1⅝-in. diameter grout holes between 60-ft. and 100-ft. stage;
(26) drilling 1000 lin. ft. grout holes less than 35 ft. deep with percussion drills;
(27) placing 2600 lbs. grout pipe and fittings;
(28) 7100 cu. ft. pressure grouting;
(29) 800 cu. ft. pressure grouting with packers;
(30) drilling 4400 lin. ft. holes for anchor bars and grouting bars in place;
(31) 400 cu. yds. concrete in footing of embankment cutoff wall;
(32) 350 cu. yds. concrete in embankment cutoff wall, except in footing;
(33) 750 cu. yds. concrete in tunnel lining except back of plate steel pipe lining;
(34) 150 cu. yds. concrete in tunnel lining back of plate steel pipe lining;
(35) 850 cu. yds. concrete in inlet structures of outlet works, except in beams, columns and roof slab of trashrack structure and in floor of access bridge;
(36) 110 cu. yds. concrete in beams, columns and roof slab of trashrack structure and in floor of access bridge;
(37) 535 cu. yds. concrete in outlet to outlet works except in control house;
(38) 90 cu. yds. concrete in control and engine houses;
(39) 680 cu. yds. concrete in floor of spillway;
(40) 1220 cu. yds. concrete in spillway except in floor and engine house;
(41) 27,000 sq. ft. vacuum concrete processing for spillway floor, pier and inside surface of spillway walls:
(42) placing 606,000 lbs. reinforcement bars;
(43) placing 320 lin. ft. metal sealing strips;
(44) constructing control and engine houses, except concrete;
(45) erecting 10 M ft. b.m. of timber in bridge;
(46) placing 650 sq. ft. asphalt plank on bridge floor;
(47) installing 22,500 lbs. fixed-wheel gate frame, seats, track bases and track;
(48) installing 35,000 lbs. fixed-wheel gate;
(49) installing 60,000 lbs. radial gates;
(50) installing 21,000 lbs. gate hoists;
(51) installing 110,000 lbs. high-pressure gates and conduit-lining castings;
(52) installing 7000 lbs. control apparatus for high-pressure gates;
(53) erecting 18,500 lbs. hoist tower for fixed-wheel gate;
(54) erectign 20,500 lbs. structural steel in bridges;
(55) installing 48,000 lbs. trashracks;
(56) installing 115,000 lbs. welded plate steel tunnel and conduit linings;
(57) installing 5000 lbs. float-well intake, reservoir level gauge and air-vent piping;
(58) installing 4400 lbs. pipe handrails;
(59) installing 3000 lbs. miscellaneous metal work;
(60) installing 500 lin. ft. electrical metal conduit, 1¼-in. diameter and smaller;
(61) installing 450 lin. ft. electrical metal conduit, 1½-in. diameter to and including 2-in. diameter;
(62) installing 1000 lbs. electrical conductors nad ground wires;
(63) installing 2500 lbs. electrical apparatus.

3/22/46 34
BIDS OPENED
FORT LYON, Colo.—Grosshaus & Petersen, Marysville, Kan., at $459,476.75, submitted the low bid to the U. S. District Engineer, Commercial Bldg., P. O. Box 1538, Albuquerque, N. M., March 12, for the construction of the Fort Lyon protective works near Las Animas, Bent County, Colo.; Serial 46-31.

The total bids received were:
Grosshaus & Petersen, $459,476.75.
Morrison - Knudsen, Boise, Idaho., $563,343.
Hinman Bros., Pittsburgh, Pa., $655,612.50.
Peter Kiewit Sons Co., Omaha, Neb., $796,575.
Northwestern Engineering, Rapid City, S. D., $801,115.50.

40— STREETS AND HIGHWAYS

3/22/46 40
CONTRACT AWARDED
SACRAMENTO, Cal.—J. R. Reeves, Box 1072, Sacramento, at $1,501.20, awarded contract by the City of Sacramento, city clerk's office, City Hall, for improvement of 17th St., 4th Ave., and Vallejo Way.

3/22/46 40
PLANNED
SACRAMENTO, Cal.—The City of Sacramento plans the improvement of Sutter Way, Fremont Way, McClatchy Day, Fint Day, Muir Way, etc. Hearing will be held March 29 in the City Hall.

3/22/46 40
PLANNED
SACRAMENTO, Cal.—The City of Sacramento plans the improvement (1) the alley between U and V Sts. from easterly line of 22nd St. to the westerly line of 23rd St., and (2) improvement of H St. Hearing will be held March 29 in the City Hall.

3/21/46
NOTICE
SAN DIEGO COUNTY, Calif.—A representative of the district office of the State Division of Highways will meet prospective bidders for the proposed project in San Diego County, XI-S.D-77-S.D,A, for which bids are to be received in Los Angeles on April 11, 1946.

Said representative will meet prospective bidders by appointment with the district office at any time.

3/21/46
NOTICE
KERN COUNTY, Calif.—A representative of the district office of the State Division of Highways will meet prospective bidders for the proposed project in Kern County, VI-Ker-33-C, for which bids are to be received in Sacramento on April 3, 1946.

Said representative will meet prospective bidders at the intersection of highway Routes 33 and 139 at Wasco on Wednesday, March 27, 1946, at 10 A. M.

3/21/46
NOTICE
KERN COUNTY, Calif.—A representative of the district office of the State Division of Highways will meet prospective bidders for the proposed project in Kern County, VI-Ker-4-C, Bkd, for which bids are to be received in Sacramento April 10, 1946.

Said representative will meet prospective bidders at the resident engineer's office, Bakersfield maintenance station, on Wednesday, April 3, 1946, at 10 A. M.

3/22/46 40
PROPOSED
VALLEJO, Solano Co., Calif.—The City of Vallejo, T. D. Kilkenney, city engineer, City Hall, Vallejo, plans the improvement of Kentucky St. and for improvement of Ohio, Louisiana and Colusa Sts.

Machinery & Material

42— MISC. SUPPLIES AND MATERIALS

3/22/46 42
BIDS WANTED
WIOTA, Mont.—Until April 3, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Custom House, Denver 2, Colo., under Inv. 18,664-A-1 for western red cedar, southern yellow pine, lodgepole or Douglas fir poles, f.o.b. shipping point and/or Wiota, Mont.; Wiota-North Electric Cooperative transmission line

3/22/46 42
BIDS WANTED
DAVIS DAM, Arizona - Nevada.—Until April 3, 2 P. M., bids will be received b ythe U. S. Bureau of Reclamation, Denver, Colo., under Bid No. C-44,247-A for furnishing one dragline excavator, ½-cu. yd. capacity, power shovel attachment, dragline bucket, f.o.b. shipping point and/or Earp, Calif.; Davis Dam Project, Arizona-Nevada.

43— MACHINERY AND EQUIPMENT

3/22/46 43
BIDS OPENED 4
BOISE PROJECT, Idaho.—Worthington Pump & Machinery Corp., Harrison, N. J., at $32,115; services of erecting engineer $25 per day, submitted low bid to the Bureau of Reclamation, Denver, under Spec. No. 1159 for furnishing and delivering fob cars at the shipping point or fob cars at Emmett, Idaho, at the option of the bidder, four vertical-shaft centrifugal pumps, each having a capacity of 125 cu. ft. per second at a pumping head of 92 ft.; and four vertical-shaft, 2,200-volt, 1,750 - h.p. synchronous motors of suitable speed and design for direct connection to the above pumps with individual field-control cubicles for installation in the "C" line Canal Pumping Plant, Payette Division, Boise Project, Idaho. Pumps, Motors and field control cubicles will be installed by the Government.

Second and third low bids follow: Byron Jackson Co., Los Angeles, $82,535; services of erecting engineer, $22 per day.

Allis Chalmers Mfg. Co., Milwaukee Wis., $85,600; services of erecting engineer $30 per day.

3/22/46 43
BIDS WANTED
COLUMBIA BASIN PROJECT, Washington.—Until April 17, 2 P. M., bids will be received by the Bureau of Reclamation, Denver, Colo., under Spec. 1250 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Odair, Wash., at the option of the bidder, one 3000-barrel all-steel cement silo, one conveyor, one spiral-screw feeder, one bucket elevator, one 70-barrel cement bin, one 25 cubic foot cement weighbatcher, and all accessories, including electric motors required for satisfactory operation of the equipment, except safety switches, push-button stations, magnetic switches, overload relays, and conduit and wiring for electric motors; two 3000-barrel all-steel cement silos, one railroad car door unloading hopper, one spiral-screw conveyor, one bucket elevator, and all accessories, including electric motors required for satisfactory operation of the equipment, except safety switches, push-button stations, magnetic switches, overload relays, and conduit and wiring for electric motors; and two 3000-barrel all-steel cement silos, one railroad car door unloading hopper, one bottom-dump railroad car unloading hopper, one spiral-screw conveyor, one bucket elevator and all accessories, including electric motors required for satisfactory operation of the equipment, except safety switches, push - button stations, magnetic switches, overload relays and conduit and wiring for electric motors for the Columbia Basin Project, Wash. The equipment will be assembled at Coulee Dam, Wash., and at Odair, Wash., by the government. FOUR BRIDGES, LOS ANGELES COUNTY

LOS ANGELES, Calif.—As previously reported, Barnes Construction Co., 1119 Montana Ave., Santa Monica, at $1,672,266.50, submitted low bid to G. T. McCoy, state highway engineer, 808 State Bldg., Los Angeles, for about .7 mile in length to be graded and paved with asphalt concrete, and four bridges to be constructed on Pacific Coast Highway, between Dominguez Channel and San Gabriel Ave., VII-LA-60-LA, in the cities of Los Angeles and Long Beach, Los Angeles County. This is a national defense contract.

Work involves:
(1) 410 c.y. remove concrete;
(2) 13 acres clear and grubb;
(3) 7,000 c.y. rdwy. excav.;
(4) 21,450 c.y. struc. excav.;
(5) 24,700 c.y. ditch and channel excavation;
(6) 20,000 sq. yds. compact original ground;
(7) 133,600 l.f. vertical holes, sand drains;
(8) 20,000 tons sand backfill, sand drains;
(9) 712,600 tons imported borrow;
(10) 37,500 tons import subgrade material;
(11) 53,000 sq. yds. prepare Class C subgrade;
(12) develop water supply and furnish water equipment;
(13) 6.000 M. gals. apply water;
(14) finish roadway;
(15) 7 tons liq. asph. SC-2 prime coat
(16) 1,400 tons plant mix surf.;
(17) 21,500 tons asphalt concrete;
(18) 25 tons asph. emulsion, seal coat
(19) 7,716 c.y. Class A portland cement conc. structures;
(20) 685 c.y. Class A portland cement conc. footing blocks;
(21) 3,788,000 lbs. furnish struc. steel;
(22) 3,788,000 lbs. erect struc. steel;
(23) 1,171,000 lbs. furnish bar reinf. steel;
(24) 1,171,000 lbs. place do;
(25) 42,380 l.f. furnish timber piles;
(26) 940 each drive timber piles;
(27) 1,700 l.f. furnish cast in place concrete piles;
(28) 40 each drive do;
(29) 22,920 l.f. furnish steel piles;
(30) 337 each drive do;
(31) 180 each steel pile splices;
(32) 1,300 c.y. Class A portland cement conc. curbs, gutters and sidewalks;
(33) 950 l.f. pipe handrail;
(34) 2.800 l.f. chain link fence;
(35) 4 each walk gates;
(36) 1,200 l.f. 18-in. standard strength reinf. concrete pipe;
(37) 540 l.f. 24-inch do;
(38) 520 l.f. 36-inch do;
(39) 2,700 l.f. 15-in. plain conc. pipe;
(40) 4 each remodel exist. manholes;
(41) 29,000 lbs. misc. iron and steel;
(42) 18,300 each Mesembryanthemum Edule cuttings;
(43) 2,445 l.f. steel railing;
(44) 40 each portable timber barricades;
(45) electrical equipment;
(46) remove existing bridge.

Galv. Metal Bin-Type Retaining Wall
(47) 964 ea 9.5 ft. 14 gage stringers;
(48) 254 each 9.5 ft. 14 gage do;
(49) 76 each 9.5 ft. 12 gage do;
(50) 250 each 7.4 ft. 16 gage spacers;
(51) 156 each 9.6 ft. 14 gage do;
(52) 157 each 11.8 ft. 12 gage do;
(53) 47 each 7.4 ft. 16 gage bottom spacers;
(54) 15 each 9.6 ft. 14 gage do;
(55) 15 each 11.8 ft. 12 gage do;
(56) 70 each 9.5 ft. 8 gage stringer stiffeners;
(57) 1,950 l.f. 8 gage columns;
(58) 77 each 12 gage column caps;
(59) 92 each 14 gage column splicers;
(60) 154 each 16x16- in. 1 gage bearing plates;
(61) 46 each 20x20-inch do;
(62) 41 each 2x24-inch do.

The total bids were:
(A) James I. Barnes Construction Co., $1,672,266.50.
(B) Griffith Co., Los Angeles, $1,710,474.08.
(C) Macco Construction Co., Clearwater, $1,756,854.45.
(D) Guy F. Atkinson Co., Long Beach, $1,793,247.40.
(E) Peter Kiewit Sons Co., Los Angeles, $1,862,841.
(F) Warren Southwest and C. G. Willis & Son, Los Angeles, $1,999,056.20.

PLANS and Speculations

Martinez: Creation of the South Antioch Sanitary District has been approved by the Board of Supervisors who voted to exclude the Fitzpatrick Tract, adjacent to the city, from the project. A bond election date for the new district will be set this week.

oOo

Willows: Plans for a large war memorial hospital have been turned down by the county board of supervisors who have decided to continue their original plans for a 42-bed hospital. The Grange of the county has asked the board to reconsider.

oOo

Hayward: Definite plans for a city hospital will be outlined Thursday evening by the Community Council and the Chamber of Commerce in a mass meeting to be held in the city hall.

oOo

Niles: County Surveyor Wallace Boggs, in a meeting before the Junior Chamber of Commere here, outlined the road program and drainage survey being made. Of considerable interest were the construction projects of the Brightside bridge, improvement of the underpass at the steel bridge in Niles Canyon, and eventual construction of a four-lane highway along the present Niles-Alvarado road. The present Niles-Alvarado road will be resurfaced soon, Boggs said.

oOo

Susanville: County Supervisors have adopted a unified road program after Chairman W. J. Tunison rebuked them for having no definite plans for road construction and maintenance.

oOo

Pittsburg: Formal measures are underway by the Contra Costa Contractors association to bring pressure upon the Senate for passage of a federal home loan bill which would allow contractors loans up to 80 per cent of construction costs on houses, Chairman Bernard E. Enes disclosed last week.

oOo

San Francisco: Swoon King Frankie Sinatra, currently causing a truant problem here where he is appearing in person, has signed incorporation papers for a million dollar sports arena to be known as Hollywood Square Garden, Inc., of Hollywood. The project is patterned after Madison Square Garden and will feature similar entertainment and sports events.

oOo

Coalinga: Petitions for the creation of a local hospital district are being circulated by members of the Business and Professional Women's clubs here. Purpose of the move is to take over and enlarge present facilities of Pleasant Valley hospital.

National Veterans' Homestead Committee Designed To Spur Early Home Ownership

To the end that veterans of World War II may be assisted in obtaining homes, and that they may have a continuing interest in home ownership, the Home and Property Owners of America is organizing a Veterans' Homestead Committee on a national basis.

Announcement of this move was Saturday by Henry E. Price, Executive Director, of the H.P.O.A.

"While it is true that substantial educational benefits have been voted to the veterans under the Servicemen's Readjustment Act of 1944 hundreds of thousands of them cannot take advantage of this provision of the law," Price's statement read. "They are denied these benefits for the simple reason that they have neither the time nor the energy to attend classes. These men are too busy earning a living for their families.

"Yet, we cannot believe that Congress intended that there should be any discrimination among veterans. It was the intent of the lawmakers that they should share and share alike. It is the position of H. P. O. A. that the serviceman who cannot take the time off to attend classes, but who would use similar benefits to establish a home, thus contributing to the national wealth, should be considered," the statement read.

"The Veterans' Committee of H. P. O. A. will study all phases of home ownership, including taxation, assessments, construction and financing costs, and will immediately lend support to Veterans' Homestead Assistance Act. This measure has been introduced by Representatives Fred A. Hartley, of New Jersey and J. Hardin Peterson, of Florida, and provides for grants of from $500 to $2500 for veterans desiring to own their own homes. Under such a law the veteran would be reimbursed to the extent to which home construction costs advanced while he was serving his country.

"Every precaution has been taken by the bill to protect the rights of the veterans against abuses which may arise. He would be encouraged to own and live in his own home, which is the task to which H. P. O. A. is devoting itself, not only for the veterans but for all other classes of home owners," the statement concluded.

The task of the Veterans' Committee of the H. P. O. A. is one of keeping home owning veterans advised on legislation which vitally affects the ownership of property. The committee will deal with such ownership in all phases, including financing, taxation and restrictions imposed through federal legislation.

#

New Awning Paint Defies Heat, Glare

Having an awning that reflects heat away from a window as well as giving it shade has long been a wish unfulfilled.

Now, however, such a thing is possible and with one's own awnings, too, whether they're old or new. For a new aluminum paint for canvas has been created by Interchemical corporation, Trade Sales division, Fair Lawn, N. J.

This new paint, known as Setfast Aluminum Canvas Paint, is more than just the addition of a new color to their regular line of Setfast canvas paint. It contains all the heat reflecting values of other aluminum paints and, in consequence, provides substantial protection from heat.

This new aluminum paint for canvas will not crack or stiffen the fabric. It is water-repellent and sun-resistant and contains an active fungicide that will protect canvas from rot and mildew. The aluminum paint has great hiding power, too, and one coat will usually provide satisfactory coverage. Its actual coverage will approximate 70 square feet per quart, depending on the condition of the canvas.

Setfast Aluminum Canvas Paint is delivered ready mixed and needs only stirring to be ready for application. It is sold by department stores, paint and hardware stores as well as mail order warehouses throughout the country.

TRAFFIC SURVEY GETS SECOND SPAN DATA

Motorists traveling the Bay Bridge are being handed postal cards soliciting certain information as the preliminary step in planning a second span across the bay.

Howard C. Wood, principal bridge engineer, is in charge of the survey which is counting the origin and destination of all bridge traffic.

GENERAL DRYDOCK CO. SOLD FOR $7,500,000

The big General Engineering & Drydock company, with plants in Oakland, Alameda and San Francisco, has been sold for a reported $7,500,000 to Godfrey K. Waters, New York engineering contractor.

The firm is listed as one of the five major bay area facilities that the Navy desired to retain as a peacetime unit.

GROOVER AND I

GLAMOUR LEGS

Washington has just felt a slight tremor in connection with 25 thousand pair of $1.35 nylon hose placed on sale in an Army officers' post exchange at 87c per pair.

★ ★ ★

A protest of discrimination was heard, as only officers could purchase the hose. The Quartermaster General stepped in, but not until the squawk had hit the press wires.

★ ★ ★

How would YOU go about dividing 25,000 pair of hose among 25 million service men? To be strictly democratic and divide them equally each soldier would get a scrap about the size of a wrist watch.

★ ★ ★

Discrimination isn't confined to the Army. The government is discriminating against American women in favor of Mexican women. Export permits for nylon hose by the thousands of dozens are issued for shipment to Mexico.

★ ★ ★

Mexico is enjoying a U. S. sponsored inflation. It isn't called black market. It's the only market there is. It is a seller's market. U. S. made nylon hose are selling in Mexico at anything from $2 to $10 per pair up to $50 per pair.

★ ★ ★

Kipling wrote:

"Judy O'Grady and the Colonel's Lady are sisters under the skin." Perhaps that's the way it is under the skin, but what a difference it makes from the skin out—if it's nylon!

★ ★ ★

The gals who want democratic equality for their menfolk are the same gals who feel so smugly superior in nylons when one of their sisters draggle past wearing droopy, creepy, twisty rayons.

SCRAP COSTLY PIPING

Wartime adjuncts to the Burma Road and other military operations in Burma, pipelines costing an estimated $31,500,000, have been sold for junk at a sum reported to be $1,376,000, the Office of the Foreign Liquidation Commission reports.

Manufacturers Can Fill 1946 Building Needs If Allowed To Produce, Survey Shows

Douglas Whitlock, chairman of the Advisory Board of the Producers' Council, national organization of building product manufacturers, today made the following statement:

"Study of the productive capacity of plants manufacturing building products shows clearly that existing plants can produce this year enough of the currently scarce materials and equipment to permit complete fulfillment of the housing program proposed by Housing Expediter Wilson W. Wyatt," Whitlock said.

"The stduy was made by a committee of recognized economists at the request of the Producers' Council, national organization of building product manufacturers. The major conclusions are confirmed by a report previously issued by the U. S. Department of Labor.

"The study shows unmistakably that there is no need to appropriate huge sums from the Treasury for the purpose of subsidizing new or marginal manufacturers, as has been proposed by Wyatt. Nor is there any need to adopt a program of tax amortization to expedite the building of new plants. Existing capacity is more than ample, provided that capacity is put to work with the aid of price ceiling adjustments.

"The study revealed that in most instances existing plants producing currently scarce materials were operating in January at only about 27 to 82 per cent of capacity, because of inadequate price ceilings.

"In addition to making it possible to meet the Wyatt housing goals, there can be a sufficient supply of materials to permit a volume of non-housing construction—industrial, commercial, farm, utility, etc.—greater than the maximum amount estimated for this year by the Federal government or by private sources.

"Accordingly, while it is desirable to prevent any excessive volume of non-essential construction, the attainable supply of materials would make it possible to go ahead this year with most of the non-housing construction which anyone is likely to want to start, and still meet the housing goals. The proposed order limiting non-residential construction, together with Priority Regulation 33, will assure that essential materials will not be taken away from housing in case any temporary shortages should develop.

"In the Council's study, the practical capacity of building product plants at the present time is assumed to be the actual output in 1941, except where additional capacity is known to have been added in the meanwhile.

"However, for the purpose of conservatism, estimates of attainable 1946 production of scarce building products have been reduced below the output which the building products industry actually attained in 1941. These estimates for 1946 are based on the assumption that needed price ceilings adjustments will be made immediately and that labor disputes do not retard production.

"These figures show that production of bathtubs in 1946 can be 24 per cent greater than the number required for the Wyatt program; brick production, 38 per cent greater; clay tile production, 81 per cent greater; concrete block production, 19 per cent greater; gypsum board and lath production, 33 per cent greater; lumber, millwork and flooring production, 66 per cent greater; cast iron sewer pipe production, 35 per cent greater; clay sewer pipe production, 91 per cent greater; and cast iron radiation production, 19 per cent greater.

"Production of the tenth item in the list of currently critical materials, plywood, will probably be 27 per cent less than could be used, but ample substitutes will be available.

"All of these figures refer to an output in 1946 ranging from 5 to 36 per cent less than that actually attained as recently as 1941. This indicates the large reservoir of capacity which can be brought into use in 1947.

"However, present production of these items in most cases is well below the rate which could be attained this year if necessary price

N.A.M. Sponsors Finance Conference At Palace, Mar. 26

The outlook for taxes, governmental economy and tax administration will be explored by some of the nation's leading experts at a government finance conference, sponsored by the National Association of Manufacturers, to be held at the Palace hotel, Mar. 26.

Dr. Harley L. Lutz, professor of public finance, Princeton university, will speak at the luncheon session on "The Old-Time Religion—Balance the Budget". H. E. Humphreys, Jr., chairman of United States Rubber Company Finance Committee, and of NAM Tax Council, will also speak at the luncheon, on "Overtaxing Our Economy".

Dr. Lutz, former president of the National Tax association, is well known as an author and columnist. He writes a syndicated column which appears in more than 3,000 newspapers. In the late 1920's he was a professor of economics at Stanford University.

Afternoon session speakers include F. A. Ulmer, treasurer, Monsanto Chemical Co., who will speak on "Sound Tax Adminisrtation"; Lane D. Webber, vice-president Southern California Edison Co., Ltd., "Five Steps to Solvency", and R. E. Burgess, Director of NAM's Government Finance Department, "A Report of Action".

Five hundred Northern California business and industrial leaders are expected to attend the conference, which is being co-sponsored by the area's leading trade, employers' and manufacturing association. A panel session, at which A. C. Mattei, president, Honolulu Oil Co., will act as moderator, is also scheduled in the afternoon.

#

HONOR GEN. STILWELL

General Joseph W. Stilwell, commanding general of the Sixth Army, will be guest speaker at a luncheon sponsored by the San Francisco Chamber of Commerce and Commercial Club, Thursday, in the Club's dining room.

General Stilwell has chosen as his luncheon topic, "Concerning the Army".

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

3/25/46 31
CONTRACT AWARDED
ESCONDIDO, San Diego Co., Calif.—American Pipe & Construction Co., 4635 Firestone Blvd., South Gate, was awarded contract by the Escondido Mutual Water Co., Escondido, March 16 at $85,013 for 27-in. pipe (item 5), and $42,380 for 21-in. pipe (item 6), for the construction of a water pipeline in Escondido.

The bids were taken as follows:
(1) 10,500 lin. ft. 27-in. 3/16-in. plate steel pipe;
(2) 6500 lin. ft. 21-in. same;
(3) 10,500 lin. ft. 27-in. gunite outside and coal tar inside pipe;
(4) 6500 lin. ft. 21-in. same;
(5) 10,500 lin. ft. 27-in. steel and concrete pipe;
(6) 6500 lin. ft. 21-in. same;
(a) furnishing labor only for excavating, installing pipe and backfilling;
(b) labor and material for same;
(c) furnishing material only.

Bids submitted for furnishing and installation of steel and concrete pipe on which basis the contract was awarded, were:

American Pipe & Construction Co., (5b) $85,013, (6b) $42,380.

The bids submitted for installation of pipe only were:

A. B. C. Construction Co., (1a) $26,273, (2a) $14,975, (a) $28,373, (4a) $15,475.

Haddock Engineers, Ltd., (1a) $26,695, (2a) $15,930, (3a) $28,795, (4a) $17,230.

Pacific Pipeline Construction Co., (1a) $33,368, (2a) $12,989, (3a) $51,008, (4a) $19,705.

Macco-Robertson Co., (1a) $47,341, (2a) $27,115, (3a) $49,126, (4a) $27,860.

Artukovich Bros., (1a) $67,311, (2a) $30,712, (3a) $69,886, (4a) $40,337.

Separate bids were received from Southern Pipe & Casing Co. and Western Pipe & Steel Co. for furnishing steel pipe and gunite and coal tar lined pipe.

34—DAMS, RESERVOIRS & DREDGING

3/25/46 • 34
CONTRACT AWARDED
GUAM, Mariana Islands.—Gaum Dredging Contractors, care of Standard Dredging Corp., 80 Broad St., New York City, N. Y., awarded contract by the U. S. Navy, Bureau of Yards and Docks, Washington, D. C., at an amount to be determined later, for dredging, furnishing dredging equipment and engineering services at Apra Harbor, Guam, Mariana Islands.

3/25/46 34
CONTRACT AWARDED
ALAMOGORDO, N. M.—Jones & Jones, construction engineers, Albuquerque, N. M., at $84,164.24, awarded contract by the City of Alamogordo, N. M., for the construction of an earthfill dam and water storage reservoir at Alamogordo, N. M. Plans and specifications were prepared by Ashley C. Classen & Associates, consulting engineers, 412 Martin Bldg., El Paso, Texas.

3/25/46 34
PLANNED
EASTERN IDAHO.—The Secretary of the Interior has approved a report outlined by the Bureau of Reclamation for a proposed plan for the reconstruction and further development of the Lewiston Orchards irrigation project in Eastern Idaho. Under the reconstruction plan proposed about 11,000 ft. of wooden flume and pipe would be replaced by concrete flume and pipe of welded steel. Work proposed on storage facilities at the project would include construction of an earth and rock fill dam to replace the present timber crib diversion dam on Webb Creek. Separate distribution systems would be built for irrigation and domestic water. The cost of the development recommended is estimated at $997,000.

3/25/46 •• 34
PLANS ON FILE
CENTRAL VALLEY PROJECT.—As previously reported, until April 8, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, Chief Engineer, Friant, Calif., under Spec. 1178 for construction of Friant-Kern Canal stilling basin, Cottonwood Creek Bridge, Friant Dam landscape area improvements, Friant Division, Central Valley Project. Work is located about 1.5 miles northeast of Friant.

Work involves:
(1) 400 c.y. common excavation for structures;
(2) 2,600 c.y. rock do;
(3) 190 c.y. excavation, concrete;
(4) 2,200 c.y. all classes excav. for pipe trenches;
(5) 320 s.y. chipping and roughening concrete surfaces;
(6) 13,000 c.y. backfill;
(7) 13,000 c.y. compacting backfill;
(8) 800 c.y. embankment;
(9) 400 c.y. riprap;
(10) constructing 860 l.f. 12-in. diam. split-sewer pipe drains with cemented joints;
(11) constructing 900 l.f. 12-inch do with uncemented joints;
(12) constructing 80 l.f. 24-in. diam. sewer-pipe drains with cemented joints;
(13) drilling 1,600 l.f. holes for anchor bars and grouting bars in place
(14) 130 c.y. concrete in outlet valve structure;
(15) 3,000 c.y. concrete in floor and wall footings of stilling basin;
(16) 2,100 c.y. concrete in walls of stilling basin;
(17) 180 c.y. concrete in bridge struc.
(18) 20 c.y. concrete in septic tanks;
(19) 90 c.y. concrete in water tanks;
(20) 260 c.y. concrete in rest-houses;
(21) constructing three rest houses, except concrete;
(22) 54,000 s.f. vacuum concrete process for floor and inside surfaces of walls of stilling basin and transition;
(23) placing 580,000 lbs. reinf. bars;
(24) 1,000 s.y. grouted paving gutters
(25) 90 l.f. gravel backfilled gutters
(26) installing 5,000 lbs. misc. metalwork;
(27) constructing 3 M ft. b.m. timber railings;
(28) placing 250 s.f. elastic joint filler stop;
(29) placing 1,850 l.f. rubber water work;
(30) installing 4,500 lbs. of standard metal pipe, fittings and valves;
(31) laying 150,000 lbs. cast iron pipe
(32) 5 c.y. rubble masonry;
(33) laying 100 l.f. clay sewer pipe with poured joints;
(34) laying 2,400 l.f. drain tile embedded in gravel;
(35) placing 350 c.y. of water-bound macadam base course;
(36) 180 c.y. crushed rock for wearing course, in place;
(37) furnish, haul and spread 5,000 gals. road oil;
(38) mix, compact and finish 2,100 s.y. oil-treated wearing course;
(39) installing 1,100 lbs. pumps;
(40) installing 150 l.f. embedded electrical conduits;
(41) installing 5,000 l.f. of armored parkway cable.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Building, 7th and K Streets, Sacramento 14; R. K. Durant, Acting Construction Engineer, Friant, Cal., and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for specifications; to others, $2.50, not returnable.

Engineering Section

40— STREETS AND HIGHWAYS

3/25/46 40

PLANNED

IDAHO STATE.—T. Matt Hally, State Director of Highways, Boise, has announced a three-year tentative state highway construction program, the major projects of which include a new Clearwater bridge at Lewiston, a $2,000,000 allotment for extension of the Lewis and Clark highway up the Nochsa River, reconstruction of the North and South highway between Lewiston and Spalding and in the Gennesee district, building a new grade up Lapwai Creek out of Culdesac to replace the Culdesac-Winchester hill grade, completion of the Graves Creek cutoff between Cottonwood and Whitebird, and projects in the Viola - Potlach district which would bring the North and South highway up to standard as far north as Potlach.

3/25/46 ** 40

BIDS WANTED

FORT PECK, Mont.—Until April 15, 10 A. M., bids will be received by the U. S. District Engineer Office, Fort Peck, Mont., for the construction of a road from the dam to the spillway and for raising the crest of main dam and dike sections of the Fort Peck Dam; Serial 15.

The project involves:

Job No. 1

Construction of a road from the dam to the spillway at Fort Peck, Mont., including formation of the roadway embankment, subgrade, approaches, shoulders, base course, drainage and interception ditches, and the construction and installation of culverts, drainage structures and guard posts. This road, when completed, will join at a designated location near the main control shafts a new road which is to be constructed across the crest of the dam.

Job No. 2

Raising the crest of main dam and dike sections of the Fort Peck Dam to a net elevation of 2280.5 ft.; construction of roadway, except for leveling and wearing courses, across the crest of the dam, and the installation of a night lighting system along the roadway.

Bidders may submit a combination bid for Jobs No. 1 and 2 on separate bids. Bid bond for 20% to accompany bids.

3/25/46 ** 40

BIDS WANTED

OTERO COUNTY, New Mexico.—Until April 5, 10 A. M., bids will be received by B. W. Matteson, division engineer, Public Roads Administration, 101 U. S. Courthouse, Santa Fe, N. M., for construction of 0.709 mile of Alamogordo-Pinon Rd., New Mexico Forest Project 35-D, Otero County, New Mexico; 225 calendar days for completion. Plans and specifications are obtainable from the above office upon deposit of $10, along with bidder's information and forms. Bids must be accompanied with a guarantee in 5% of amount of bid.

41—GAS, WATER AND OIL PIPE LINES

3/25/46 ** 41

BIDS WANTED

CONTRA COSTA COUNTY, Calif. —As previously reported, until April 3, 5:30 P. M., bids will be received by the East Bay Municipal Utility District, Room 312, 512 16th St., Oakland, under Spec. LS 353 for installing approximately 19,100 ft. of 2-in., 4-in., 6-in. and 8-in. water mains in Orinaa Water District, Contra Costa County.

The work involves:

(1) 3846 cu. yds. excavation trench, 18-in. minimum width for pipe;
(2) 50 cu. yds. extra excavation outside main trench;
(3) installation of 2-in. cast iron pipe, 180 lin. ft.;
(4) installation of 4-in. cast iron pipe, 2000 lin. ft.;
(5) installation of 6-in. cast iron pipe, 10,000 lin. ft.;
(6) installation of 8-in. cast iron pipe, 6920 lin. ft.;
(7) installation of extra valves and fittings, 1000 lbs.
(8) installation of concrete pipe anchors, 5 cu. yds.;
(9) installation of 10 ¾-in. copper services, 150 lin. ft.;
(10) installation of main line taps for ¾-in. service connections, 5 taps;
(11) paving over trench with penetration type macadam, 400 sq. yds.;
(12) installation of 4-in. pressure regulator assembly as shown on the drawings, including concrete pit;
(13) installation of concrete backfill in creek bed, 50 cu. yds.

3/25/46 ** 43

BIDS WANTED

EL CENTRO, Imperial Co., Calif.—Until April 9, 10 A. M., bids will be received by the board of directors of Imperial Irrigation District, El Centro, Calif., for furnishing, delivering and supervision of installation of the following equipment under Spec. 203 for the Coachella substation, located in Riverside County:

(1) 3 outdoor type, single-phase power transformers, 2500-kva., self-cooled, rating 50,300/87,125 volts (star) to 34,000/17,000 volts (delta)
(2) 1 spare 92,000-volt terminal;
(3) 1 spare 34,500-volt terminal.

Specifications available from the above office upon deposit of $10; guarantee of 5% to accompany bids.

1946 Building Need

(Continued from Page One)

ceiling adjustments were made. Production figures for January, 1946, as reported by the U. S. Bureau of the Census and other sources, compare as follows with the average monthly production in 1941:

"Bathtubs, 36 per cent less; brick 35 per cent less; clay tile, 27 per cent less; gypsum-board and lath, 7 per cent less; lumber, millwork, and flooring, 38 per cent less; plywood, 29 per cent less; cast iron sewer pipe, 42 per cent less; clay sewer pipe, 26 per cent less; and cast iron radiation, 73 per cent less. No comparable figures are available for concrete block.

"Production of some scarce lines has increased somewhat since January, but the output of most critical items remains well below the needed volume and will remain so until pricing problems are solved.

"The Council's production estimates show that there is ample capacity not only to meet the Wyatt home building goal in 1946 but also to permit $9,000,000,000 of other types of construction, including repairs and maintenance.

"In computing the volume of materials needed to meet the Wyatt housing goals in 1946, the Council has allowed for starting 1,200,000 new units, as proposed by Mr. Wyatt, and completing 75,000 units started last year but not finished by the first of this year. In addition, the Council's estimates call for enough materials to permit adding 150,000 more units through conversion. Wyatt's program did not make provision for any conversions.

"The Bureau of Labor Statistics in 1944 made this statement:

"'Productive capacity for all types of building materials, except plumbing fixtures and lumber, is sufficient for a construction rate of $15,000,000,000 per year. In the lumber industry, the plant limitation is logging equipment, which is badly deteriorated but can be restored rapidly; sawmill capacity is sufficient. Capacity for plumbing fixtures is adequate for a construction program of $12,000,000,000 per year, with likelihood of expansion before this rate is reached.'

"It should be noted that the dollar volumes referred to are in terms of 1940 prices. At today's price levels which are 35 per cent higher than 1940 prices, the values cited by the Bureau of Labor Statistics would be more than $19,000,000,000, considering the availability of all materials except lumber and plumbing fixtures, and more than $16,000,000,000, considering the availability of plumbing fixtures.

"Inasmuch as the Council's estimates of probable 1946 production are well below the quantity of materials required for $19,500,000,000 of construction, it would appear that its estimates are definitely on the conservative side and that they are readily attainable, provided wage-price policies are handled in a prompt and competent manner by the government.

"There is no production problem which cannot be met by adjustment of price ceilings on scarce items. There is no need for subsidies of any kind."

PLANS and Speculations

Woodland: Selection for a site for installation of 24 emergency housing units will be made tomorrow, Mayor H. F. Anderson said today. Units will arrive here within 35 to 60 days, the mayor said.

oOo

Fort Bragg: Sam Shafsky, who has been visiting relatives here, revealed he plans to build a half million dollar hotel at Kotzebue, Alaska.

oOo

Bakersfield: Chester James, Kern county planning engineer, outlined county road plans last night to a group of state officials and interested county and near by cities officials in a meeting in Weit's hotel, Wasco.

oOo

Seaside: Two pre-fabricated homes have been erected by local contractors for Charles Hufford and Charles Bosso, of this city. Both are houses of the ranch type and cover 811 feet of floor space. They have hardwood floors, can be financed by FHA, and comply with all building codes of the city and county.

oOo

San Mateo: The San Mateo Times has received a permit to construct and operate a standard radio station, which will operate on 1550 kilocycles and broadcast day and night. Both transmtting facilities and studios will be located here.

Santa Rosa Meeting To Discuss Plans To Develop Industries

The Santa Rosa hotel will be scene of a discussion Friday aimed to develop ideas for publicizing opportunities for industrial expansion in northern California.

City officials, planning and industrial engineers, and county officials, will discuss methods of coordinating material for presentation to prospective investors and new industries, Chairman S. R. Frizelle, industrial committee of the State Chamber of Commerce, announced.

New Administration Districts for U. S. Army Engineers Here

As a part of the general readjustment of the Army to peacetime routine, announcement was made today by Col. George Mayo, acting division engineer, of a change in the Army Engineer set-up for the eight Western states.

Effective Mar. 23, the present Pacific division, which, during the War, administered the area west of the Rockies and Alaska, will be split to form the South Pacific division with headquarters in San Francisco, and the North Pacific division with headquarters in Portland.

The South Pacific division will comprise the San Francisco, Sacramento and Los Angeles Engineer districts and will be under the command of Col. E. H. Marks, who is expected to assume his duties Apr. 15.

Brig. Gen. Philip G. Bruton, who has been division engineer for the past year, was retired on Mar. 11.

The North Pacific division, which will comprise the Portland, Seattle and Alaska Engineer districts, will be under the command of Col. Theron D. Weaver.

The reassignment of divisions, Colonel Mayo stated, is in conformance with the status of Engineer activities before the War and will permit closer supervision of the large peace-time construction projected throughout the West in flood control and river and harbor development.

'QUAKE DESIGN CLASS

A class in "Earthquake Resistant Design" is scheduled to begin April 5 at 7 p. m. in the University Extension, University of California Berkeley campus. Cost for the 15 lessons is $15.00.

GROOVER AND I

BIG THREE? NO!

Whenever our International Relations seem about to bust a button there are those who claim it is time for another meeting of the Big Three.

* * *

Shouldn't we take another look at this?

The most potent member of the original Big Three joined his Ancestors nearly one year ago, and another member has been voted out of office, sic gloria.

* * *

If the United Nations Organization is to be successful it must be given authority—top authority! Each nation must yield to UNO a part of its soverignty—and that combined power become the instrument of Organized Reason through which Nations live in Peace.

* * *

The wreck of the League of Nations should be a lesson to us. With the single exception of Christianity, the League of Nations was Man's broadest attempt at World Peace—the League had everything EXCEPT sufficient authority and power to make it work!

* * *

When international strains occur, it would be more proper for UNO to summon the Big Three, the little three, or any other three and talk things over.

* * *

If UNO is to work it cannot be subservient to a secret meeting by individuals temporarily holding office. We are hoping that UNO is permanent, for the world and for generations—and not for just short terms of office.

* * *

By the way, aren't some of you guys holding out on the Red Cross? The drive is behind. Search your Conscience—and your pockets for a few extra dollars.

Steel Cargo Booms Declared Surplus

WASHINGTON, D. C. — Over $100,000 worth of new and used steel cargo booms, ranging in capacity from four to 30 tons, have been declared surplus by the Armed Services and are to be sold at fixed prices substantially under their original cost, the United States Maritime Commission announced today.

The booms, constructed under rigid Government standards, are fabricated in a steel tubular design with proper thickness and diameter proportionate to appropriate length and load capacity.

The booms range in price from $40 for a 30-foot, 5-ton, to $80 for a 63-foot, 30-ton capacity. The booms, located on both the East and West Coasts, may be inspected upon application to the Materials Disposal Section, U. S. Maritime Commission, Washington 25, D. C., or the Maritime Settlement Section office at 14th and Franklin Streets, Oakland 12.

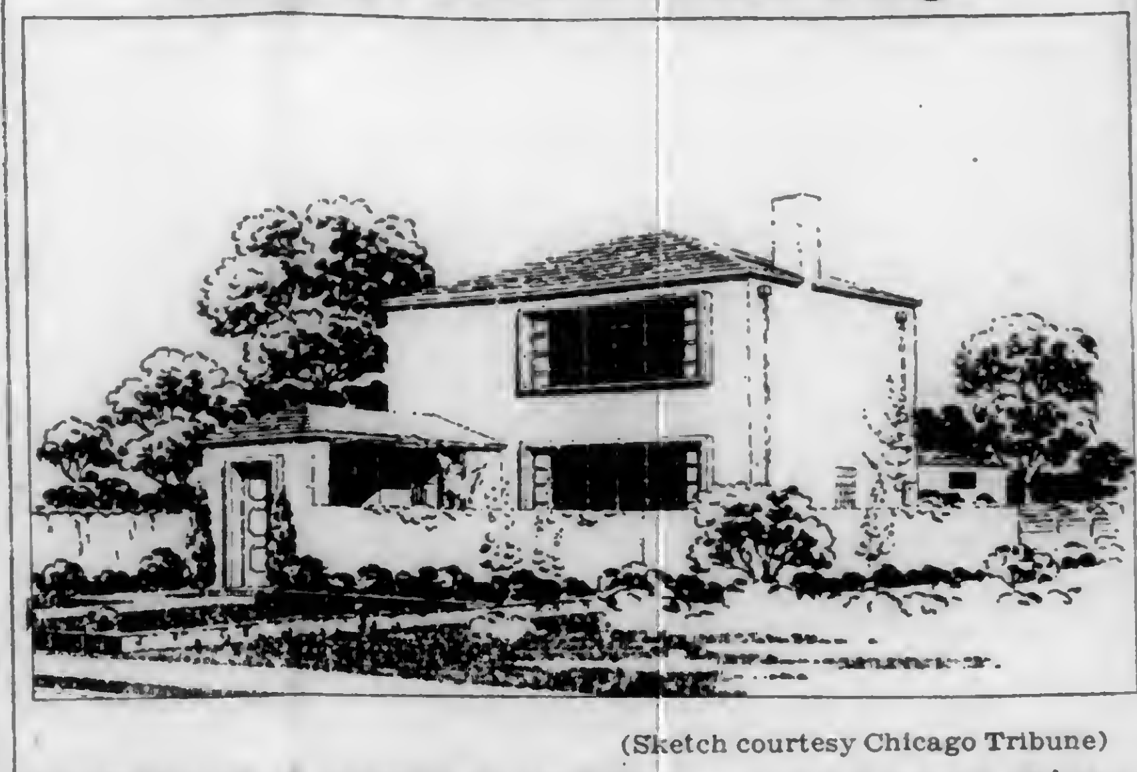
REBER PLAN TALK

The Civic League of Improvement clubs and associations board of governors will meet Thursday at 7:30 p. m. in Mills Tower, 220 Bush street, to discuss the proposed Reber plan of bay development.

Berkeley Architect's Prize Design



(Sketch courtesy Chicago Tribune)

ENTERED IN A NATIONAL CONTEST, sponsored by the Chicago Tribune, this design of a home adaptable to a 30-foot lot was the entry of George R. Klinkhardt, 44 Eucalyptus road, Berkeley, and won him a prize of $1,000. In the compact design are two bedrooms, large living room, dining room, laundry, garage, kitchen, bath, extra lavatory, plenty of closet space, and large, paved patio. A play lawn is part of the design, and a space large enough for a Victory garden if the owner is agriculturally inclined.

Western Pine Price Upped $4.60

Price Administrator Paul Porter has announced an average sales price increase of $4.60 per thousand feet of western pine lumber and comparable increase in pine agricultural containers.

The adjustment will cause the following:

(1) Increase price of shop grades $6.70 per thousand feet above present level;

(2) Increase price of dimension lumber $3 per thousand feet;

(3) Increase price of flooring, drop-siding and ceiling an average of $9 per thousand feet.

OPA INCREASES PRICE OF HARDWOOD FLOORING

Increases in mill ceiling prices for hardwood flooring, designed to expand flooring production for building, have been announced by the Office of Price Administration.

The increase becomes effective Mar. 29. For hard maple, tongued-and-grooved stock, 25/32-inch and thinner, the increase is 9 per cent; for birch and maple tongued-and-grooved stock, 25/32-inch and thinner, 18 per cent; and for hard maple, birch and beech jointed stock, 25/32-inch and thinner and all stock thicker than 25/32-inch, five per cent.

For the present, the increases may be passed on to buyers by distributors. O.P.A., however, said it will review distributors' margins to determine whether they are in a position to absorb any increase.

State Civil Service Construction Jobs Open

The California State Personnel Board announces that the following positions are open, and that examinations will be conducted as listed below:

Position	Pay	Exam. Date	File on or before
Assistant Bridge Engineer	$270	May 11	Apr. 25
Hy. Equip. Operator-Laborer	170	May 11	Apr. 25
Cement Finisher	prevail. rate	May 7	Apr. 22
Assistant Civil Engineer	270	May 7	Apr. 22
Senior Engineering Aid	200	May 4	Apr. 18
Structural Engineering Associates	355	May 4	Apr. 18
Senior Structural Engineer	415	May 4	Apr. 18
Junior Bridge Engineer	220	Apr. 27	Apr. 11

Applications should be filed to the State Personnel Board, 1015 "L" Street, Sacramento, and must be made on Form 660, available from the board. Veterans get preference.

Increased Truck Production in 90 Days, Washington Forecast, as Strike Gloom Lifts

SPECIAL FROM THE DAILY PACIFIC BUILDER'S WASHINGTON BUREAU

Quick snapback in production of motor trucks in the next 90 days was being forecast in Government quarters today as a gradual elimination of labor troubles, parts shortages, pricing snags was foreseen.

Plagued by reduced inventories of raw materials resulting from the steel strike, and accompanying interruptions in the flow of parts from suppliers to vehicle manufacturers, motor truck production in February totaled only 28,692 units, the lowest monthly total since Pearl Harbor, according to the Civilian Production Administration.

This compared with postwar peak of 54,684 units produced by truck manufacturers in January.

Ending of the steel strike and resumption of steel production on a large scale, settlement of labor difficulties at a number of parts plants, a labor-management agreement at strike-bound General Motors, and improvement in the supply situation generally all are now seen as factors which have removed many of the uncertainties in motor truck production.

Government quarters, usually more conservative than the automotive industry in estimating future production trends, this week was forecasting that truck production in March would total 56,000 units, in April 76,000 units, and in May 85,000 units.

Attainment of a production rate of 85,000 units in May would be the equivalent of 1,200,000 units annually.

In the peace-time years before the war, truck production usually totaled around 500,000 units annually.

In peacetime, of course, truck production was gauged to the number of units users would buy.

Today, a different situation exists after five years of curtailed production. "Unlimited", is the way Government and industry soucres view the new truck market.

To remove any impediment to production that may have been presented by pricing procedures, the Office of Price Administration last week exempted from price control truck parts sold for use as original equipment in the manufacture of trucks. In addition, manufacturers were given a method of obtaining adjustments, where required, in the ceiling prices for automotive parts for repair or replacement use.

Sell Surplus Cast Iron Soil Pipe

SPECIAL FROM THE DAILY PACIFIC BUILDER'S WASHINGTON BUREAU

A sale of surplus cast iron soil pipe and fittings—nation-wide in scope—is being planned by War Assets Administration for Mar. 29. The agency has on hand a considerable supply of two- to 15-inch standard, Victory and extra heavy soil pipe, and this material is to be sold locally by Regional War Assets offices wherever the material now is on hand.

Sales of the pipe is to be made simultaneously on Mar. 29 by all Regional offices and will be offered to priority claimants and commercial channels at the same time. At each Regional office, 30 per cent of the available supply is to be set aside for sale to priority claimants. The minimum lot which will be sold is $500 to wholesalers and large retailers, and $200 to small retailers and priority claimants.

BIDS POSTPONED
CENTRAL VALLEY PROJECT, California.—Until April 10, 10 A. M., bids will be received by Bureau of Reclamation, Walker R. Young, chief engineer, Friant, Calif., under Spec. 1181 for construction of earthwork, canal lining and structures, Kings River wasteway and Kings River siphon, station 1591 plus 66.15 to station 1647 plus 75, Friant-Kern Canal, Friant Division, Central Valley Project. The work is situated approximately 18 miles east of Fresno.

The principal items of work and the estimated quantities involved are as follows:

(1) 237,500 c.y. common excavation for canal;
(2) 193,000 c.y. rock do;
(3) 5,500 c.y. compacting embankments;
(4) 40,000 c.y. common excavation for wasteway channel;
(5) 100 c.y. rock do;
(6) 35,000 c.y. common excavation for struc. except siphon barrel;
(7) 300 c.y. rock do;
(8) 200,000 c.y. common excav. for siphon barrel bet. Sta. 1596 plus 88.9 and 1627 plus 41.36;
(9) 100 c.y. rock do;
(10) trimming 6,100 s.y. earth foundations for concrete lining;
(11) preparing 16,000 s.y. of rock do;
(12) 16,300 c.y. backfill about struc.;
(13) 122,000 c.y. backfill about siphon barrel;
(14) 6,200 c.y. compacting backfill about structures;
(15) 6,100 c.y. riprap;
(16) constructing 265 c.y. filter;
(17) constructing 1,250 l.f. of feeder drain;
(18) constructing 1,150 l.f. of 6-inch dia. tile drains with uncemented joints;
(19) 4140 c.y. concrete in struc., except paving;
(20) 21,600 c.y. concrete in siphon barrel;
(21) 185 c.y. concrete in struc. paving;
(22) 2,070 c.y. concrete in canal lining;
(23) placing 9,994,000 lbs. reinf. bars;
(24) placing 785 s.f. elastic joint-filler material;
(25) placing 280 l.f. rubber water stops;
(26) installing 360 l.f. clay pipe in filters;
(27) installing 8,700 lbs. of cast iron pipe in filters;
(28) laying 66 l.f. 12-in. diam. cement-asbestos pipe;
(29) erecting 250,000 lbs. structural steel in highway bridge;
(30) placing 79,500 lbs. of metal water stop in joints;
(31) erecting 11 M ft. b.m. timber in railings;
(32) installing 61,000 lbs. radial gates;
(33) installing 42,200 lbs. radial-gate hoists and operating and control mechanisms;
(34) installing 10,930 lbs. cylinder gate, gate frames and hoist;
(35) installing 11,900 lbs. of misc. metal work;
(36) installing 125 cwt. of bit. material in float drums;
(37) installing 1,400 l.f. of electrical conduits;
(38) installing 550 lbs. of electrical conductors and ground wires;
(39) installing 600 lbs. electrical apparatus;
(40) constructing 0.75 mile barbed wire right-of-way fence;
(41) constructing 0.20 mile of comb. barbed-wire and woven-wire right-of-way fence;
(42) constructing two cattle guards.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; R. K. Durant, Acting Construction Engineer, Friant Calif., and Michael W. Straus, Commissioner, Bureau of Reclamaton, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for copies of the specifications and and drawings; to others, $2.50 per copy, not returnable.

"It took a war to teach me how old my kitchen really is!"

Your wartime kitchen was a busy place. Gas rationing kept you home. You did more cooking, canning and preserving. And all this kitchen activity showed up the good and bad features of your kitchen.

Have a plan for your new kitchen with your personal ideas carefully itemized—the range, refrigerator and sink arranged for a smooth flow of food and work; cabinet and storage space organized to save tiresome cross-walking, reaching and stooping; modern lighting overhead, at the sink, range and work counters.

Be sure to have switches and electrical outlets properly spaced and placed. Finally, check over your plan with your architect, contractor or this company.

HAVE A PLAN for your new kitchen that will take care of the new appliances, kitchen aids, lighting, etc., that you will be buying in the years ahead.

Order Limits On All New Construction

PLANS and Speculations

Oakland: The DeLeuw, Cather proposal to solve the 12th street dam traffic bottleneck has received the "go ahead" sign from the city council and plans are being prepared by City Engineer Walter N. Frickstad.

oOo

Yreka: The city council has agreed to sell its share for $10 in a lot wanted for a veterans' memorial. The American Legion and Veterans of Foreign Wars are cooperating to build a joint clubhouse and hall on the site. The building will cost about $20,000.

oOo

Santa Clara: A deed to 48 acres of land, suitable for home sites, has been recorded here for Henry Kaiser. Sale price was reported to be $147,000.

oOo

Chico: Overcrowding at the Chico State College will be remedied when the million dollar building program, designed to accommodate 600 students, is completed. Only materials and labor shortage delay construction, President Aymer J. Hamilton said. Included in Chico expansion are a science annex, music and speech annex and other buildings totaling more than $750,000.

oOo

Reno: The Lyon building, already ruined by fire, may be razed according to plans revealed at the last city council meeting. It is owned by A. F. Winter and Barney Morris, of Portland, Oregon.

oOo

Carson: An additional 24 temporary housing units have been approved for this city, the Federal housing authority has announced. Arnold Millard, chairman of the local board, is in charge.

STRUCTURAL ENGINEERS REGULAR MEETING APR. 2

The Structural Engineers' Association of Northern California will meet Apr. 2 in the Engineers Club, 206 Sansome street, to discuss (1) collective bargaining and its relation to the engineering profession; (2) the progress of the publicity program for engineers; (3) and reports of special committees for review of the proposed San Francisco building code.

The group will assemble at 5:30 p. m., dinner will commence at 6:15, and the program of the evening is slated to start at 7:30.

Bids Opened for First Construction on $300,000,000 Project

PACIFIC NORTHWEST HISTORY WAS MADE at Coulee Dam when Bureau of Reclamation officials opened bids for the first construction work on the Columbia Basin Project of south central Washington where more than 300 million dollars will be spent to carry water to the 17,000 new farms. Sixteen firms submitted offers. Low bid with $619,000 by the Morrison-Knudsen Company, Inc., Seattle. Reclamation officials pointed out that Pacific Northwest pioneers launched their campaign for the big irrigation system and Grand Coulee Dam more than a quarter of a century ago. Shown here, left to right, are Assistant Supervising Engineer R. B. Wiliams; Irrigation Engineer H. A. Parker; Chief Clerk C. B. Funk; and Office Engineer F. J. Sharkey. This bid call was for two million cubic yards of earth and rock excavation for the main canal of the irrigation system. —(Bureau of Reclamation Photo)

HUGE PROJECT STARTS

Maj. Gen. Lewis A. Pick launched the 1½ billion dollar flood control program of the Missouri river basin last week when he turned the first shovelful of sod for a two-mile flood wall being built to protect Kansas City.

COST ACCOUNTANTS DISCUSS SUGAR COSTS

"Sugar Refinery Accounting" was the topic last night at the dinner of San Francisco chapter, National Association of Cost Accountants held in the Engineer's Club.

Speaker of the evening was Bert E. Brown, accountant of J. D. & A. B. Spreckels company, and member of N.A.C.A. He reviewed the methods of sugar manufacture from sugar beets and elaborated on the cost accounting system used.

Sugar, the only food product under ation, is still a problem to the manufacturer as well as to we, the people, Brown stated.

SECOND SPAN PLANS PREDICTED THIS YEAR

Recommendations for the location of a second Bay Bridge span will be in the hands of the Toll Bridge Authority before the end of 1946, Public Works Director C. H. Purcell announced Monday.

Preliminary design studies are well advanced, he said. When economical span lengths are determined and pier locations are more definite, test borings will be undertaken, Purcell pointed out.

To Sell 48 Wood And Steel Barges

Competitive sealed bids will be opened on 48 wood and steel barges at 2:30 P.M. (EST) Apr 22, in Washington, D. C., by the U. S. Maritime Commission.

Twenty-five of the barges, 104 feet long, bolted and welded steel, are located at Fort Mason, San Francisco. Eight are at Wilmington, Calif., and one at Seattle.

Inspection of the barges at Ft. Mason may be made upon application to Superintendent, Water Division, Army Port of Embarkation; at Wilmington, Superintendent, Water Division, Los Angeles Port of Embarkation, and at Seattle, Superintendent, Water Division, Army Port of Embarkation.

GROOVER AND I

HOMEBUILDERS

First, a congratulation to Architect George R. Klinkhardt of Berkeley, upon winning a $1,000 prize in a National Home Design contest sponsored by the Chicago Tribune. The winning design is for a spacious two-bedroom home for a 30-foot lot.

★ ★ ★

AN IDEA:

San Francisco has a hereditary curse of 25-foot lots. This cannot be changed in established districts. Wider lots in new sub-divisions would force the cost of homes above the price-range where they are most urently needed.

★ ★ ★

I have long maintained that San Francisco has the highest grade group of Homebuilders to be found anywhere in this Nation. Our local Builders are tops, but perhaps there is one idea they haven't yet tried:

★ ★ ★

Why not the Homebuilders sponsor an architectural competition for a post-modern type of home to be built on a 25-foot lot?

★ ★ ★

By new design, I am not meaning merely to slap a few panels of plastic and bars of chromium on the same old blueprint—but to take a new sheet of paper and design an entirely new and modern factory dedicated to the art of living—avoiding the freakish and bizarre—but utilizing all that is modern, up-to-date, labor-saving, and comfort-giving.

★ ★ ★

Make the contest worthwhile. So long as it doesn't cost me anything to spend the Homebuilders money, I would suggest "win, place and show" of $25,000, $15,000, and $10,000.

★ ★ ★

If this idea is taken seriously and made worthwhile, it would prove not only profitable to the Home Building Industry but also of lasting benefit to San Francisco and the San Franciscans these homes would shelter.

Non-essential Building and Repairs Curbed To Spur 2,700,000 'Vet' Homes

MARCH 26.—To channel critically needed building materials into veterans home construction the government today issued an order banning new construction and repairs of virtually all types of buildings.

Aim of the order is to insure construction of 2,700,000 veterans homes by the end of 1947 through eliminating non-essential building and repairs.

All new commercial and industrial buildings, which may be permitted, must be approved by the government, the order issued by Civilian Production Administrator John D. Small, and Federal Housing Expediter Wilson Wyatt, said.

The order applies in the entire United States, Puerto Rico and the Virgin Islands, and may later be extended to Hawaii and Alaska.

Construction work presently underway is permitted to continue but work must be taking place today, or materials incorporated in the structure.

LOCAL COMMITTEE APPROVAL

Committees composed of local citizens will be set up in 71 cities throughout the country to rule on the question of whether government approval shall be granted the repair or construction. Applicants may appeal decisions to the CPA or Federal Housing Administration. Persons desiring to begin work prohibited by the order should file with local offices of the FHA or CPA.

Work done on roads, streets, sidewalks, railway tracks, which include street railways, fences, silos, bridges, tunnels, subways, pipe lines, power lines, sewers, surface or underground mines, wells, dams or canals, is excepted from the order.

In addition, military construction and veterans projects are not stopped by the order, and disaster repairs to buildings may be permitted.

ORDER PROHIBITS

The order specifically bans the following unless approved by the government:

1. **Construction of or repair work in excess of $400 on houses, including farmhouses or other property on residential property designed for occupancy of less than six families.**
2. **Construction or repair jobs of $1,000 or more on hotels, resorts, apartment houses or other residential buildings designed for occupancy of six families or more.**
3. **Work in excess of $1,000 on commercial or service establishments such as offices, stores,** garages, theaters, warehouses, radio stations, and gas service stations.
4. **Jobs costing more than $1,000 on farm buildings.**
5. **Work in excess of $1,000 on churches, hospitals, schools, public buildings and charitable institutions.**
6. **Jobs costing more than $15,000 in virtually all industrial and commercial buildings, plants or factories.**
7. **Work in excess of $200 on virtually any other type of building.**

C of C Urges Sale Of Geneva Steel

Earliest possible sale of the Government-owned steel plant at Geneva, Utah, was urged yesterday by the Board of Directors of the San Francisco Chamber of Commerce upon recommendation of the Chamber's Manufacturers Committee and Iron and Steel Section.

Opening of bids for the disposal of the Geneva steel plant had been originally scheduled form Mar. 1, subsequently deferred until April 1, and more recently postponed to May 1.

In urging immediate sale of the plant, the Board reaffirmed the position taken previously by the Western States Council in advocating earliest possible sale to the highest responsible bidder, a disposal price consistent with prospective earning power and the establishment of a pricing policy by the favorable bidder that would assure supplies of steel for western fabricators under competitive conditions.

"Operation of the Geneva Steel plant by private enterprise is needed immediately to provide western steel users with additional supplies from western sources," declared Alfred H. Meyer, chairman of the Chamber's Industrial Development committee.

"Annexation of this new source of supply would assure western fabricators of a continuous flow of steel to satisfy the demands of the rapidly growing western market."

BIDS WANTED

STATE OF OREGON.—Until April 5, 9 A. M., bids will be received by the Oregon State Highway Commission, Auditorium, Public Service Bldg., Portland, Ore., for construction as follows:

Jackson County—Reese Creek-Antelope Creek section of the Crater Lake Highway, Federal Project No. S-47 (4). 6.65 miles of grading and paving. Requires approximately 198,000 cu. yds. excavation, 350 cu. yds. concrete in box culverts, end basins, etc.; 86,000 lbs. metal reinforcement; 2 M ft. b.m. untreated lumber; 72,000 cu. yds. gravel topping; 10,900 cu. yds. crushed gravel; 86,000 sq. yds. portland cement concrete pavement, and 40 acres seeding to grass.

Klamath County — Widen existing bridge over Altamont Canal, Klamath Falls, Federal Project No. S-31 (3). Involves approximately 75 cu. yds. structural excavation; 165 cu. yds. class A concrete; 36,600 lbs. metal reinforcement, and 200 lin. ft. metal handrail.

Klamath County—Washburne Way-Altamont Drive lighting project in Klamath Falls. State project. Involves furnishing and placing approximately 3150 lin. ft. conduit; 14 only twin light standards; 8 only single light standards; 14 only twin light transformers; 8 only single transformers, and 36 only luminaries.

Klamath County—Klamath Falls-U. S. R. S. section of the Klamath Falls - Lakeview Highway. Federal Project No. S-31 (3). 1.84 miles of grading and paving. Requise approximately 38,700 cu. yds. excavation; 1810 cu. yds. concrete curbs, islands and walls; 9500 sq. yds. concrete walks and driveways; 6000 lbs. metal reinforcement; 13,000 cu. yds. talus rock; 23,000 cu. yds. crushed rock; 96 tons asphaltic material, and 17,700 tons asphaltic concrete pavement.

Klamath County—Spring Creek Hill section, The Dalles-California Highway. Federal Project No. F-320 (2). 2.01 miles of grading. Requires approximately 217,000 cu. yds. excavation; 60 cu. yds. concrete, and 8150 lbs. metal reinforcement. This project may be bid in combination with the Spring Creek Hill-Lobart grading project in Klamath County.

Klamath County — Spring Creek Hill-Lobert section of The Dalles California Highway. Federal Project No. F-320 (2). 8.88 miles of grading. Requires approximately 511,000 cu. yds. excavation; 132 cu. yds. concrete, and 19,800 lbs. metal reinforcement. This project may be bid in combination with the Spring Creek Hill grading project in Klamath County.

Lincoln County—Oceanlake section of the Oregon Coast Highway. State project. 1.19 miles of grading and bituminous macadam surfacing. Requires approximately 15,000 cu. yds. excavation; 900 cu. yds. concrete curbs and walls; 18,000 cu. yds. rock or gravel materials, and 350 tons asphaltic materials.

Lincoln County—Construct 182 ft. reinforced concrete viaduct over Spencer Creek on the Oregon Coast Highway near Newport. Federal Project No. F-98 (4). Involves approximately 1410 cu. yds. structural excavation; 520 cu. yds. class A concrete; 80 tons reinforcing steel, and 380 lin. ft. metal handrail.

Multnomah County — Furnish and install roadway lighting system on Interstate bridge on Pacific Highway at Portland. State project. Involves approximately 6400 lin. ft. miscellaneous type circuits and 52 luminaries, ail in place on bridge.

Sherman County—North Unit, Fulton Canyon section of the Fulton Canyon - Wasco Highway. Federal Project No. S-68 (4). 1.30 miles regrading, surfacing and oiling. Requires approximately 12,000 cu. yds. excavation; 5300 cu. yds. crushed rock, and 64 tons asphaltic materials. This project may be bid in combination with the Mill Creek Forks-The Dalles project in Wasco County.

Union County—Construct 32x88 ft. frame maintenance building at Elgin. State project.

Wasco County—Mill Creek Forks-The Dalles section of the Mill Creek County Rd. Federal Project No. S-78 (1). 4.06 miles of grading and 6.91 miles of surfacing and oiling; also furnish 6600 cu. yds. crushed rock in stockpile. Requires approximately 33,200 cu. yds. excavation; 10 cu. yds. concrete; removing 11,100 lin. ft. wood and steel water mains; relaying or installing 8600 lin. ft. 14-in. steel water pipe; 33,000 cu. yds. crushed rock, and 500 tons asphaltic materials.

Specifications obtainable from the Oregon State Highway Commission office, Room 319, State Office Bldg., Salem, Ore., upon payment of $2.

PLANS and Speculations

San Francisco: Low cost permanent paper homes are being constructed by a firm here. The material used, called Sonsoweld, consists of two thin panels of hard, compressed paper impregnated with resin and held apart by wood strips.. The space between the panels is filled with a corrugated paper core.

oOo

San Mateo: Additional support for the South San Mateo office was given today when Sen. Wm. F. Knowland pledged his support of the project.

oOo

Sacramento: Lt. General R. A. Wheeler, chief of the Army Engineers, is slated to confer with Governor Warren and make a tour of proposed engineer projects in the Sacramento and San Joaquin valleys during the first of April.

oOo

Long Beach: Under the $1,250,000 expansion program of the Hilton Hotels, visitors to the Long Beach airport will soon be whisked to Hotel Hilton in an "air taxi", Charles W. Gaskins, manging director of the chain announced.

Steel Exports Restricted by OIT

In response to a request from the Civilian Production Administration, the Office of International Trade, Department of Commerce, has placed restrictions on the export of several steel products essential to the housing program.

The list includes structural iron and steel buildings, pre-fabricated and portable houses, metal window frames and window sash, metal shutters, sheet culverts, pre-fabricated doors, copper wire, roof ventilators, sheet metal ducts and certain zinc products. Quantities of any of these items valued in excess of $100 may not be exported without an individual export license from OIT. It is expected that if other commodities needed for housing become in short supply, they will be added to the restricted list from time to time.

Review Seminar and Educational Classes Planned by S. F. Architectural Club

The San Francisco Architectural club is preparing to re-open its regular pre-war classes and atelier.

In addition, an architectural seminar is offered to assist those persons interested in review because of having been engaged in other work during the war, or because they plan to take the state architectural examination this Summer.

The seminar will consist of 15 lectures to be given two nights weekly starting about the second week in April. Lasting for two full hours, they will be presented by architects and engineers fully qualified on selected subjects.

Cost of seminar is free to members, and $15.00 to non-members. Membership in the club means annual dues of only $10, so some may wish to join at this time in order to take advantage of the course.

The educational course to be offered covers a variety of 24 subjects ranging from drafting procedure to public speaking and business English.

The tentative courses of instruction also include architectural design, history, theory, detailing and structural engineering for architects. Building codes, materials, acoustics and sound control, estimating, specification writing and legal aspects, mechanical and electrical engineering, rendering, color, perspectives, landscaping, outdoor sketching, freehand drawing, furniture design and office procedure.

Persons interested in attending either of the classes or the seminar, should write to the San Francisco Architectural club, 666 Mission street, before Apr. 3, stating their business address, telephone, firm name, and whether or not they are veterans of World War II.

Starting dates, instructors and costs of the educational course will be announced at a later date. There will be no charge for attendance at the first meeting of the seminar.

Million Dollar Blaze Levels 2 Warehouses

Fire early yesterday caused damage estimated at over a million dollars to two block - long warehouses containing trucks, tires and equipment at the Marine Corps Belair Sub Depot in South San Francisco.

Bulldozers, jeeps, trucks, motors, transmissions and other automotive equipment was left in embers as the two frame buildings rapidly went up in the heated blaze.

Fire departments from San Bruno, San Mateo, Burlingame and South San Francisco were aided by Marine firefighters.

DEPT. OF COMMERCE BULLETINS AVAILABLE

A new list of booklets of interest to our readers, copies of which may be obtained from the Department of Commerce, Industry Division, has been published. Kindly nention the Facts for Industry publication of the department when writing.

The booklets are:

Paint, Varnish, Lacquer, and Filler. (Series M19J-125). Dec., 1945, and Annual Summary; 2 pg.

Plastic Water Paints, Cold Water Paints, and Calcimines. (Series M-9W-125.) Dec., 1945, and Annual Summary; 2 pages.

Aluminum Wrought and Cast Products. (Series M24B-105.) Oct:, 1945; 2 pages. Monthly.

Floor and Wall Tile, Drain Tile, and Other Structural Clay Products. (Series M26A-04.) 1944; 3 pg.

Electric Lamps. (Series M32B-95.) January-September 1945; 2 pages.

Glass Containers. (Series M77C-125.) 19'5; 3 pages. Annual.

Glass Manufacture. (Series 9-6-1.) 1941 and first half of 1942; 4 pages.

Cork. (Series 11-3-1.) Stocks and Consumption 1942-1944; 4 pg.

Water Heaters, Range Boilers, and Hot Water Storage Tanks. (Series 14-14-1.) June 1944-August 1945; 21 pages.

Consumption of Paper in Commercial Printing, as Defined in War Production Board Limitation Order, L-241, in the United States During 1941. (Series 23-4-1.); 5 pages.

Webbing, Tapes and Braids. (Series 32-11-1.) Quarterly Production, Jan.-Sept., 1945; 5 pages.

Locomotives. (Series 35-2-1.) Deliveries, by Type, 1942-Aug., 1945; 2 pages.

Patent Documents Should Be Written Simply, Concisely

Patent documents should be simplified, more concise, written in easily understandable language and stripped of much of the legal and technical verbiage that now makes many of them all but unintelligible even to the trained examiners who have to read them, according to Patent Commissioner Casper W. Ooms, of the Department of Commerce.

All that the law requires, Ooms said, is that a patent application shall carry a written description of the invention and the manner of its use "in such full, clear, concise and exact terms as to enable any person skilled in the art" to use it, and that the inventor "shall particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery."

Instead of conforming to this simple requirement, many patent applications are drawn up under titles so general as to be almost meaningless and giving no clue to the nature of the invention patented. Moreover, the language of the application is often so evasive that the essential part is obscured, Ooms said.

One difficulty is that most inventors and their attorneys generally make the basic claim of the invention as broad as possible and list each contemplated permutation of the form of the invention on the theory that it is necessary in order to cover every possible form of infringement.

In some courts this may have been true, Ooms said, but recent court decisions hold that a patent, state din a broad definition, is amply protected by what is known as the "doctrine of equivalents." If this doctrine is generally followed in the courts, patent attorneys may in time become reconciled to a simple, broad statement of the patent claim, Ooms said.

SURPLUS TENT SALE

Approximately 152,000 mountain tents declared surplus by the Army are now on sale to priority claimants—Federal, State and local governments, and veterans—as well as wholesalers and retailers, the War Assets Corporation, 30 Van Ness Ave., announced today.

GROOVER AND I

THE ARCHITECT

Before the ink was dry on yesterday's column regarding architectural house designs for 25-foot lots, there were two responses:

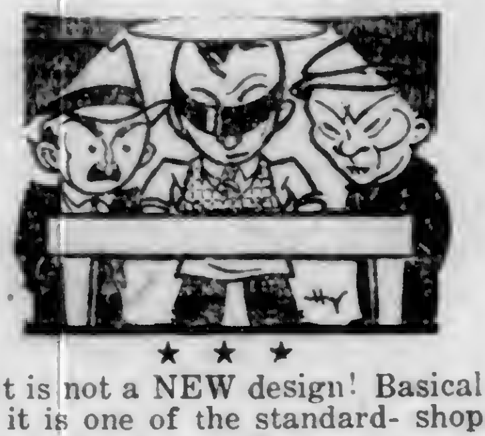
★ ★ ★

One reader accuses me of advoating our 25-foot lots. I'm not ADVOCATING them—I said we were STUCK with them!

★ ★ ★

Another reader mentioned that I should see the new, modern house at such-and-such address. I know that house. It is newly built. It is very attractive and has many unique innovations, but:

★ ★ ★



★ ★ ★

It is not a NEW design! Basically, it is one of the standard- shopworn bleprints with a few new angles and venetian blinds.

★ ★ ★

I have a profound admiration and respect for the serious practicioners of the Architectural Profession. The Architect, far more than we realize, influences our lives and destiny. From the maternity ward to the mortuary and mausoleum, he designs and shapes the Walls of our Environment.

★ ★ ★

Let the Architect direct his serious thought, his imagination and ingenuity to our panatella-shaped lots—and there may be developed a new Design for Living.

CONVERT TROOPSHIPS

Contracts for the reconversion of the troop ships "General M. C. Meigs" and "General W. H. Gordon" have been awarded to the Moore Dry Dock Company of Oakland, according to announcement today by the U. S. Maritime Commission.

Plant Construction and Equipment to Hit Over Two Billion Mark in First Quarter

American business, exclusive of agriculture, contemplates spending about $2.1 billion for new plant and equipment during the first quarter of 1946, according to the quarterly survey made public jointly by the Department of Commerce and the Securities and Exchange Commission.

This may be compared with $1.9 billion for the last quarter of 1945 and $1.5 billion during the third quarter. Since the beginning of 1945 there has been a steady increase in the amount of such expenditures with estimated outlays in the first quarter of 1946 twice those in the first quarter of 1945.

Basic data for this release were derived from reports submitted by most corporations registered with the Commission and from a large sample of unregistered companies, unincorporated as well as incorporated. These data, collected during the fourth quarter of 1945, include actual plant and equipment expenditures for the third quarter and anticipated plant and equipment expenditures for the last quarter of 1945 and the first quarter of 1946.

All figures presented in this release are estimates for the whole of American industry based on the sample data.

The survey indicates that anticipated expenditures on new plant and equipment in the first quarter of 1946 and the last quarter of 1945, estimated at $2.1 billion and $1.9 billion, respectively, will be considerably higher than the actual quarterly expenditures in the first part of 1945.

This increase reflects the accumulation of civilian demands for new plant and equipment and the lifting of controls and gradual easing of materials resulting from the end of the war.

If the anticipated expenditures actually eventuate, expenditures on new plant and equipment in the first quarter of this year would be at approximately the same annual rate as in the peak year 1941 though less when an adjustment is made for differences in the price level.

It is possible from the survey to compare actual expenditures on new plant and equipment with those that had been previously anticipated by the companies. During the third quarter of 1945 industry generally made smaller capital outlays than had been planned. In that quarter, actual expenditures on new plant and equipment averaged 90 per cent of the amount anticipated. Apparently capital goods were still not available to the extent that had been expected. Preliminary reports indicate, however, that actual expenditures during the fourth quarter were generally closer to anticipations.

ARCHITECTS' LUNCHEON

Northern California Chapter of American Institute of Architects meet Mar. 29 at noon, in the new California room at Palace hotel.

Members should make known their reservations by calling Theodore C. Bernardi, Chairman Special committee, EXbrook 8918.

The unit prices will be published shortly.

34—DAMS, RESERVOIRS & DREDGING

3/28/46 ** 34
BIDS WANTED
COLORADO-BIG THOMPSON PROJECT.—Until April 26, bids will be received by the Bureau of Reclamation, Denver, Colo., for the construction of the Granby Dam, Colorado-Big Thompson Project. The dam is to be constructed five miles northeast of Granby on the Colorado River and will have a storage capacity of 482,000 acre feet. The principal features involved are an earth dam across the Colorado River, an outlet works through the left abutment of the dam, an open channel spillway and an earth-fill dike. The dam will have a maximum height of about 230 ft. above the river bed, a crest length of about 880 ft. and will contain approximately 3,500,000 cu. yds. of earth and rock. A concrete-lined open channel spillway will be constructed in rock at the left abutment of the dam, with a concrete gate structure at the crest of the dam. The invitation includes construction of dike 3 and the placing of riprap on the upstream slopes of the embankments of dikes 1, 2 and 4, on which work was stopped by the War Production Board in October, 1942.

3/28/46 ** 34
BIDS WANTED
SAN DIEGO, Calif.—Until April 9, 10 A. M., bids will be received by the City Council, Civic Center, San Diego, for dredging approximately 500,000 cu. yds. of material from the floor of Mission Bay at the foot of Ventura Place, San Diego; Document No. 360220. Specifications are obtainable from the office of the city planning director, Room 903 Civic Center, San Diego. upon deposit of $10

34—DAMS, RESERVOIRS & DREDGING

3/28/46 34

CENTRAL VALLEY PROJECT, California.—Until April 10, 10 A. M. (postponed from March 29), bids will be received by the U. S. Bureau of Reclamation, Walker R. Young, chief engineer, Friant, under Spec. 1204, for the construction of earthwork, concrete lining, and structures, for Friant-Kern Canal, Sta. 1647 plus 75 to Sta. 3876 plus 00, Friant Division, Central Valley Project. The work extends from 18 miles east of Fresno to 10 miles east of Visalia.

Revised quantities are:

SCHEDULE No. 1

Stations 1647 plus 75 to 1932 plus 75

(1) 1,045,000 c.y. common excav. for canal;
(2) 212,500 c.y. rock do;
(3) 100,000 sta. c.y. overhaul;
(4) 67,300 c.y. compacting embankment;
(5) 5,600 c.y. common excavation for drainage channels and dikes;
(6) 500 c.y. rock do;
(7) 16,500 c.y. common excavation for structures;
(8) 200 c.y. rock do;
(9) preparing 67,000 s.y. rock foundations for concrete lining;
(10) trimming 227,000 s.y. of earth foundations for concrete lining;
(11) 100 c.y. rockfill;
(12) constructing 80 c.y. of reverse filters;
(13) 1,550 s.y. dry-rock paving;
(14) 11,700 c.y. backfill about struc.;
(15) 4,700 c.y. compacting backfill;
(16) 1,460 c.y. concrete in structures;
(17) 500 c.y. concrete in bridges;
(18) 14,150 c.y. concrete in reinf. canal lining;
(19) 14,150 c.y. concrete in unreinf. canal lining;
(20) placing 336,000 lbs. reinf. bars in struc. and bridges;
(21) placing 750,000 lbs. reinf. bars in canal lining;
(22) placing 620 s.f. elastic filler material in joints;
(23 placing 140 l.f. of rubber water stops in joints;
(24) placing 3,000 lbs. of metal water stops in joints;
(25) erecting 196.3 M ft. b.m. timber in structures;
(26) constructing 20 cattle guards;
(27) constructing 1.5 miles barbed-wire fence;
(28) constructing 10 miles of comb. barbed- and woven-wire fence;
(29) constructing 43,000 l.f. of underdrains with uncemented joints;
(30) constructing 29,000 l.f. of feeder drains;
(31) installing 410 l.f. pipe in reverse filters;
(32) installing 29,600 lbs. of misc. metal work.

SCHEDULE No. 2

Stations 1932 plus 75 to 2631 plus 00

(1) 3,002,000 c.y. common excav. for canal;
(2) 8,000 c.y. rock do;
(3) 153,000 sta. c.y. overhaul;
(4) 40,450 c.y. compacting embankment;
(5) 302,000 c.y. common excav. for drainage channels and dikes;
(6) 2,000 c.y. rock do;
(7) 120,000 c.y. common excavation for structures;
(8) 100 c.y. rock do;
(9) 134,000 c.y. uncompacted earth canal lining;
(10) 336,000 c.y. compacted do;
(11) 5,200 c.y. rockfill;
(12) 7,100 s.y. dry-rock paving;
(13) 92,000 c.y. backfill about struc;
(14) 47,000 c.y. compacting backfill;
(15) 11,700 c.y. concrete in struc.;
(16) 5,200 c.y. concrete in bridges;
(17) placing 2,825,000 lbs. reinf. bars in structures and bridges;
(18) placing 450 s.f. elastic filler material in joints;
(19) placing 25,400 lbs. of metal water stops in joints;
(20) erecting 217.6 M ft. bm timber in structures;
(21) constructing 40 cattle guards;
(22) constructing 12 miles of barbed-wire fence;
(23) constructing 12 miles of comb. barbed- and woven-wire fence;
(24) laying 440 l.f. 18-inch diameter corrugated metal pipe;
(25) laying 165 l.f. 24-inch do;
(26) laying 115 l.f. 30-inch do;
(27) laying 150 l.f. 36-inch do;
(28) laying 290 l.f. 48-inch do;
(29) installing 50,000 lbs. of misc. metal work.

SCHEDULE No. 3

Stations 2631 plus 00 to 3369 plus 00

(1) 2,660,000 c.y. common excavation for canal;
(2) 181,000 rock do;
(3) 106,000 sta. c.y. overhaul;
(4) 229,500 c.y. compacting embankment;
(5) 203,000 c.y. common excav. for drainage channels and dikes;
(6) 2,000 c.y. rock do ;
(7) 40,000 c.y. common excavation for structures;
(8) 2,000 c.y. rock do;
(9) preparing 61,300 s.y. rock foundations for concrete lining;
(10) trimming 177,000 s.y. of earth foundations for concrete lining;
(11) 120,000 c.y. uncompacted earth canal lining;
(12) 302,000 c.y. compacted do;
(13) 100 c.y. rockfill;
(14) 5,400 s.y. dry-rock paving;
(15) 25,000 c.y. backfill about struc.;
(16) 14,000 c.y. compacting backfill;
(17) 3,480 c.y. concrete in struc.;
(18) 4,100 c.y. concrete in bridges;
(19) 11,500 c.y. concrete in reinforced canal lining; canal lining;
(20) 11,500 c.y. concrete in unreinf.
(21) placing 1,158,000 lbs. reinf bars in structures and bridges;
(22) placing 610,000 lbs. of reinf. bars in canal lining;
(23) placing 400 s.f. elastic filler material in joints;
(24) placing 4,400 lbs. metal water stops in joints;
(25) erecting 424.0 M ft. bm timber in structures;
(26) constructing 48 cattle guards;
(27) constructing 12.5 miles barbed-wire fence;
(28) constructing 12.5 miles of comb. barbed- and woven-wire fence;
(29) constructing 21,000 l.f. underdrains with uncemented joints;
(30) constructing 14,000 l.f. feeder drains;
(31) laying 175 l.f. 18-in. diam. corru. metal pipe;
(32) laying 315 l.f. 24-inch do;
(33) laying 560 l.f. 30-inch do;
(34) laying 170 l.f. 48-inch do;
(35) laying 75 l.f. 54-inch do;
(36) installing 76,000 lbs. of misc. metal work.

SCHEDULE No. 4

Stations 3369 plus 00 to 3876 plus 00

(1) 1,337,000 c.y. common excav. for canal;
(2) 146,000 rock do;
(3) 154,000 sta. c.y. overhaul;
(4) 251,000 c.y. compacting embankment;
(5) 11,000 c.y. common excav. for drainage channels and dikes;
(6) 1,000 c.y. rock do;
(7) 100,000 c.y. common excavation for structures;
(8) 1,000 c.y. rock do;
(9) preparing 29,000 s.y. rock foundations for concrete lining;
(10) trimming 473,000 s.y. earth foundations for concrete lining;
(11) 2,700 c.y. rockfill;
(12) constructing 240 c.y. of reverse filters;
(13) 1,700 s.y. dry-rock paving;
(14) 20,000 c.y. backfill about struc.;
(15) 20,000 c.y. compacting backfill;
(16) 8,100 c.y. concrete in struc.;
(17) 1,700 c.y. concrete in bridges;
(18) 24,000 c.y. concrete in reinforced canal lining;
(19) 24,000 c.y. concrete in unreinf. canal lining;
(20) placing 1,735,000 lbs. reinf. bars in struc. and bridges;
(21) placing 1,272,000 lbs. reinf. bars in canal lining;
(22) placing 1,180 s.f. elastic filler material in joints;
(23) placing 180 l.f. of rubber water stops in joints;
(24) placing 24,400 lbs. metal water stops in joints;
(25) erecting 195.4 M ft. bm. timber in structures;
(26) constructing 26 cattle guards;
(27) constructing 1,900 l.f. of guard rails at bridge approaches;
(28) constructing 8.2 miles barbed-wire fence;
(29) constructing 8.2 miles combina. barbed- and woven-wire fence;
(30) constructing 72,000 l.f. underdrains with uncemented joints;
(31) constructing 48,000 l.f. of feeder drains;
(32) installing 1,230 l.f. pipe in reverse filters;
(33) laying 160 l.f. 18-in. diam. corru. metal pipe;
(34) laying 325 l.f. 24-inch do;
(35) installing 76,300 lbs. of miscel. metal work.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Chief Engineer, U. S. Customhouse, Denver 2, Colo.; R. L. Boke, Regional Director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; R. K. Durant, Acting Construction Engineer, Friant Calif., and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Acting Construction Engineer.

No charge to prospective bidders for copies of the specifications and and drawings; to others, $2.50 per copy, not returnable.

OFFICIAL PROPOSAL

Restoration of Sites, Areas A and B

Sealed bids will be received by the Chicago Bridge and Iron Company, Post Office Box 1022, Eureka, California, until 11 A. M. Pacific Standard Time, Tuesday, April 9, 1946, at which time they will be opened and read in the presence of a representative of the U. S. Navy, Bureau of Yards and Docks, for the following contracts:

Restoration of Site—Area A.
Restoration of Site—Area B.

"Restoration of Site, Area A," is for the removal of and disposition of various waterfront and shipbuilding facilities including timber sheet-pile cofferdams, mooring dolphins, an outfitting dock, and various shipways and miscellaneous structures. Award will be made by lump sum contract.

"Restoration of Site, Area B," is for the removal of and disposition of various site facilities including twenty or more frame buildings, timber prefabrication slabs, fences and miscellaneous structures. Award will be made by lump sum contract.

Maps, specifications, proposal forms and proposed contract forms may be obtained at the Eureka office of the Chicago Bridge and Iron Company, foot of Washington Street, Eureka, California.

PLANS and Speculations

San Francisco: Mayor Lapham and the finance committee of the board of supervisors have authorized appropriation of $20,000 for a survey to determine the need of a new municipal building in the Civic Center.

oOo

Napa: The county board of supervisors has authorized application to the War Department for permission to construct a low level fixed span bridge across the Napa river south of Napa, to carry a proposed highway between the Napa-Vallejo highway and the Sonoma road.

oOo

Hanford: The city council has received a request for $75,000 to be used to construct a recreation building as a living memorial to the war dead. Bethel Mellor, president of the Hanford Youth Council, and Mrs. Homer Tibbs, asked the council to take under advisement the survey, conducted by their groups, which indicated the urgent need of recreational facilities here.

oOo

Sacramento: The city council has directed City Engineer F. J. Klaus to determine the cost of a sewage disposal plant sufficient to serve, not only this city, but the entire surrounding area. Klaus was ordered to take into consideration probable expansion of the area within the next 20 years. The city has $945,000 due it from the "Christmas Tree" fund, which must be matched by local funds.

Kneiss Appointed Local CPA Manager

Gilbert Kneiss is San Francisco manager designated to carry out the recently announced building restrictions, E. F. Halloran, regional director of the Civilian Production Administration, has announced.

Kneiss served as priorities manager for Halloran under the War Production Board in this region, and is well known for his work as engineer and technical director of the Golden Gate Exposition.

Halloran announced that the new organization will not be ready to issue permits for about a week. A seven-man committee, composed of representatives of labor and various industries, will advise him.

He expressed the hope that "all these building restrictions will be wound up and discarded by the end of the year."

"I do not think that heavy industry here will be crippled," he declared. "Apartment houses, hotels, and the San Francisco airport undoubtedly will be considered essential by me. However, these people will not be given priorities on materials that could go into veterans' homes," he added.

Curb on Construction and Repairs Finds Shortage of Public Works Projects Planning

Special from the Daily Pacific
Builder's WASHINGTON BUREAU

Survey by the Federal Works Agency revealed that a surprisingly large percentage of State and local governments were found "short" on public works planning at this time.

This is especially interesting to contractors in view of the recent edict curbing industrial, commercial and home building but permitting most public works programs to continue.

"The field staff of the Federal Work Agency's Bureau of Community Facilities contacted 33,990 Governmental units, including all of the State Governments and virtually all of the counties and larger cities," the agency said.

"More than 20,000 reports were received from 8,272 governmental units.

"Of the units reporting, 4,883 indicated that they had no projects in either the completed or design stage of plan preparations.

"Of 2,911 counties surveyed, 1,292 reported no plans. The same was true of 55 per cent of the cities and towns of 50,000 or less population. Twelve cities of more than 100,000 population and 20 cities between 50,000 and 100,000 population reported having no plans in either the completed or the design stage."

PLANS FOR NEW YORK

About half of the $951,144,000 worth of public works for which plans have been completed without Federal planning aid is in New

SEEK 100,000 HOMES

A bill is now pending in Congress for an additional $253,000,000 to convert a second 100,000 war structures in this country into temporary housing for veterans. As of mid-March, Federal Public Housing Authority reports 92,377 units of temporary housing have been converted under the program, and turned over to colleges, schools and municipalities for use in housing veterans and their families.

SELL HAMMERS, SLEDGES

War Assets Administration is disposing of 456,548 hammers and sledges valued at $420,000, also 350,000 new electric lamp bulbs and 524,320 new neon and argon glow lamps in sales now going on. The sales close April 8. For details, contact your local War Assets Administration office.

GROOVER AND I

A CRAZY WOMAN . . . . AND FIVE CENTS

This story is about a woman who measures 78 years x 104 pounds.

She is as bright as a spring morning and "chirpy" as a canary. She has no known relatives. Her only name is "Tiny"—except on the records of the State Mental Institution where she has been an inmate for many years.

★ ★ ★

Tiny has a nickel. She has had a nickel longer than any of the attendants can remember. She has no idle time—all of her spare time is employed in tatting.

★ ★ ★

She once had a tatting shuttle, but that was lost years ago. She now cuts a shuttle out of cardboard. These cardboard shuttles wear out quickly, but she cheerfully cuts another.

★ ★ ★

She goes to the commissary of the institution and with her 5c buys a spool of thread. After making a piece of tatting she sells it to the commissary for 5c—and then with her nickel in her hand she selects another spool of thread.

★ ★ ★

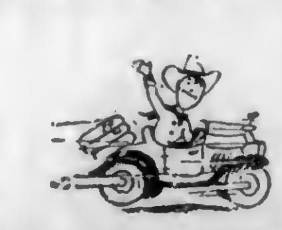
She may spend a half-hour carefully studying a dozen spools of thread—a dozen spools which to " J & P Coats" would appear to be identical. After she selects a spool satisfactory to her, she pays her nickel—and the cycle starts all over again.

★ ★ ★

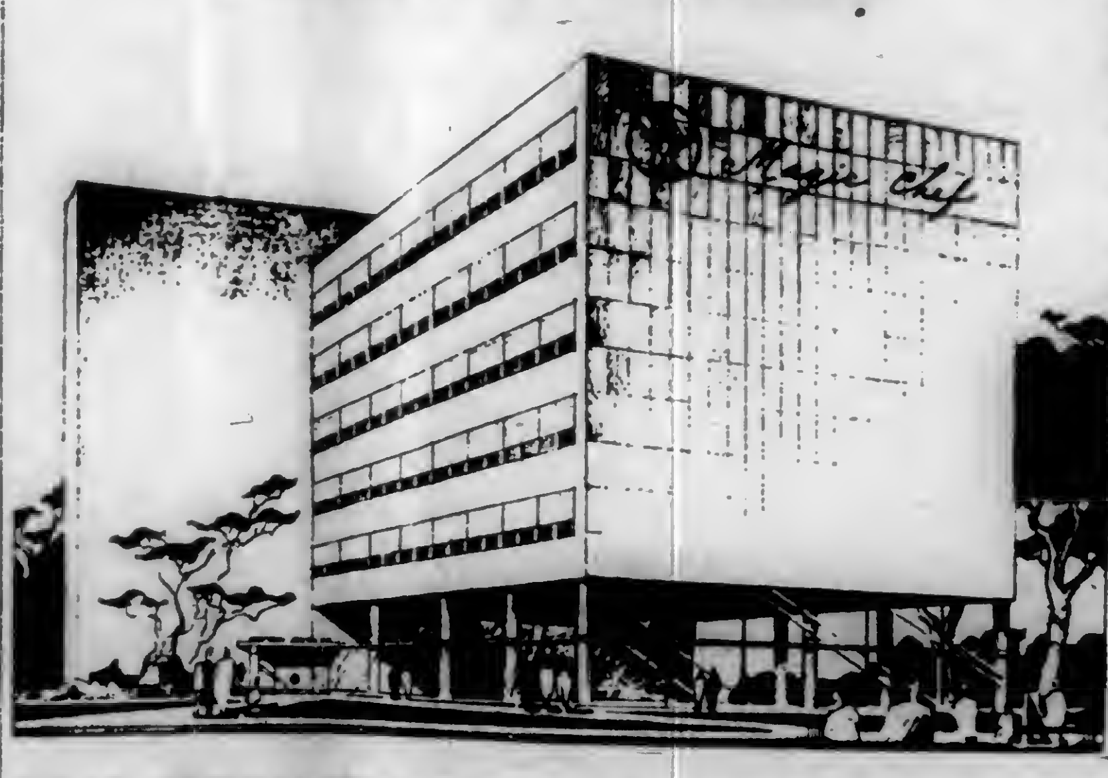
On one occasion the commissary attendant sympathetically insisted she take 10c for the tatting. Tiny was distressed for several days. The commissary had no thread selling at 10c per spool! She finally solved this problem by spending the extra 5c for a bottle of Coca Cola—and again with her spool of thread went happily on her way.

★ ★ ★

Who can say that Tiny isn't happy in her complete economic world with its capital of 5c? The doctors and the State say she is crazy!



Unique Office Construction



SOLAR ORIENTATION will make this proposed six-story office building free of direct light glare. Entire ground floor will be showroom and entrance lobby

'Magic Chef' Administration Building Outstanding Example of Contemporary Art

The American Stove company, manufacturer of Magic Chef gas ranges, has incorporated many of the newest ideas of structural and aesthetic design in its projected administration building to be constructed in St. Louis, Mo.

This six-story building, an outstanding example of contemporary design for large office-type structures, will centralize the principal offices and executive activities of the company at their new location in St. Louis.

Materials used in construction will include reinforced concrete, Indiana limestone facing and brick which is to be used towards the rear of the building. Functional landsacping is planned for all approaches to the building.

Solar orientation has been taken into account and the building will be so constructed that the entire north wall will be free from direct sun rays from 9 a. m. to 5 p. m. during midsummer days. Expansive areas of unshaded glass will be used in the north wall as a result of this placement, providing a high degree of natural diffused daylighting. Permanently sealed, double-insulating plate glass will be used in extensive windows. Permanent window washing equipment consisting of a car suspended from the roof by cables will be arranged in the original design.

Heating and air conditioning equipment will be in stacked arrangement at one end of the building with individually controlled units for each floor. Stacking the units will leave the major expanse of floor space open within the building's shell. Interior partitions will be built of prefabricated, interchangeable steel panels, each four by ten feet, which may be slipped into place with only the use of a screwdriver. Office space may thus be changed easily and quickly as new requirements dictate.

All lights will be recessed to ceiling surface. Lighting units and ceiling panels will be of modular design and interchangeable at will to conform with the rearranging of office partitions. Radiant heating will be delivered into the rooms through acoustical tile which will perform the double service of absorbing noise and radiating heat. Coils of the heating system will be in the utility stacks at the end of each floor and replacement air will be brought in by electronic filters.

#

DISPOSE OF POSTS

War tested and now war surplus, approximately 6,797,452 steel barbed wire fence and anchor posts valued at $1,811,580, are being placed on sale in a nation-wide disposal program beginning Mar. 29, the War Assets Corp., 30 Van Ness Avenue, announced today.

The posts were designed to special Army specifications with speed of installation and resistance to rough usage, a principal consideration. They are regarded as a great improvement over the old types of fences and, it is believed, will find a ready market for use on farms, orchards and ranches and by telephone, telegraph and power companies.

Material Shortages to Hamper Government's Accelerated Veterans' Building Program

Special from the Daily Pacific
Builder's WASHINGTON BUREAU

Material shortages today threatened to slow down the spurred activity of the government to channel all building materials into home construction for veterans as it appeared that many essentials for home building were not readily available in sufficient quantities to meet the "speed up" order in the new construction program.

Demand for lumber, brick, tile, building blocks, gypsum board and lath, sewer pipe, cast iron radiation, plumbing small ware and other items is running far in excess of available supply.

On top of commercial, highway and public construction deferred during the war, there is the pressing immediate need for homes—and homes fast—to meet Housing Stabilizer Wilson Wyatt's goal of 2,700,000 new housing units by the end of 1947 under the veterans' preference housing program.

Resilience of building materials manufacturers in stepping up production in the face of labor and supply obstacles will determine how fast the materials situation improves, Washington quarters said.

SUPPLY OUTLOOK

As the opening of the second 1946 quarter neared, the over-all outlook still was not good.

The Civilian Production Administration estimated that requirements for lumber in 1946 will be around 36,000,000,000 board feet while the largest production they see fo rthe year is around 32,000,000,000 board feet.

Estimated 1946 requirements and the production outlook for other building materials are as follows:

Softwood Plywood (to be used extensively in prefabricated housin) — Requirements for 1946 are placed at 2,100,000,000 square feet, compared with 1,680,000,000 square feet in 1941. The industry's present production capacity is not large enough to meet requirements, so new plants must be built, logs procured, and new labor found.

Common and Face Brick—Estimated 1946 requirements, 5,000,000,000 bricks; 1941 production, 4,944,000,000 bricks. Production last year was slightly under 3000,000,000 bricks. Output improved this month, is reported coming along nicely.

Structural Clay Tile—Estimated 1946 requirements, 1,320,000 short tons; 1941 production, 1,125,000 short tons. Output currently is improving, is better than a few weeks ago. Industry along with brick makers, has received priorities assistance fro mthe Civilian Production Administration in obtaining needed equipment, such as industrial lift trucks, general purpose trucks, etc.

Building Blocks—Estimated 1946 requirements, 800,000,000 blocks; 1941 production figures are not

$2,290,000 Project Awarded To Barnes

Award of the $2,290,000 project of constructing superstructure to the shipfitters' and boilermakers' shop, Naval Shipyard, Hunters Point, was made yesterday to the James I. Barnes Constr. Co., 941 Russ building. Miscellaneous small structures were included in the contract.

The contract includes work which has been sub-contracted to 25 firms within the Bay Area. Sub-contracts as announced yesterday at time of bid award, were given for the work as described below. Additional subcontracts will be awarded later, a company official said today:

Asphalt tile and carpet coat, Malott & Peterson; pressed steel doors. L. B. Sanden; steel sash, J. S. Thorn Co.; corrugated asbestos, Western Asbestos Co.; steel roof deck, H. M. Robertson; electric work, Abbett Electric Co; elevator, Atlas Elevator Co; glass and glazing, San Francisco Glass Co.; fencing, Anchor Post Fence Co.; wood block floors, Turner Resilient Floors, Inc.;

Plumbing, heating and utilities, Anderson & Rowe, structural steel. Moore Dry Dock Co.; painting, R. P. Paoli & Co.; composition roof and roof insulation, Malott and Peterson; sheet metal, Guilfoy Cornice Works; marble, Vermont Marble Co.; tile floors, Thos. H. Price Co.; steel doors, Truscon Steel Co.; steel rolling doors, Kinnear Mfg. Co.; reinforcing steel, Herrick Iron Works; misc. and ornamental steel, Central Iron Works; masonry, Geo. W. Reed; lathing and plastering, A. E. Knowles; composite piles, Raymond Concrete Pile Co.; and Kalamein doors, Fire Protection Products Company.

Addresses of these firms are listed in the report section.

OFFICIAL PROPOSALS

FIRST PUBLISHED TODAY

Highway Improvements—Mendocino County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **April 24, 1946,** at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Mendocino County, at Slick Rock Creek, about five and six-tenths miles south of Point Arena (I-Men-56-A), about one (1) mile in length to be graded and imported base material placed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Carpenter	1.125
Cement finisher	1.75
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity)	1.70
Concrete vibrator operator	1.25
Flagman	1.00
Jackhammer operator	1.25
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Painter (brush)	1.25
Painter (spray)	1.50
Reinforcing steel worker	1.50
Roller operator	1.65
Structural steel worker	1.75
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Pile driver man	1.86
Intermediate Grade Labor	
Concrete vibrator operator	1.25
Jackhammer operator	1.25
Oiler, power shovels or cranes	1.25
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Unskilled Labor	
Flagman	1.00
Laborer	1.00

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.25 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.00 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.00 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal stautes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 703 B Street, Marysville, California, until 2 P.M. o'clock on **April 4, 1946,** at which time and place they will be publicly opened and read, for performing work as follows:

Yolo County, at the State Highway Nursery, about three miles east of Davis (III-Yol-6-A), water well to be drilled and cased.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

The rates of wages, including overtime, holiday or Sunday rates, herein specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Laborer	$1.0625
Well driller	1.70
Any classification omitted herein not less than	1.0625

Overtime—one and one-half (1½) times the above rates. Sundays and holidays (except watchmen, guards and flagman)—one and one-half (1½) times the above rates.

State Highway Engineer's Estimate

Item 1. 200 lineal feet drilling and casing well.

Item 2. 30 hours pumping well.

Highway Improvements—Humboldt County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **April 10, 1946,** at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Humboldt County, between Loleta and Fields Landing (I-Hum-1-G), about four (4.0) miles in length, base to be reinforced and surfaced with plant-mixed surfacing.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Flagman	1.00
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel • type controls (over one cubic yard)	2.00
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **April 10, 1946,** at which time they will be publicly opened and read, in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Contra Costa County portions between Pittsburg and 4 miles east of Brentwood (IV-C.C-75-C,D), about ten and one-tenth (10.1) miles in length, shoulders to be widened with imported borrow and surfaced with plant-mixed surfacing and penetration treatment and a bridge to be widened.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Carpenter	1.50
Cement finisher	1.75
Concrete mixer operator (one cubic yard capacity or less)	1.45
Concrete mixer operator (over one cubic yard capacity and paving type)	1.70
Concrete vibrator operator	1.25
Flagman	1.0625
Jackhammer operator	1.25
Laborer	1.0625
Motor grader operator	1.85
Oiler, power shovels or cranes	1.40
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.00
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.50
Roller operator	1.65
Tractor driver	1.70
Truck driver (8 cubic yards water level capacity or more)	1.725
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.2625
Truck driver (less than 4 cubic yards water level capacity)	1.15
Any classification omitted herein not less than	1.0625

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **April 10, 1946,** at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Siskiyou County, between Shasta River and Gazelle (II-Sis-3-B), about seven and eight-tenths (7.8) miles in length to be surfaced with plant-mixed surfacing.

Bids are required for the entire work described herein.

STATE HIGHWAY ENGINEER'S ESTIMATE

The State will furnish 550 tons of mineral aggregate and 38 tons of paving asphalt for use in plant-mixed surfacing as more explicitly set forth in the special provisions.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.40
Asphalt plant mixer operator	1.45
Asphalt spreading machine operator	1.75
Flagman	1.00
Laborer	1.00
Motor grader operator	1.85
Oil distributor bootman	1.125
Oiler, power shovels or cranes	1.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	1.85
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.00
Roller operator	1.65
Tractor driver	1.70
Truck driver (18 cubic yards water level capacity or more)	1.5625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.4375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.375
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.1875
Truck driver (less than 4 cubic yards water level capacity)	1.0625
Any classification omitted herein not less than	1.00

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays (except watchmen, guards and flagmen)—one and one-half (1½) times the above rates.

The rates of wages, including overtime, holiday or Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. MANUFACTURERS' LITERATURE

AIR CONDITIONING

Electronic Air Disinfection. A full description and specifications of the "Disinfectaire", an ultraviolet germicidal unit incorporating G.E.'s Germicidal Lamp. Includes information on why air disinfection is necessary, how it works. 10 pp., illus. The Art Metal Co., Cleveland, Ohio.*

ARC WELDING

Airco Arc Welding Accessories (Catalog No. 130.) Illustrates and describes a complete line of accessories for all types of arc welding machines and operations. 12 pp., illus. Air Reduction, 60 E. 42nd St., New York 17, N. Y.

BERYLLIUM

The Atom of Beryllium. Brush beryllium copper alloys, Brush Beryllium metal and other alloys. Their characteristic sand applications. 4 pp., illus. The Brush Beryllium Co., 3714 Chester Avenue, Cleveland 14, Ohio.

ELEVATOR GATES

Collapsing Gate for Passenger Elevator Cars, Design No. 9-CG, and Collapsing Gate for Service Elevator Cars, Design No. 7-CG. A.I.A. File sheets giving specifications of the two types of collapsing elevator gate. 1 p. ea., illus. Otis Elevator Co., 260 11th Ave., New York, N. Y.*

FLANGES

Pressure - Temperature Ratings for Flanges, Flanged Fittings and Valves. An American War Standard. Tabulates the new ratings, includes chart comparisons of old and new ratings. 20 pp. Tube Turns Inc., Louisville 1, Ky.

HEATING UNITS

Gar Wood Tempered-Aire Oil-Fired Home Heating Units. Description of and advantages claimed for a complete heating unit, with table of ratings and dimensions. 8 pp., illus. Gar Wood Industries, Inc., Heating Division, 7924 Riopelle St., Detroit 11, Mich.

LIGHTING

Let There Be Light. By Robert M. Stecher, M.D. An article printed from the Bulletin of The Medical Library Assn. Discusses light and the general level of illumination, with particular attention to reading light in libraries, reading rooms and private studies. 8 pp., illus. General Electric Co., 8811 Euclid Ave., Cleveland, Ohio.*

Silv-A-King RLM Specification Industrial Fluorescent Lighting Units. Full description, including voltage, wattage, weight and price, of both closed-end and open-end units. Also gives a table indicating the average footcandles obtained at various heights and for various wall conditions with 40 and 100 watt units. 4 pp., illus. Bright Light Reflector Co., Inc., Fairfield and State, Bridgeport 5, Conn.*

PUBLIC WORKS

(Continued from Page One)

York State, and 40 per cent in New York City.

State and local Governments without Federal aid for planning, had completed plans for $961,144,000 worth of public works as the year 1946 opened, the Federal Works Agency reported today.

State and local Governments, with Federal aid for planning, were preparing plans and specifications for public works costing $564,932,000.

Applications were under review for planning advances to State and local Governments for projects costing another $1,121,165,000.

Of the total public works planned with Federal Works planning assistance, 71.3 per cent was made up of sewer, water and sanitation facilities, school and other education facilities, and hospitals.

Approximately 46.4 per cent of the public works planned without Federal planning aid was made up of sewer, water and sanitation facilities, schools and other educational facilities, and hospitals.

CONTRACTORS BID-SHY

Several factors were reported as responsible for the lag.

Contractors, some circles reported, were unwilling to make bids for new highway jobs except at very high figures because of the uncertainties with regard to available construction machinery, high prices for building materials, and the uncertainty of continued stability of wage rates in many areas.

"February, March and April usually are the months when new highway construction contracts are let," one Government official said, "but thus far this Spring the results are disappointing.

"When contractors do bid, they bid, to cover all the uncertainties the picture which may bring higher costs before the work is done."

EQUIPMENT SHORTAGE

Because of the difficulty of making sure of getting needed trucks, bulldozers, graders and other machinery quickly, and because of the high cost of materials and uncertainty as to future labor costs, some officials do not expect any broad expansion in new highway construction during the remainder of 1946.

In addition to the present uncertainties, spotty shortages of materials and manpower are expected to appear as the veteran's preference housing program expands, with its competition for both materials and labor.

The Public Roads Administration, however, has $1,500,000,000 of Federal money which will be available through June 30, 1949 to match dollar-for-dollar with the States whenever Highway Departments and the industry are ready to go forward with construction.

A total of $500,000,000 of this amount is now available for Federal aid in new road building, another $500,000,000 becomes available on June 30, 1946, and a third $500,000,000 a year later.

New Asphalt Impregnated Gypsum Sheathing Waterproof

EIGHT MAN HOURS ARE SUFFICIENT to sheathe an average size small house with the new U.S.G. Sheathing, recently developed to speed construction and save manpower. This is made possible by eliminating the need for special measuring and sawing—it can be scored and snapped right on the studs. One man handles the tongue-and-grooved sheets quickly and easily.

New Sheathing Is Gypsum Industry's Answer to Lumber Shortage Problem

Announcement of a brand new sheathing with a newly developed asphalted-gypsum, weather-proof core is the United States Gypsum company's answer to the critical lumber shortage, which is now likely to be prolonged beyond earlier estimates.

With the demand for lumber at an all-time high and with only 5,000,000,000 board feet on hand at the beginning of the year, and this supply poorly balanced and badly located, the new U.S.G. Sheathing may greatly relieve the critical situation by freeing more lumber for framing and other vital construction uses.

Perfectly timed for a huge market hungry for just such a product, this new U.S.G. Sheathing, which "weathers all weather", has been fully tested by United States Gypsum Research Laboratories. The difference is in the core. Exhaustive comparative tests prove this new product to be far superior in performance. More important is the fact that sheathing costs can be cut from one-third to one-half.

One of the most important phases in the development of this asphalted-gypsum core was United States Gypsum's experience in manufacturing war products. U.S.G. Marine Board, "the core that went to war", has been used and approved by the United States Maritime Service for Class B bulkheads, sheathing and liners. It was so successful that engineers believed the same principle of asphalted-gypsum core could be adapted to use in the manufacture of sheathing for building postwar houses.

With this in mind, engineers tested and re-tested the new sheathing under extremely adverse conditions. In spite of the tremendous quantities of water thrown against it in a test, the U.S.G. Sheathing with the asphalted - gypsum core showed a water absorption of only 3.4 per cent by weight—actually only one-twelfth of the amount of water absorbed by wood sheathing during the same exposure. In addition, there was no buckling, no warping, and no opening up in the joints of the U.S.G. Sheathing when it dried out.

Then engineers went still further to prove the strength and stability of this board. A huge lateral distortion machine exerted 1,850 pounds pressure on a U. S. G. Sheathing panel, which had been exposed to the equivalent of 5½ years of average rainfall. Only 1.125 inches of lateral deflection occurred. A dry panel with identical framing and sheathing had a lateral deflection of just .498 inch at this same load. Under these same conditions, an identical frame sheathed horizontally with 1x8-inch dry wood sheathing deflected 10.312 inches.

Comparisons of cost and speed in application show that U.S.G. Sheathing will set a new mark in economy.

EVEN WHEN DRENCHED with water, this new sheathing has high bracing strength—it's designed to free more lumber for framing and other vital construction. Secret of success is a gypsum core impregnated with an asphalt emulsion for superior resistance to weather—piled unprotected on the job or nailed to the framework

Piled on-the-job or nailed to the framework, it "weathers all weather". Even when drenched with water, this sheathing has remarkable bracing strength. One man can handle the sheets quickly and easily. Edges are tongue-and-grooved for wind-tight fit and strength. Only four nails per stud are needed under wood siding or stucco. It can be cut and fitted right to the studs. There is no need to measure and saw it as with other sheathings. All the workman does is score and snap the unit to fit right where he is working. Eight man hours were found sufficient to sheathe an average size small house. No building paper is required. In addition to the new asphalted-gypsum core, a special water-resistant 'Tripleseal" treatment is used on the face and back of each U.S.G. Sheathing unit. It has the fireproof qualities of all gypsum building products.

SUPPLY OUTLOOK

(Continued from Page One)

available, but output in 1939 was 408,000,000 blocks. C.P.A. has given the industry assistance, granting it priorities for machinery. Output is on the way up, both of cinder and cement blocks.

Gypsum Board and Lath—Estimated 1946 requirements, 3,900,000,000 square feet; 1941 production, 2,772,000,000 square feet. Production has been hampered by lack of paper for liner. Directives have been issued to paper mills to supply paper liner to gypsum board manufacturers.

Asphalt Roofing—Estimated 1946 requirements 74,400,000 squares; 1941 production 50,400,000 squares. Supply is tight. Hope is that demand will be met in part this year by larger production of other roofing materials, such as wood, metal cement - asbestos, slate and tile roofing. To help production of Western softwool shingles, prices o fall sizes and grades were increased 30 cents per square by OPA this month.

Clay Sewer Pipe — Estimated 1946 requirements, 1,400,000 short tons; 1941 production figures are not available, but last year output totaled slightly under 700,000 short tons. Strike in Ohio hit production this month.

Cast Iron Radiation—Estimated 1946 requirements, 70,000,000 sq. ft.; 1941 production 84,084,000 sq. ft. The industry is encountering difficulty in getting pig iron and scrap. There is talk here of a possible nation-wide drive to get householders to turn in old iron and steel scrap to collectors.

Warm Air Furnaces—Estimated 1946 requirements, 960,000 units; 1941 production, 567,000 units. Production this year was hit by strikes, also shortages of materials, particularly galvanized sheet steel and pig iron. Resumption of a high rate of steel mill production following settlement of the steel strike and authorization of a steel price increase averaging $5 per ton, may improve sheet steel deliveries. OPA this month increased the price of pig iron 75 cents a ton, which may encourage accelerated output of that commodity.

Bath Tubs—Estimated 1946 requirements, 1,450,000 units; 1941 production, 1,660,000 units. Need for better flow of materials, new equipment hampers this industry. Materials shortages affect producers of both cast iron and formed steel tubs.

Plumbing Smallware — Estimated 1946 average monthly requirements, 186,000 sinks, 170,000 lavatories, and 178,000 water-closets. In the first three months of 1946, production of sinks is expected to average 116,000 monthly, lavatories, 133,000, and water-closets 166,000. Shortages the industry is combatting are in pig iron, steel, borax and crating lumber. Some producers need additional equipment, and OPA is likely to give assistance in obtaining machinery items.

Because domestic growers are withholding 7,000,000 bushels of the 1945 flaxseed crop from the market and imports from South America are running below expectations, the Department of Agriculture has told CPA that the paint, varnish and lacquer industry may have to take a cut in its quota of linseed oil for the second quarter of 1946. It was indicated the quota might be reduced to 60 per cent of the 1940-41 base from the 75 per cent allowed in the first 1946 quarter.

Steel Construction Lags In February

The estimated total bookings of fabricated structural steel for bridge and building construction for the month of February, 1946, according to reports received by the American Institute of Steel Construction, amounted to 112,967 tons as compared with 211,182 tons for the month of January.

Due to the steel strike ,February shipments dropped to 45,754 tons as compared with 86,371 tons in the previous month. The tonnage available for future fabrication at February 28 was 550,860 tons.

#

SMALL BOAT SALE

Public sales will be conducted in five cities to dispose of over 500 small boats declared surplus by the Armed Services, the Materials Disposal Section of the United States Maritime Commission announced today.

The boats, ranging in price from $50 to $400, depending upon size and condition, will be sold exclusively by the Commission's field offices. Local address is 14th and Franklin Sts., Oakland 12.

#

JESSE HALL RETIRES

SAN FRANCISCO.—Supervisor Jesse R. Hall of Sonora, administrator of the commercially valuable and scenically attractive Stanislaus National Forest, will retire from the U. S. Forest Service on Mar. 31, after more than 37 years as a Federal forester, according to an announcement by S. B. Show, Cheif of the California Region.

New Chemical For Sharp Blueprints

ST. LOUIS, Mo., Mar. 27.—Bluer blueprint paper, with consequent improvement in the sharpness and definition of white lines, was promised today by Monsanto Chemical company of St. Louis, and the H. P. Andrews Paper company of New York.

The two companies announced that an improvement of far-reaching character is effected through application in the processing plant of Syton, a modified silica product, as a water solution to the base paper before coating with light-sensitive materials.

Architects and engineers will be saved many thousands of man-hours as a result of the development. Using the new-type printing paper, they will often be spared the necessity of retracing penciled drawings in ink.

This is because draftsmen, under present practice, find that penciled lines reproduce weakly and indistinctly. If printing and developing conditions are adjusted to bring out pencil lines a washed out appearance is often given to the whole print.

With the new method of treatment, it is possible to bring out pencil lines without markedly affecting the overall quality of the print.

ENGINEERING SECTION

(Continued from Page Five)

3.8 MILES GRADING, ETC., MERCED COUNTY

MERCED COUNTY, Cal.—Gunnar Corp., 5575 Valley Blvd., Los Angeles, at $415,297 submitted low bid to the State Division of Highway, G. T. McCoy, state highway engineer, Public Works Building, Sacramento, for about 3.8 miles grading and paving with portland cement concrete and constructing four bridges between Black Rascal Canal and Buhach Sta., Merced County.

The work involves:

(1) 810 cu. yds. remove concrete;
(2) 200 sta. clearing and grubbing;
(3) 15,500 cu. yds. roadway excavation;
(4) 2550 cu. yds. structural excavation;
(5) 8200 cu. yds. ditch and channel excavation;
(6) 50,000 sq. yds. compact original ground;
(7) 112,000 cu. yds. imported borrow, type A;
(8) 20,000 cu. yds. imported borrow, type B;
(9) 46,000 sq. yds. subgrade treatment;
(10) develop water supply and furnish water equipment;
(11) 7700 M gallons apply water;
(12) 200 sta. finish roadway;
(13) 8300 tons crusher run base;
(14) 68 tons liquid asphalt SC-2 prime coat and penetration treatment;
(15) 90 cu yds. sand prime coat;
(16) 50 tons asphaltic emulsion paint binder, armor coat and seal coat;
(17) 625 tons screenings armor coat and seal coat;
(18) 2400 tons minimum aggregate plant mix surfacing;
(19) 120 tons paving asphalt plant mix surfacing;
(20) 250 lin. ft. raised bars;
(21) 10,400 cu. yds. portland cement concrete pavement;
(22) 7500 each tie bolt assemblies;
(23) 1980 cu. yds. class A portland cement concrete structures;
(24) 7770 lin. ft. furnish concrete piles
(25) 210 each drive piles;
(26) 175 cu. yds. broken concrete riprap;
(27) 7 cu. yds. portland cement concrete curbs;
(28) 25 each monuments;
(29) 1530 lin. ft timber bridge railing;
(30) 225 lin. ft. timber headwall railing;
(31) 300 lin. ft. move and reconstruct existing guard railing;
(32) 20 each culvert markers and guide posts;
(33) 1.4 miles new property fence, type A;
(34) 0.1 mile new property fence, type B;
(35) 6 each drive gates;
(36) 40 lin. ft. 30-in. reinforced concrete pipe, standard strength;
(37) 108 lin. ft. 36-in. reinforced concrete pipe, standard strength;
(38) 322 lin. ft. 12-in. CMP, 16-gage;
(39) 1070 lin. ft. 18-in. CMP, 16-gage;
(40) 40 lin. ft. 24-in. CMP, 14-gage;
(41) 104 lin. ft. 24-in. CMP siphon, 14-gage;
(42) 5 each field joints for siphons;
(43) 7 each drainage gates;
(44) 448 lin. ft. salvage existing pipe culverts;
(45) 138 lin. ft relay salvage CMP culverts;
(46) 380,000 lbs. furnish bar reinforcing steel;
(47) 380,000 lbs. place bar reinforcing steel;
(48) miscellaneous items of work.

Total bids follow:

(A) Gunnar Corp., Los Angeles, $415,297.00.
(B) Marshall S. Hanrahan, Redwood City, $458,135.80.
(C) N. M. Ball and Lew Jones Constr. Co., Berkeley, $477,077.25.
(D) Fredrickson & Watson Constr. Co., Oakland, $485,368.55.
(E) Guy F. Atkinson Co., San Francisco, $498,397.20.
(F) A. Teichert & Son, Sacramento, $504,864.00.

20.4 MILES PAVING, SISKIYOU COUNTY

SISKIYOU COUNTY, Calif.—Clements & Co., and Milo A. Brown, Box 277, Hayward, at $166,885 submitted low bid to State Division of Highways, G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for about 20.4 miles in length to be surfaced with imported borrow base and plant mix surfacing, portions, between Weed and Yreka, in Siskiyou County.

Total bids follow:

The work involves:

(1) 52,200 tons import borrow base;
(2) develop water supply and furnish water equipment;
(3) 1500 M gallons apply water;
(4) 253 sta. finish roadway;
(5) 2000 tons fine screenings, seal coat;
(6) 1350 tons coarse screenings, seal coat;
(7) 290 tons paving asphalt, seal coat;
(8) 100 tons liquid asphalt, SC-2, prime coat;
(9) 880 tons paving asphalt, plant mix surfacing;
(10) 14,200 tons minimum aggregate, dense graded plant mix surfacing;
(11) 4250 tons minimum aggregate open graded plant mix surfacing;
(12) 30 tons liquid asphalt, RC-2, tack coat and choker;
(13) 350 tons minimum aggregate chocker.

Total bids follow:

(A) Clements & Co., and Milo A. Brown, Hayward, $166,885.
(B) E. B. Bishop, Orland, $174,004.50.
(C) Frederickson Bros., Emeryville, $189,463.
(D) W. C. Railing, Redwood City, $201,107.
(E) J. P. Brennan, Redding, $249,676.

Unit prices follow:

	(A)	(B)	(C)	(D)	(E)
(1)	$ .95	$ .88	$ .86	$ 1.01	$ 1.98
(2)	1000.00	400.00	500.00	1000.00	5000.00

BRIDGE, MENDOCINO COUNTY

MENDOCINO COUNTY, Calif.—Fred Fredenburg, 1717 Garibaldi Avenue, Temple City, at $40,069 submitted low bid to the State Division of Highways, G. T. McCoy, state highway engineer, Public Wks Bldg. Sacramento, for construction of a reinforced concrete slab bridge on concrete pile bents and about 0.12 mile of grading and surfacing approaches with road mix and applying seal coat thereto at Dooley Creek, one mile east of Hoplan, Mendocino County.

Work involves:

(1) remove existing bridge;
(2) clear and grubb;
(3) 900 c.y. rdwy. excav.;
(4) 250 c.y. struc. excav.;
(5) 3,250 c.y. imported borrow;
(6) 325 c.y. imported base material, type A;
(7) 675 c.y. do, type B;
nish water equipment;
(9) 100 M. gals. apply water;
(10) obliterating detour;
(11) 7 sta. finish rdwy.;
(12) 4 tons liq. asph. SC-2, prime coat
(13) 11 tons liq. asph. SC-3 or -4, road mix surf.;
(14) 140 c.y. min. agg. road mix surf.
(15) 1,600 sq. yds. mix and compact road mix surf.;
(16) 2 tons liq. asph. RORC-5, seal coat;
(17) 16 c.y. screenings, seal coat;
(18) 270 c.y. Class A portland cement concrete struc.;
(19) 248 l.f. timber bridge railing;
(20) 1,260 l.f. furnish concrete piles;
(21) 36 each drive do;
(22) 55 c.y. sacked conc. riprap;
(23) 64 l.f. 24-in. CMP culvert, 14 gage;
(24) 64 l.f. salvage and haul 24-inch CMP;
(25) 3 each guide posts;
(26) 0.15 mile new property fence;
(27) 8 each monuments;
(28) 61,000 lbs. furnish bar reinf. steel;
(29) 61,000 lbs. place do;
(30) misc. tems of work.

Total bids follow:

(A) Fred Fredenburg, Temple City, $40,069.
(B) Mercer-Fraser Co., Eureka, $40-420.00.
(C) Fred J. Maurer & Son, Eureka, $41,300.
(D) Erickson, Phillips and Weisberg, Oakland, $43,055.30.
(E) Kiss Crane Co., $47,128.50.

Unit prices follow:

	(A)	(B)	(C)	(D)	(E)
(1)	$1950.00	$1500.00	$2500.00	$1250.00	$4945.00

BIDS OPENED

LAKE COUNTY, Calif.—Fred J. Maurer & Son, 3031 E St., Eureka, at $193,725 submitted low bid to the State Division of Highways, G. T. McCoy, state highway engineer, Public Works Bldg., Sacramento, for the construction of a structural steel girder bridge and approaches across Kelsey Creek at Kelseyville, Lake County.

The work involves:

(1) 6 acres clearing and grubbing;
(2) 12,500 cu. yds. roadway excavation;
(3) 900 cu. yds. structure excavation, type A;
(4) 290 cu. yds. structure excavation, type B;
(5) 115 cu. yds. ditch and channel excavation;
(6) 90,000 sta. yds. overhaul;
(7) 12,000 sq. yds. compact original ground;
(8) 1820 cu. yds. imported base materail, type A;
(9) 2100 cu. yds. imported base material, type B;
(10) develop water supply and furnish water equipment;
(11) 465 M gallons apply water;
(12) 31 sta. finish roadway;
(13) 12 tons liquid asphalt SC-2 prime coat;
(14) 650 cu. yds. minimum aggregate road mix surfacing;
(15) 50 tons liquid asphalt MC-3, 4- or 5 road mix surfacing;
(16) 9200 sq. yds. mix and compact road mix surfacing;
(17) 12 tons liquid asphalt RORC-5 seal coat;
(18) 110 cu. yds. screenings seal coat;
(19) 260 cu. yds class A portland cement concrete footing blocks;
(20) 675 cu. yds. class A portland cement concrete structures;
(21) 782 lin. ft. concrete railing;
(22) 641,000 lbs. furnish structural steel;
(23) 641,000 lbs. erect structural steel;
(24) 2525 lin. ft. furnish steel piles;
(25) 101 each drive steel piles;
(26) 10 each steel pile splices;
(27) 96,000 lbs. furnish bar reinforcing steel;
(28) 96,000 lbs. place bar reinforcing steel;
(29) 110 cu. yds. sacked concrete riprap;
(30) 16 each monuments;
(31) 19 each guide posts; ¼
(32) 56 lin. ft. 18-in. CMP, 16-gage;
(33) 100 lin. ft. 10-in. metal irrigation pipe;
(34) 2 each concrete pipe joints;
(35) 5300 sq. yds. obliterating existing road;
(36) 75 lin. ft. metal plate guard railing;
(37) remove existing bridge;
(38) miscellaneous items of work.

Total bids follow:

(A) Fred J. Maurer & Son, Eureka, $193,725.
(B) Kiss Crane Co., San Pablo, $196,723.63.
(C) Guy F. Atkinson Co., South San Francisco, $247,553.25.

34—DAMS, RESERVOIRS & DREDGING

3/28/46 34
BIDS POSTPONED

BOULDER CANYON PROJECT.—Until April 15, 10 A. M. (postponed from April 8th), bids will be received by the U. S. Bureau of Reclamation, Yuma, Ariz., under Spec. 1195 for the construction of earthwork, canal lining and structures, stations 5725+00 to 6106+06, Coachella Canal, All-American Canal System, Boulder Canyon Project, Arizona-California-Nevada. The work is situated in the vicinity of Indio, Calif.

The principal items of work and the estimated quantities involved are as follows:

Schedule No. 1

(1) 396,500 cu. yds. excavation for canal;
(2) 220,000 cu. yds. excavation for drainage channels and dikes;
(3) 44,000 cu. yds. excavation for structures;
(4) 64,000 cu. yds. compacting embankments;
(5) trimming 201,400 sq. yds. foundations for concrete lining;
(6) 800 cu. yds. compacted subbase;
(7) 30,000 cu. yds. backfill about structures;
(8) 13,000 cu. yds. compacting backfill;
(9) 12,800 cu. yds. backfill at top of concrete lining;
(10) 19,000 cu. yds. riprap;
(11) constructing 330 cu. yds. reverse filter;
(12) 50 cu. yds. pit-run gravel blanket
(13) 4200 cu. yds. concrete in structures;
(14) 9800 cu. yds. concrete in unreinforced lining;
(15) 9800 cu. yds. concrete in reinforced lining;
(16) placing 610,000 lbs. reinforcement bars;
(17) placing 287,500 lbs. reinforcement fabric in canal lining;
(18) placing 1500 sq. ft. elastic filler material in joints;
(19) placing 820 lin. ft. rubber water stop in joints;
(20) erecting 112 M ft. b.m. timber in structures;
(21) laying 392 lin. ft. 12-in. diameter concrete pipe;
(22) laying 168 lin. ft. 18-in. diameter concrete pipe;
(23) laying 280 lin. ft. 24-in. diameter concrete pipe;
(24) laying 96 lin. ft. 36-in. diameter concrete pipe;
(25) laying 40 lin. ft 12-in. diameter asbestos-cement pipe;
(26) jacking 80 lin. ft. 84-in. diameter concrete pipe under railroad;
(27) installing 6800 lbs. screw-lift gates;
(28) installing 18,000 lbs. radial gates;
(29) installing 20,000 lbs. radial-gate hoists and operating and control mechanisms;
(30) installing 6500 lbs. metal water stops in joints;
(31) installing 3200 lbs. miscellaneous metal work;
(32) placing 65 cwt. bituminous material in float drums;
(33) installing 360 lin. ft. electric metal conduits;
(34) installing 50 lbs. ground wires.

Schedule No. 2

(1) 410,000 cu. yds. excavation for canal;
(2) 220,000 cu. yds. excavation for drainage channels and dikes;
(3) 44,000 cu. yds. excavation for structures;
(4) 64,000 cu. yds. compacting embankments;
(5) trimming and preparing 208,400 sq. yds. foundations for asphaltic-concrete lining;
(6) 800 cu. yds. compacted subbase;
(7) 30,000 cu. yds. backfill about structures;
(8) 13,000 cu. yds compacting backfill;
(9) 12,800 cu. yds. backfill at top of asphaltic-concrete lining;
(10) 19,000 cu. yds. riprap;
(11) constructing 330 cu. yds. reverse filter;
(12) 50 cu. yds. pit-run gravel blanket
(13) 4200 cu. yds. concrete in structures;
(14) 208,400 sq. yds. asphaltic-concrete course for canal lining;
(15) 2100 tons of asphalt for asphaltic-concrete;
(16) 170 tons asphalt for seal treatment;
(17) placing 610,000 lbs. reinforcement bars;
(18) placing 1130 sq. ft. elastic filler material in joints;
(19) placing 820 lin. ft. rubber water stop in joints;
(20) erecting 112 M ft. b.m. timber in structures;
(21) laying 392 lin. ft. 12-in. diameter concrete pipe;
(22) laying 168 lin. ft 18-in. diameter
(23) laying 280 lin. ft. 24-in. diameter concrete pipe;
(24) laying 96 lin. ft. 36-in. diameter concrete pipe;
(25) laying 40 lin. ft. 12-in. diameter asbestos-cement pipe;
(26) jacking 80 lin. ft. 84-in. diameter concrete pipe under railroad;
(27) installing 6800 lbs. of screw-lift gates;
(28) installing 18,000 lbs. radial gates;
(29) installing 20,000 lbs. radial-gate hoists and operating and control mechanisms;
(30) installing 6500 lbs. metal water stops in joints;
(31) installing 3200 lbs. miscellaneous metal work;
(32) placing 65 cwt. bituminous material in float drum;
(33) installing 360 lin. ft. electrical metal conduits;
(34) installing 50 lbs. ground wires.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Custom House, Denver 2, Colo.; E. A. Moritz, regional director, Administration Bldg., Boulder City, Nev.; J. K. Rohrer, acting construction engineer, Yuma, Ariz., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the acting construction engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others, $2.50 per copy, not returnable.

OFFICIAL PROPOSAL

Restoration of Sites, Areas A and B

Sealed bids will be received by the Chicago Bridge and Iron Company, Post Office Box 1022, Eureka, California, until 11 A. M. Pacific Standard Time, Tuesday, April 9, 1946, at which time they will be opened and read in the presence of a representative of the U. S. Navy, Bureau of Yards and Docks, for the following contracts:

Restoration of Site—Area A.
Restoration of Site—Area B.

"Restoration of Site, Area A," is for the removal of and disposition of various waterfront and shipbuilding facilities including timber sheet-pile cofferdams, mooring dolphins, an outfitting dock, and various shipways and miscellaneous structures. Award will be made by lump sum contract.

"Restoration of Site, Area B," is for the removal of and disposition of various site facilities including twenty or more frame buildings, timber prefabrication slabs, fences and miscellaneous structures. Award will be made by lump sum contract.

Maps, specifications, proposal forms and proposed contract forms may be obtained at the Eureka office of the Chicago Bridge and Iron Company, foot of Washington Street, Eureka, California.

CHICAGO BRIDGE AND IRON COMPANY
